[FOA-C-30498-3.3] p 583 N89-23213
- MULTISPECTRAL BAND SCANNERS**
Multispectral terrain background simulation techniques for use in airborne sensor evaluation
p 499 A89-33664
- MULTIVARIATE STATISTICAL ANALYSIS**
A digital rate controller for the control reconfigurable combat aircraft designed using quantitative feedback theory
[AD-A203050] p 484 N89-21001
- Multivariable control law design for the Control Reconfigurable Combat Aircraft (CRCA)
[AD-A202897] p 540 N89-21803

NACELLES

- Propfan design by propeller-nacelle interaction analysis p 36 A89-11055
- Method to optimize nacelle shape in a supersonic cruise aircraft p 28 A89-12558
- A transonic computational method for an aft-mounted nacelle/pylon configuration with propeller power effect
[AIAA PAPER 89-0680] p 311 A89-25449
- Feasibility study on the design of a laminar flow nacelle
[AIAA PAPER 89-0640] p 311 A89-25506

Aerodynamic design and testing of Fokker 50 nacelle and intake ducts
[AIAA PAPER 89-2483] p 685 A89-46886

Lightning tests to measure the bulk current levels associated with the electronic engine control of a turboprop commuter transport p 21 N89-10457

Fire extinguishing agent evaluation in the Aircraft Engine Nacelle Fire Test Simulator (AENFTS)
[AD-A198523] p 157 N89-14227

Integration effects of pylon geometry on a high-wing transport airplane
[NASA-TP-2877] p 221 N89-15888

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 1: Theory and application
[NASA-CR-4199-VOL-1] p 222 N89-15896

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 2: User's manual
[NASA-CR-4199-VOL-2] p 223 N89-15897

Lift and longitudinal forces on propeller/nacelle/wing/flap systems
[ESDU-88031] p 298 N89-16736

Transonic operational characteristics and performance [NAL-TR-968] p 591 N89-23408

NAP-OF-THE-EARTH NAVIGATION

The NOE pilot's associate - A job description
p 39 A89-12402

The effect of reduced useable cue environments on helicopter handling qualities p 112 A89-15705

A study of the rotor wake in nap-of-the-earth
p 439 A89-33140

Integration of active and passive sensors for obstacle avoidance p 830 A89-54083

Design and numerical evaluation of full-authority flight control systems for conventional and thruster-augmented helicopters employed in NOE operations
[NASA-CR-183311] p 114 N89-12570

AH-1S communication switch integration program
[NASA-TM-101053] p 466 N89-20978

Optimal guidance with obstacle avoidance for nap-of-the-earth flight
[NASA-CR-177515] p 618 N89-24328

NASA PROGRAMS

The winning edge --- NASA role in US aeronautics industry's competition with foreign suppliers
[SAE PAPER 880945] p 2 A89-12322

NAS - The first year --- Numerical Aerodynamic Simulation p 135 A89-13623

The role of specialized processors in the NAS program - Retrospective/prospective p 136 A89-16518

NASA/AHS Rotorcraft Noise Reduction program - Accomplishments at Sikorsky Aircraft
p 229 A89-22976

Recent results in the NASA research balloon program
[AIAA PAPER 89-0233] p 269 A89-25199

Developments in explosive separation ice protection blankets
[AIAA PAPER 89-0774] p 311 A89-25572

An overview of the current NASA program on aircraft icing research
[SAE PAPER 881386] p 305 A89-28192

NASA will study heavy rain effects on wing aerodynamics p 407 A89-29347

NACA/NASA research related to evolution of U.S. gust design criteria
[AIAA PAPER 89-1373] p 390 A89-30848

NASA supercritical laminar flow control airfoil experiment p 372 A89-32331

NASA/AHS rotorcraft noise reduction program - NASA Langley Acoustics Division contributions
p 632 A89-41049

NASA adds to understanding of high angle of attack regime p 571 A89-41201

NASA rotorcraft technology for the 21st century
[AIAA PAPER 89-2066] p 758 A89-49435

On the threshold - The outlook for supersonic and hypersonic aircraft
[AIAA PAPER 89-2071] p 759 A89-49438

Current research in composite structures at NASA's Langley Research Center p 861 A89-51692

Advanced analytical facilities report of the planetary materials and geochemistry working group
[NASA-CR-183338] p 117 N89-11786

NASA advanced propeller research
[NASA-TM-101361] p 241 N89-15913

The national aero-space plane p 317 N89-18387

NASA HOST project overview p 479 N89-20136

Views on the impact of HOST p 480 N89-20144

NASA aeronautics research and technology
[NASA-EP-259] p 568 N89-23406

Langley aerospace test highlights, 1988
[NASA-TM-101579] p 635 N89-25112

NASTRAN

Aircraft interior noise prediction using a structural-acoustic analogy in NASTRAN modal synthesis p 99 A89-15606

Investigation of difficult component effects on FEM vibration prediction for the AH-1G helicopter
p 162 A89-18879

Vibration and flutter analysis of composite wing panels p 346 A89-26273

Modal forced vibration analysis of aerodynamically excited turbosystems
[NASA-CR-174966] p 425 N89-18696

NASTRAN supplemental documentation for modal forced vibration analysis of aerodynamically excited turbosystems
[NASA-CR-174967] p 427 N89-19583

Coupled rotor/fuselage dynamic analysis of the AH-1G helicopter and correlation with flight vibrations data
[NASA-CR-181723] p 497 N89-20512

Composite sizing and ply orientation for stiffness requirements using a large finite element structural model p 705 N89-25166

Recent experiences using finite-element-based structural optimization p 705 N89-25177

Plan, formulate, discuss and correlate a NASTRAN finite element vibrations model of the Boeing Model 360 helicopter airframe
[NASA-CR-181787] p 707 N89-25480

Flutter calculations for a model wing using the MSC NASTRAN structural analysis program
[AD-A209244] p 824 N89-29318

NATIONAL AEROSPACE PLANE PROGRAM

Pressure and heat transfer investigation of a modified NASP baseline configuration at M = 6 --- National Aero-Space Plane
[AIAA PAPER 89-0246] p 339 A89-25208

Computational design aspects of a NASP nozzle/afterbody experiment
[AIAA PAPER 89-0446] p 284 A89-25364

The National Aero-Space Plane program
[AIAA PAPER 89-5053] p 715 A89-48184

The past as prologue --- development of X-series experimental aircraft/spacecraft
[AIAA PAPER 89-5004] p 718 A89-51329

The NASP challenge - Testing for validation
[AIAA PAPER 89-5005] p 795 A89-51330

Enabling technologies research and development for the National Aero-Space Plane
[AIAA PAPER 89-5009] p 804 A89-51334

NASP aerodynamics
[AIAA PAPER 89-5013] p 742 A89-51338

Hypersonic flight, domestic military policy, and international relations p 878 A89-54364

The national aero-space plane p 317 N89-18387

NATIONAL AIRSPACE SYSTEM

Proposed revisions to America's national airspace system - A crisis in leadership? p 204 A89-18950

A model of the National Airspace System
[AIAA PAPER 89-3626] p 829 A89-52701

Interfacing hypersonic aircraft in the National Airspace System p 831 A89-54366

The status of the FAA Central Weather Processor (CWP) program p 872 A89-54857

Data Link Processor (DLP), pilot access to weather data p 831 A89-54859

FAA (Federal Aviation Administration) air traffic activity: Fiscal year 1987
[AD-A196625] p 90 N89-11728

Microwave landing systems: Additional systems should not be procured unless benefits proven
[GAO/RCED-88-118] p 466 N89-20977

National airspace system plan: Facilities, equipment, associated development and other capital needs
[AD-A202815] p 526 N89-22596

National Airspace System Search and Rescue operational concept (NAS-SR-1329)
[DOT/FAA/DS-89/07] p 597 N89-23435

Host computer system capacity management procedures
[AD-A193416] p 630 N89-24051

FAA statistical handbook of aviation: Calendar year 1987
[AD-A200917] p 638 N89-25113

Notice to Airmen (NOTAM) system operational concept
[DOT/FAA/CT-TN89/10] p 658 N89-25142

Mode S performance test plan
[DOT/FAA/CT-TN89/24] p 707 N89-26127

Collision avoidance operational concept
[WP-88W00418] p 831 N89-28509

Direct User Access Terminal (DUAT) operational concept
[WP-88W00075] p 854 N89-28524

NATIONAL AIRSPACE UTILIZATION SYSTEM

National airspace system plan: Facilities, equipment, associated development and other capital needs
[AD-A202815] p 526 N89-22596

NATURAL LANGUAGE (COMPUTERS)

Advanced piloted aircraft flight control system design methodology. Volume 1: Knowledge base
[NASA-CR-181726-VOL-1] p 690 N89-26013

Advanced piloted aircraft flight control system design methodology. Volume 2: The FCX flight control design expert system
[NASA-CR-181726-VOL-2] p 691 N89-26014

NAVIER-STOKES EQUATION

A new PNS code for chemical nonequilibrium flows
p 9 A89-11106

Analysis of complex hypersonic flows with strong viscous/inviscid interaction p 9 A89-11109

Incompressible Navier-Stokes computations for a round-edged double-delta wing p 12 A89-12552

Navier-Stokes solution to the flowfield over ice accretion shapes p 12 A89-12557

New guide for accurate Navier-Stokes solution of two-dimensional external compression inlet with bleed
p 69 A89-13573

Aerodynamic applications of an efficient incompressible Navier-Stokes solver p 72 A89-13643

Modeling of vortex dominated flowfields in the Euler formulation p 72 A89-13645

A comparison of Navier-Stokes and Monte Carlo methods
[AIAA PAPER 88-2730] p 75 A89-14984

Navier-Stokes computations of laminar compressible and incompressible vortex flows in a channel
p 125 A89-15657

Navier-Stokes solution for transonic flow over wings
p 76 A89-15679

A method for the solution of the Reynolds-averaged Navier-Stokes equations on triangular grids
p 77 A89-15695

GAMM workshop - Numerical simulation of compressible Navier-Stokes flows presentation of problems and discussion of results p 77 A89-15698

Navier-Stokes simulation for flow past an open cavity
p 78 A89-16096

Calculation of internal flows using a single pass parabolized Navier-Stokes analysis
[AIAA PAPER 88-3005] p 79 A89-16477

Numerical simulation of compressible Navier-Stokes flows --- Book p 127 A89-17013

A multistage multigrid method for the compressible Navier-Stokes equations p 81 A89-17018

Solutions of the Navier-Stokes equations for sub- and supersonic flows in rarefied gases p 81 A89-17019

Using an unfactored implicit predictor-corrector method - Results with a research code --- for high-Reynolds number transonic airfoil flow p 81 A89-17021

Implicit central difference simulation of compressible Navier-Stokes flow over a NACA0012 airfoil
p 82 A89-17022

Solution of the compressible Navier-Stokes equations for a double throat nozzle p 82 A89-17025

An evaluation of a Navier-Stokes code for calculations of retreating blade stall on a helicopter rotor
p 146 A89-18916

Multigrid acceleration of a relaxation procedure for the reduced Navier-Stokes equations p 148 A89-19904

Transonic Navier-Stokes solutions for a fighter-like configuration p 149 A89-20134

Further comparisons of interactive boundary-layer and thin-layer Navier-Stokes procedures p 149 A89-20137

Navier-Stokes calculations using Cartesian grids. I - Laminar flows p 150 A89-20180

Numerical analysis of cascade viscous flow using the Navier-Stokes equations p 210 A89-22004

Navier-Stokes solutions for mixed compression axisymmetric inlet flow with terminal shock
p 211 A89-22276

Transonic flow solutions using a composite velocity procedure for potential, Euler and RNS equations
p 211 A89-22337

High-resolution upwind schemes for the three-dimensional incompressible Navier-Stokes equations p 212 A89-22355

Separation-bubble flow solution using Euler/Navier-Stokes zonal approach with downstream compatibility conditions p 212 A89-22576

Viscous transonic airfoil workshop compendium of results p 214 A89-22809

Navier-Stokes calculations of transonic viscous flow about wing/body configurations p 214 A89-22812

Numerical study of a research circulation control airfoil using Navier-Stokes methods p 218 A89-24304

Fast laminar near wake flow calculation by an implicit method solving the Navier-Stokes equations
p 270 A89-24923

- A numerical study of hypersonic propulsion/airframe integration problem
[AIAA PAPER 89-0030] p 272 A89-25026
- Unsteady Navier-Stokes computations past oscillating delta wing at high incidence
[AIAA PAPER 89-0081] p 273 A89-25071
- Adaptive grid embedding Navier-Stokes technique for cascade flows
[AIAA PAPER 89-0204] p 277 A89-25179
- Passage-averaged Navier-Stokes equations with finite element applications
[AIAA PAPER 89-0208] p 344 A89-25183
- Upwind Navier-Stokes solutions for leading-edge vortex flows
[AIAA PAPER 89-0265] p 278 A89-25223
- Large-angle-of-attack viscous hypersonic flows over complex lifting configurations
[AIAA PAPER 89-0269] p 279 A89-25227
- Numerical simulation of hypersonic flow around a space plane at high angles of attack using implicit TVD Navier-Stokes code
[AIAA PAPER 89-0273] p 279 A89-25230
- Comparison of LDV measurements and Navier-Stokes solutions in a two-dimensional 180-degree turn-around duct
[AIAA PAPER 89-0275] p 279 A89-25232
- Grid refinement studies of turbine rotor-stator interaction
[AIAA PAPER 89-0325] p 281 A89-25274
- Navier-Stokes solutions for vortical flows over a tangent-ogive cylinder
[AIAA PAPER 89-0337] p 281 A89-25284
- Navier-Stokes solutions about the F/A-18 forebody-LEX configuration --- Leading Edge Extension
[AIAA PAPER 89-0338] p 281 A89-25285
- Application of direct solvers to unstructured meshes for the Euler and Navier-Stokes equations using upwind schemes

[AD-A209689] p 807 N89-27992

NOZZLE WALLS
A study on hypersonic shock tunnel
p 148 A89-20132

NOZZLES
Experimental investigation of convergent ejector nozzle/afterbody in wind tunnel p 8 A89-11060

Gravity refueling nozzles and ports interface standards for civil aircraft
[SAE AS 1852] p 544 A89-37659

NUCLEAR ELECTRIC POWER GENERATION
Turbine design using complex modes and substructuring p 190 A89-19718

NUCLEAR EXPLOSIONS
Passive thermal protection system p 26 A89-10478

NUCLEAR FUELS
An analysis of severe air transport accidents
[DE89-012642] p 749 N89-27642

NUCLEAR MAGNETIC RESONANCE
Application of nondestructive evaluations to the prediction of turbine fuel peroxidation potential
[AD-A202291] p 412 N89-19441

A (13)C NMR analysis of the effects of electron radiation on graphite/polyetherimide composites
[NASA-CR-182818] p 489 N89-20205

Modern multiple-pulse, high field NMR studies of high density jet fuels
[AD-A203320] p 490 N89-21130

NUCLEAR RADIATION
A method for monitoring the variability in nuclear absorption characteristics of aviation fuels
[NASA-TM-4077] p 136 N89-12234

NUMERICAL ANALYSIS
Numerical analysis of flow through oscillating cascade sections
[AIAA PAPER 89-0437] p 206 A89-28413

Some mathematical considerations on views of the ground surface in flight p 582 A89-36351

The spatially non-uniform convergence of the numerical solutions of flows p 699 A89-45535

A truncation error injection approach to viscous-inviscid interaction p 83 N89-11700

Numerical simulations of the flowfield in central-dump ramjet combustors. Part 2: Effects of inlet and combustor acoustics
[AD-A196743] p 108 N89-11745

The laminar boundary layer on an airfoil started impulsively from rest p 86 N89-12540

A two-dimensional numerical simulation of a supersonic, chemically reacting mixing layer
[NASA-TM-4055] p 86 N89-12542

HOST combustion R and T overview
p 110 N89-12879

A comparison of numerical methods for the prediction of two-dimensional heat transfer in an electrothermal heater pad
[NASA-CR-4202] p 175 N89-13429

Control of a human-powered helicopter in hover
[NASA-TM-101029] p 182 N89-13438

Advances in the numerical analysis of linearized unsteady cascade flows
[AD-A199211] p 260 N89-18120

Numerical solution of flow fields around Delta wings using Euler equations method
[NAL-TM-FM-8701] p 299 N89-16757

Notes on a theoretical parachute opening force analysis applied to a general trajectory
[AD-A201050] p 302 N89-17582

Large-scale viscous simulation of laminar vortex flow over a delta wing p 374 N89-18660

Numerical computations of transonic critical aerodynamic behavior
[AD-A202412] p 379 N89-19277

Two-dimensional test section with preadjusted adaptive walls for low speed wind tunnel
[KTH-AERO-REPT-57] p 379 N89-19278

An analytical and numerical study of axial flow compressor instability p 478 N89-20131

Wave drag due to lift for transonic airplanes
p 455 N89-20938

Application of the boundary element method to fatigue crack growth analysis
[AD-A202565] p 498 N89-21270

Numerical study of a multipurpose transonic wind tunnel with an adaptable injection-suction system
p 543 N89-22621

NUMERICAL CONTROL
Modern digital pressure control system
[AIAA PAPER 88-3948] p 172 A89-18119

Digital control of a quadruplex direct drive actuator
[AIAA PAPER 88-3951] p 172 A89-18122

X-29 validation methodology for simulation and flight control system p 181 A89-19557

Secondary power - Benefits of digital control and vehicle management system integration
[SAE PAPER 881498] p 325 A89-28264

Study on exchange operation between two microcomputers in aeroengine digital control
p 535 A89-37774

A microcomputer controlled optimal adaptive flight simulator servo system p 811 A89-50782

A comparison of detection efficiency on an air traffic control monitoring task with and without computer aiding
[AD-A206422] p 602 N89-24294

NUMERICAL DIFFERENTIATION
Precision characteristics of a coordinate device for estimating the velocity of an object p 830 A89-52779

NUMERICAL FLOW VISUALIZATION
A numerical simulation of separated flow around two-dimensional wing by a discrete vortex method
p 6 A89-10568

Numerical experiments for separation flows around trapezoidal cylinders by a discrete vortex method
p 6 A89-10569

Numerical simulation of supersonic flow over a three-dimensional cavity p 9 A89-11105

NAS - The first year --- Numerical Aerodynamic Simulation p 135 A89-13623

Coupled Eulerian and Lagrangian numerical methods for the computation of the flowfield around an airfoil
p 77 A89-15697

GAMM workshop - Numerical simulation of compressible Navier-Stokes flows presentation of problems and discussion of results p 77 A89-15698

Two-dimensional numerical analysis for inlets at subsonic through hypersonic speeds p 79 A89-16459

The role of specialized processors in the NAS program - Retrospective/prospective p 136 A89-18518

Helicopter free wake prediction of complex wake structures under Blade-Vortex Interaction operating conditions p 146 A89-18918

Numerical simulation of tip vortices of wings in subsonic and transonic flows
[AD-A204525] p 150 A89-20176

Transonic flow about a circular cylinder
p 212 A89-22346

Numerical simulations of dynamic response of fixed and rotary wing aircraft to a large airplane wake
p 243 A89-23301

Streamlines and streamribbons in aerodynamics
[AIAA PAPER 89-0140] p 278 A89-25123

Numerical simulation of high-incidence flow over the F-18 fuselage forebody
[AIAA PAPER 89-0339] p 282 A89-25286

Direct numerical simulation of compressible free shear flows
[AIAA PAPER 89-0374] p 283 A89-25317

Study of the vortical wake patterns of an oscillating airfoil
[AIAA PAPER 89-0554] p 287 A89-25444

Numerical simulation of three-dimensional hypersonic viscous flows p 441 A89-33644

Direct numerical simulation of a three-dimensional turbulent boundary layer p 493 A89-34909

Bipolar coordinates for computation of transition duct flows p 493 A89-34912

Aero-optical analysis of compressible flow over an open cavity p 509 A89-36914

Numerical simulation of supersonic flows past a space-plane p 511 A89-38124

Navier-Stokes computations of two- and three-dimensional cascade flowfields
p 514 A89-39035

Numerical simulation of flow through a two-strut scramjet inlet p 514 A89-39038

Numerical simulation of the unsteady wake behind an airfoil p 514 A89-39188

Numerical study of turbulence model in a supersonic nozzle p 515 A89-39349

Large-scale viscous simulation of laminar vortex flow over a delta wing p 569 A89-40901

Use of high-resolution upwind scheme for vortical flow simulations
[AIAA PAPER 89-1955] p 574 A89-41802

Numerical simulation of the Navier-Stokes equations for an F-16A configuration p 578 A89-42014

The computation of Navier-Stokes solutions exhibiting asymmetric vortices
[AIAA PAPER 89-1817] p 580 A89-42047

Numerical simulation of hypersonic viscous perfect gas flow for the aerodynamic design of space planes at low angles of attack
[AIAA PAPER 89-1699] p 591 A89-43215

Numerical simulations of oblique detonations in supersonic combustion chambers p 674 A89-44115

Studies of vortex flow aerodynamics using CFD flow visualizations p 641 A89-45260

Computation of hypersonic vortex flows with an Euler model p 642 A89-45368

Numerical simulation of leading-edge vortex breakdown using an Euler code
[AIAA PAPER 89-2189] p 721 A89-47650

Navier-Stokes simulation of burst vortex flowfields for fighter aircraft at high incidence
[AIAA PAPER 89-2190] p 722 A89-47651

Supersonic Navier-Stokes simulations of turbulent afterbody flows
[AIAA PAPER 89-2194] p 722 A89-47654

Numerical optimization of wings in transonic flow
[ONERA, TP NO. 1989-87] p 728 A89-48751

Numerical simulation of flow around a profile with eddies p 735 A89-49607

Aspects of the numerical simulation of turbulent flow in combustor type configurations p 775 A89-50373

Numerical simulation and hydrodynamic visualization of transient viscous flow around an oscillating aerofoil
p 817 A89-52481

Representation and display of vector field topology in fluid flow data sets p 875 A89-54904

Scientific visualization in computational aerodynamics at NASA Ames Research Center p 875 A89-54907

Numerical aerodynamic simulation
[NASA-EP-262] p 569 N89-24262

NUMERICAL INTEGRATION
Numerical integration of the blade-to-blade surface Euler equations in vibrating cascades p 240 A89-23187

Determination of the numerical integration step during the analog-digital modeling of dynamic systems
p 354 A89-27405

Integrated approach for active coupling of structures and fluids p 552 A89-36917

A flow-field solver using overlying and embedded meshes together with a novel compact Euler algorithm
p 641 A89-45359

An improved numerical integration method for flight simulation
[AIAA PAPER 89-3306] p 809 A89-48414

NUMERICAL STABILITY
Conflicting stepsize requirements for stable PNS computations
[AIAA PAPER 89-0445] p 284 A89-25363

Numerical instabilities in the calculation of laminar separation bubbles and their implications
p 445 A89-34819

Improved time-domain stability robustness measures for linear regulators p 630 A89-43068

NUMERICAL WEATHER FORECASTING
Structure and life cycle of microburst outflows observed in Colorado p 54 A89-11221

The World Area Forecast System p 870 A89-54827

The development of numerically-based and expert system approaches for airfield nowcasting/very short range forecasting p 872 A89-54860

NYLON (TRADEMARK)
Summary of aging effects on 25-year old nylon parachutes
[DE89-001378] p 251 N89-15249

NYQUIST DIAGRAM
Comparison of Characteristic Locus and h-infinity methods in VSTOL flight control system design
[AIAA PAPER 89-3491] p 846 A89-52584

OBJECT PROGRAMS

Towards a general object-oriented software development methodology p 264 A89-16330

OBULATE SPHEROIDS

Experimental analysis of turbulent separation on an oblate ellipsoid-cylinder p 208 A89-21095

OBLIQUE SHOCK WAVES

Numerical simulations of oblique detonations in supersonic combustion chambers p 674 A89-44115
Interaction of an oblique shock wave with supersonic turbulent blunt body flows p 644 A89-45405
Demonstration of oblique detonation wave for hypersonic propulsion [AD-A208268] p 776 A89-26856

OBLIQUE WINGS

Supersonic flutter of aeroelastically tailored oblique wings p 244 A89-24310
Scissor wing - An alternative to variable sweep [AIAA PAPER 89-0013] p 310 A89-25009
Design of a small supersonic oblique-wing transport aircraft p 385 A89-29160
Oblique wing aircraft flight control system p 405 A89-31462
A piloted evaluation of an oblique-wing research aircraft motion simulation with decoupling control laws [NASA-TP-2874] p 248 A89-15930
Modal control of an oblique wing aircraft [NASA-TP-2898] p 333 A89-16845
The Leading Edge 250: Oblique wing aircraft configuration project, volume 4 [NASA-CR-184702] p 360 A89-18410
The oblique-wing research aircraft: A test bed for unsteady aerodynamic and aeroelastic research p 376 A89-19253

Static aeroelasticity of a composite oblique wing in transonic flows p 376 A89-19254
Control surface spanwise placement in active flutter suppression systems p 689 A89-25195
The conceptual design of a Mach 2 Oblique Flying Wing supersonic transport [NASA-CR-177529] p 671 A89-25233

OBSERVABILITY (SYSTEMS)

Modal observability and controllability measures for first and second order linear systems and model reduction p 57 A89-11680
Robust modalized observer with flight control application p 404 A89-28585
Observer design for compensation of network-induced delays in integrated communication and control systems p 500 A89-35044
Measures of modal controllability and observability for first- and second-order linear systems p 563 A89-36943
Design of a modalized observer with eigenvalue sensitivity reduction --- for lateral dynamics of L-1011 aircraft p 842 A89-51723
Extended observability of linear time-invariant systems under recurrent loss of output data [AIAA PAPER 89-3510] p 873 A89-52603
An observer-based compensator for distributed delays in integrated control systems [AIAA PAPER 89-3541] p 847 A89-52628
Observability studies of inertial navigation systems [AIAA PAPER 89-3580] p 829 A89-52663
Fault-tolerant sensor and actuator selection for control of flexible structures p 874 A89-54007

OBSTACLE AVOIDANCE

An expert system for wind shear avoidance p 826 A89-53971
Integration of active and passive sensors for obstacle avoidance p 830 A89-54083
Optimal guidance with obstacle avoidance for nap-of-the-earth flight [NASA-CR-177515] p 618 A89-24328

OCEAN SURFACE

Fractal features of sea surface manifested in microwave remote sensing signatures p 258 A89-24872

OCULOMETERS

Development of a low-cost helmet mounted eye gaze sensor [AD-A202303] p 399 A89-19298

OFFSHORE PLATFORMS

An analytical tool to define criteria for helicopter airborne radar approach procedures to offshore installations p 225 A89-23358

OGIVES

Body wing tail interference studies at high angles of attack and variable Reynolds numbers p 74 A89-13691
Supersonic, transverse jet from a rotating ogive cylinder in a hypersonic flow p 294 A89-27728

An experimental investigation of the aerodynamic characteristics of slanted base ogive cylinders using magnetic suspension technology [NASA-CR-184824] p 300 A89-16758

The use of the College of Aeronautics Whirling Arm facility to determine the effect of flow curvature on the aerodynamic characteristics of an ogive-cylinder body p 516 A89-21765

OH-6 HELICOPTER

Notar reduces pilot workload, improves response in OH-6A p 385 A89-29348

OILS

Field experience with quantitative debris monitoring [SAE 871736] p 34 A89-10620

OMEGA NAVIGATION SYSTEM

Omega Navigation System - A status report p 160 A89-19867
Omega navigation in the shadow of Antarctica p 660 A89-43893

ON-LINE SYSTEMS

An expert system for restructurable control [NASA-TM-101378] p 137 A89-12309

ONBOARD DATA PROCESSING

Single-chip solution of MIL-STD-1553A and MIL-STD-1553B data communications [SAE PAPER 872488] p 48 A89-10683
An on-board diagnostic system - Sensors on the lookout p 104 A89-15034
Combined numerical and symbolic processing for airborne surveillance [AIAA PAPER 88-3985] p 157 A89-18143
Developing error-free software p 201 A89-19679
Ranging and Processing Satellite (RAPSAT) p 340 A89-26738

An algorithm for in-flight synthesis of minimum-fuel cruise trajectories with fixed arrival time [AIAA PAPER 89-3387] p 757 A89-49088
Use of multiprocessor technology for active disturbance variable suppression in a helicopter p 782 A89-50365
On-board automatic aid and advisory for pilots of control-impaired aircraft [AIAA PAPER 89-3460] p 844 A89-52558
Integrated control and avionics for air superiority - Computational aspects of real-time flight management [AIAA PAPER 89-3463] p 837 A89-52559
Map, Operator, Maintenance Stations --- in mission planning [AIAA PAPER 89-3523] p 854 A89-52613
Electronics in civil aviation [NLR-MP-87009-U] p 476 A89-20129

ONBOARD EQUIPMENT

Design of a certifiable primary on-board aircraft weight and balance system [AIAA PAPER 88-3919] p 171 A89-18096
Reflections on avionics integration [AIAA PAPER 88-3950] p 172 A89-18121
Concepts, parameters, and symbols of flight mechanics p 207 A89-21409
Problems of the unification of the on-board systems of flight vehicles p 620 A89-42458
The measurement of linear and angular displacements in prototype aircraft - Instrumentation, calibration and operational accuracy p 698 A89-45142
Development of onboard maintenance systems on Boeing airplanes p 715 A89-48550
MLS 1989 - Status report from the perspective of the airline companies p 830 A89-53663
On-board expert diagnostics for an avionics subsystem p 202 A89-14758
Avionics fault tree analysis and artificial intelligence for future aircraft maintenance p 202 A89-14760
Determination of reference trajectories for testing navigation aids using an onboard CCD camera p 602 A89-24303
Flight test method development for a quarter-scale aircraft with minimum instrumentation [AD-A207896] p 835 A89-29337

ONE DIMENSIONAL FLOW

Quasi-stationary flow in blowdown wind tunnels p 209 A89-21582
One-dimensional transonic gas flow in a porous-wall wind tunnel p 217 A89-23692
A comparative study of the Coakley and TVD schemes for steady-state calculations of one-dimensional Euler equations p 571 A89-41759
An implicit cell-vertex scheme for solution of the Euler equations [AIAA PAPER 89-2235] p 735 A89-49682
Steady, shock-capturing method applied to one-dimensional nozzle flow p 738 A89-50548

OPACITY

Fuel-additive system for test cells [AD-A200801] p 342 A89-17681

OPENINGS

Reinforcing solutions for a panel cut-out p 698 A89-45177

OPERATING COSTS

Aerodynamic design and integration of a variable camber wing for a new generation long/medium range aircraft p 92 A89-13529

OPERATING SYSTEMS (COMPUTERS)

Ada executive for distributed avionics processing [AIAA PAPER 88-4042] p 200 A89-18166
An Ada programming support environment p 264 A89-16287
Conversion to Ada: Does it really make sense p 431 A89-18453
Debugging distributed Ada avionics software p 432 A89-18458
Software readiness planning p 432 A89-18466

OPERATING TEMPERATURE

Engineering ceramics - Applications and testing requirements p 347 A89-27632
Assessment of the adequacy of bearing lubrication in a gas turbine engine through openings in the rotating shaft p 492 A89-34154
Turbine Engine Hot Section Technology (HOST) Project p 110 A89-12877
Material/manufacturing process interaction in advanced material technologies p 549 A89-22662
The demonstration of monolithic and composite ceramics in aircraft gas turbine combustors p 550 A89-22665
Comparison of predicted and measured temperatures of UH-60A helicopter transmission [NASA-TP-2911] p 628 A89-24607

OPERATIONS RESEARCH

A review of requirements, design considerations and resulting experience for extended range operation of two-engine airplanes p 93 A89-13539

OPERATOR PERFORMANCE

Some consequences of reduced frame rate for operator performance p 465 A89-33573

OPERATORS (MATHEMATICS)

Design of optimally smoothing multi-stage schemes for the Euler equations [AIAA PAPER 89-1933] p 572 A89-41780

OPERATORS (PERSONNEL)

Display systems dynamics requirements for flying qualities [AD-A198275] p 233 A89-15104

OPTICAL COMMUNICATION

Laser communications airborne testbed - Potential for an air-to-satellite laser communications link p 89 A89-15795
Airborne laser communications scintillation measurements and model - A comparison of results p 89 A89-15797
Laser communication terminals with automatic video tracking p 90 A89-15812
Past progress and future advances in space laser communications p 250 A89-24068
Automatic acquisition and tracking for laser communication using video techniques p 225 A89-24070
Fiber optic links for airborne EHF SATCOM terminal applications p 258 A89-24096
Laser communication test system [AD-A199612] p 349 A89-17215
Status and development potential of the fly by light technology in civil aircraft [ILR-MITT-212] p 854 A89-28522

OPTICAL COUPLING

An experimental optical coupling device for an airborne digital redundant system [NAL-TR-1003] p 835 A89-28514

OPTICAL EQUIPMENT

Laser navigation equipment --- Russian book p 24 A89-10722
Design methods for a holographic head-up display curved combiner p 104 A89-15778
One million pixel full color liquid crystal display for avionics applications [AIAA PAPER 88-3967] p 173 A89-18134
Optically aided visual inspection of aircraft structure p 254 A89-21820
The optical bidirectional accelerometer --- for microgravity experiments p 553 A89-36966
Optical fire detector testing in the aircraft engine nacelle fire test simulator [AD-A197974] p 168 A89-13427
An investigation into the use of an existing shock tube as a driver for a hypersonic shock tunnel [AD-A208483] p 793 A89-26872

OPTICAL FIBERS

Applications of time and wavelength division multiplexing to digital optical code plates p 31 A89-10364
In situ composite cure monitoring using infrared transmitting optical fibers p 415 A89-29977
Optical fiber sensor development for turbine applications [AIAA PAPER 89-2914] p 704 A89-47168

OPTICAL GYROSCOPES

- Packaged fiber optic gyros with high bias stability p 46 A89-10121
- Update 89 - Additional results with the multifunction RLG system [AIAA PAPER 89-3583] p 837 A89-52716
- Performance test results of a multi-function fault-tolerant RLG system [AIAA PAPER 89-3584] p 837 A89-52717

OPTICAL MEASURING INSTRUMENTS

- Flow diagnostics with optical measurement methods p 257 A89-23813
- Aero-optical analysis of compressible flow over an open cavity p 509 A89-36914
- Reconnaissance sensor management system - Vicon 2000 p 609 A89-40254
- Optical sensors and signal processing schemes for use on gas turbine engines [PNR90480] p 424 A89-18675

OPTICAL PROPERTIES

- A study of shock wave radiation near models at hypersonic velocities in air p 513 A89-38445

OPTICAL RADAR

- Windshear avoidance - Requirements and proposed system for airborne lidar detection p 134 A89-15876
- Performance analysis and technical assessment of coherent lidar systems for airborne wind shear detection p 104 A89-15877
- NASA lidar velocimetry measurements p 491 A89-33435
- Prototype of a slant visual range measuring device [DFVLR-FB-88-42] p 713 A89-25697
- Airborne lidar global positioning investigations p 752 A89-28179

OPTICAL RANGE FINDERS

- Prototype of a slant visual range measuring device [DFVLR-FB-88-42] p 713 A89-25697

OPTICAL TRACKING

- Laser communication terminals with automatic video tracking p 90 A89-15812

OPTICAL TRANSFER FUNCTION

- Display characteristics of example light-valve projectors [AD-A209580] p 877 A89-29193

OPTIMAL CONTROL

- GENMAP - Computer code for mission adaptive profile generation p 12 A89-12566
- Open loop optimal control of multi-engine aircraft after one engine failure p 111 A89-13530
- Research and applications in aeroservoelasticity at the NASA Langley Research Center p 94 A89-13609
- Experience in application of active vibration control technology to a wind tunnel model and to flying Airbus p 95 A89-13657
- A modified cubic spline approach for terrain following system p 112 A89-16069
- Design of multi-level flight control systems p 181 A89-19813
- A note on the optimal hypersonic flight path p 167 A89-20637
- Simulation study on adjustment of a gas turbine unit p 262 A89-22001
- A note on the control against microburst p 223 A89-22629
- H-infinity design and the improvement of helicopter handling qualities --- optimization for design of robust controllers p 244 A89-23364
- Transformation techniques for minimax optimal control problems and their application to optimal flight trajectories in a windshear - Optimal abort landing trajectories p 245 A89-24526
- Aircraft cruise performance optimization using chattering controls p 233 A89-24527
- Aircraft maneuver optimization under fuel constraints - A real time algorithm p 246 A89-24529
- Inertial energy distribution error control for optimal wind shear penetration [AIAA PAPER 89-0016] p 331 A89-25012
- Aircraft vertical profile implementation using directed-graph methods p 332 A89-25683
- An H(infinity) method for the design of linear time-invariant multivariable sampled-data control systems p 354 A89-26187
- An alternative method to solve a variational inequality applied to an air traffic control example p 354 A89-26196
- Digital robust control law synthesis using constrained optimization p 430 A89-31458
- Selection of weighting matrices for linear optimal regulator p 563 A89-36990
- Active vibration control of flexible rotors - An experimental and theoretical study p 554 A89-37847
- Synthesis of systems for the motion control of nonstationary objects --- Russian book p 563 A89-38512

- Input signal selection in the identification of linear continuous dynamic systems from discrete observations p 563 A89-39777
 - A study of the characteristics of aircraft powerplants under conditions of optimal control of their principal components p 612 A89-42466
 - Use of a simplified estimation scheme for simulation validation and improvement [AIAA PAPER 89-3262] p 785 A89-48379
 - Optimization of aircraft cruise performance [AIAA PAPER 89-3386] p 757 A89-49087

Feasibility study for enhanced lateral control of the P-3C aircraft [AD-A208461] p 784 N89-26863

PACIFIC OCEAN

V/STOL aircraft configurations and opportunities in the Pacific Basin [SAE PAPER 872403] p 18 A89-10631

PACKAGING

An analysis of severe air transport accidents [DE89-012642] p 749 N89-27642

PACKINGS (SEALS)

An experimental study of the rate characteristics of brush seals in comparison with labyrinth seals p 492 A89-34136

PADE APPROXIMATION

Aeroservoelastic modeling and applications using minimum-state approximations of the unsteady aerodynamics [NASA-TM-101574] p 608 N89-24308

PAINTS

The effects of plastic media blasting paint removal on the microstructure of graphite/epoxy composite materials [AD-A204801] p 550 N89-22688

PANEL FLUTTER

Axisymmetric panel flutter of ring-reinforced composite cylindrical shells [AIAA PAPER 89-1167] p 417 A89-30658

Development of harmonic panel methods for aeroelastic applications to elastic bodies and body-fin combinations in supersonic flow [AD-A205739] p 593 N89-23423

PANEL METHOD (FLUID DYNAMICS)

An inverse, subsonic two-dimensional panel method following the method of smallest quadrature for the design and modification of multiple element profiles [DGLR PAPER 87-061] p 5 A89-10509

A numerical simulation of separated flow around two-dimensional wing by a discrete vortex method p 6 A89-10568

Numerical experiments for separation flows around trapezoidal cylinders by a discrete vortex method p 6 A89-10569

Panel methods in aerodynamics - Some highlights p 10 A89-11481

HSSS - A higher-order panel method for subsonic and supersonic attached flow about arbitrary configurations p 10 A89-11484

Application of an advanced panel method to aerodynamic problems of aircraft design p 28 A89-11486

The prediction of transonic interference flow by means of a hybrid method p 10 A89-11487

A subsonic panel method for design of 3-dimensional complex configurations with specified pressure distribution p 28 A89-11491

On the evaluation of aerodynamic influence coefficients p 11 A89-11496

Calculation of unsteady transonic flow about oscillating wings by a field panel method p 11 A89-11498

Approximation of free and bounded vortex sheets at delta-wings p 11 A89-11500

Unsteady supersonic flow computations for arbitrary three-dimensional configurations p 68 A89-13553

Effect of aerodynamic heating on deformation of composite cylindrical panels in a gas flow p 74 A89-13692

Recent developments in transonic flow computation p 145 A89-18749

An examination of some rotor aerodynamic models using the RSRA/X-wing model test data p 146 A89-18858

Analysis of a fighter type aircraft configuration with the HSSS panel method at subsonic and supersonic speeds [DGLR PAPER 87-085] p 147 A89-19660

Application of continuous vorticity panels in three-dimensional lifting flows with partial separation [AIAA PAPER 89-0117] p 275 A89-25104

A prediction of the stalling of the multi-element airfoils p 292 A89-25932

Sheared wing-tip aerodynamics - Wind-tunnel and computational investigation p 361 A89-29162

Analysis of wings with flow separation p 361 A89-29163

Application of panel method aerodynamics to rotor aeroelasticity in hover [AIAA PAPER 89-1234] p 388 A89-30720

A vortex panel method for the solution of incompressible unsteady flow [AIAA PAPER 89-1284] p 367 A89-30766

A time domain panel method for wings [AIAA PAPER 89-1323] p 368 A89-30800

Potential flow over bodies of revolution in unsteady motion p 508 A89-36910

Numerical simulation of aircraft rotary aerodynamics p 579 A89-42024

Application of HSSS panel code to a fighter-type aircraft configuration at subsonic and supersonic speeds [AIAA PAPER 87-2619] p 589 A89-42931

LOPAN - A low-order panel method for subsonic and supersonic flows p 639 A89-43724

Transonic analysis of arbitrary configurations using locally refined grids p 644 A89-45419

Calculation of isolated and installed multiple rotor flows using a surface panel method [AIAA PAPER 89-2214] p 723 A89-47671

Unsteady aerodynamics and control of delta wings with tangential leading-edge blowing [AIAA PAPER 89-3374] p 731 A89-49078

Validation of computational aerodynamics applied to general aviation configurations [AIAA PAPER 89-2169] p 761 A89-49678

Evaluation of the constant pressure panel method for supersonic unsteady airloads prediction p 737 A89-50065

Modeling of vortex layers over delta wings with a vortex line adapted panel method [ETN-88-93235] p 86 N89-11721

A vortex panel method for potential flows with applications to dynamics and control [AD-A197091] p 87 N89-12549

Development and validation of an advanced low-order panel method [NASA-TM-101024] p 88 N89-12554

Numerical methods for the design and unsteady analysis of aerofolds p 235 N89-15904

Development of a panel method for modeling configurations with unsteady component motions, phase 1 [AD-A200255] p 315 N89-16775

A vortex panel method for potential flows with applications to dynamics and controls p 378 N89-19269

Investigation of a free-tip rotor configuration for research on spanwise life distributions and wake velocity surveys of a semi-span wing with a discontinuous twist [NASA-CR-184948] p 457 N89-20963

A vortex panel analysis of circular-arc bluff-bodies in unsteady flow [DE89-007141] p 558 N89-22845

A lifting surface method for the calculation of steady and unsteady, incompressible propeller aerodynamics [DFVLR-FB-89-04] p 657 N89-25972

Analysis of leading edge separation using a low order panel method [NASA-CR-185892] p 822 N89-28493

PANELS

Effect of adhesive debond on stress-intensity factors in bonded composite panels p 45 A89-10091

Buckling and final failure of graphite/PEEK stiffener sections p 190 A89-19911

Sonic fatigue and nonlinear response of stiffened panels [AIAA PAPER 89-1101] p 492 A89-33741

Fast, in-situ repair of aircraft panel components p 438 A89-34896

The development of the panel stabilized slotted-square parachute [AIAA PAPER 89-0894] p 461 A89-35212

Reinforcing solutions for a panel cut-out p 698 A89-45177

Flutter of general laminated panels in supersonic flow p 803 A89-50174

Truss-core corrugation for compressive loads [NASA-CASE-LAR-13438-1] p 128 N89-12786

Prediction of stresses in aircraft panels subjected to acoustic forces [NASA-CR-182513] p 133 N89-12923

The effects of nonlinear damping on the large deflection response of structures subjected to random excitation p 193 N89-13796

Superplastic forming of aluminum, task C [AD-A207282] p 797 N89-26962

PANORAMIC CAMERAS

The conformed panoramic - A new concept in electro-optical sensors p 622 A89-40266

PARABOLIC DIFFERENTIAL EQUATIONS

Progress in the development of parabolized Navier-Stokes technology for external and internal supersonic flows [AIAA PAPER 89-1828] p 581 A89-42057

Upwind algorithm for the parabolized Navier-Stokes equations p 738 A89-50532

Numerical grid generation and potential airfoil analysis and design [AD-A197972] p 154 N89-14219

PARABOLIC FLIGHT

Impact cratering in low-gravity environments - Results of reconnaissance experimentation on the NASA KC-135A reduced-gravity aircraft p 544 A89-36543

PARACHUTE DESCENT

An approximate method for calculating aircraft downwash on parachute trajectories [AIAA PAPER 89-0899] p 447 A89-35216

An experimental investigation of the aerodynamic loads on cambered plates [AIAA PAPER 89-0935] p 447 A89-35244

An expression for dynamic strain in a 'weak link' [AIAA PAPER 89-0942] p 495 A89-35247

Fast brake --- F-111 high-performance parachute system development p 657 A89-46593

Parachute jump testing of portable GPS receivers p 717 A89-49794

Study of the aerodynamic situation along the C 160 aircraft in parachuting configuration [DAT-88-06] p 299 N89-16756

Wake recontact: An experimental investigation using a ringslot parachute [DE89-008320] p 518 N89-21773

PARACHUTE FABRICS

Testing of a new recovery parachute system for the F111 aircraft crew escape module - An update [AIAA PAPER 89-0891] p 471 A89-35209

Development of an alternating flat to tubular Kevlar parachute tape [AIAA PAPER 89-0910] p 462 A89-35223

New lightweight parachute fabrics of Kevlar aramid fiber [AIAA PAPER 89-0911] p 489 A89-35224

A critical review of the state of the art for measurement of stress in parachute fabrics [AIAA PAPER 89-0925] p 489 A89-35235

Notes on a theoretical parachute opening force analysis applied to a general trajectory [AD-A201050] p 302 N89-17582

PARACHUTES

Performance prediction analysis for fully deployed parachute canopies p 155 A89-20314

New solution method for steady-state canopy structural loads p 155 A89-20321

Determining and accounting for a parachute virtual mass p 460 A89-34889

Modeling of parachute opening - An experimental investigation p 460 A89-34891

AIAA Aerodynamic Decelerator Systems Technology Conference, 10th, Cocoa Beach, FL, Apr. 18-20, 1989, Technical Papers p 461 A89-35201

Aerial delivery of personnel in ground proximity [AIAA PAPER 89-0887] p 461 A89-35207

A control canopy release method for improved opening of clustered parachutes [AIAA PAPER 89-0892] p 461 A89-35210

High altitude parachute and its military applications [AIAA PAPER 89-0893] p 461 A89-35211

The development of the panel stabilized slotted-square parachute [AIAA PAPER 89-0894] p 461 A89-35212

A revision of the added mass concept as applied to parachute motion [AIAA PAPER 89-0895] p 461 A89-35213

A preliminary characterization of parachute wake recontact [AIAA PAPER 89-0897] p 447 A89-35214

- Flow visualization studies of wake behind axisymmetric bluff bodies including parachute canopy models
[AIAA PAPER 89-0898] p 447 A89-35215
- Prediction of parachute collapse due to wake recontact
[AIAA PAPER 89-0901] p 447 A89-35218

SUBJECT INDEX

A historical review of U.S. aircraft statistics suggesting the need for automatic flight path recovery systems p 223 A89-21375

Causal probability model for transoceanic track separations with applications to automatic dependent surveillance p 308 A89-26735

Aircraft accident report: Trans-Colorado Airlines, Inc., Flight 2286, Fairchild Metro 3, SA227 AC, N68TC Bayfield, Colorado, January 19, 1988 p 524 N89-22593

PILOT INDUCED OSCILLATION

Loop separation parameter - A new metric for landing flying qualities p 113 A89-16158

Evaluation of a technique for predicting longitudinal pilot-induced oscillations [AIAA PAPER 89-3517] p 847 A89-52609

PILOT PERFORMANCE

TEAS - An AI based threat response recommendation system [SAE PAPER 871804] p 57 A89-10589

The NOE pilot's associate - A job description p 39 A89-12402

Open loop optimal control of multi-engine aircraft after one engine failure p 111 A89-13530

Cooperative synthesis of control and display augmentation p 262 A89-22508

Simulation tests of the pilot-helicopter system in overextreme conditions p 243 A89-23326

Do pilots let aircraft operations schedules influence enroute turbulence avoidance procedures? [AIAA PAPER 89-0743] p 303 A89-25558

Problems of ensuring civil-aircraft fire safety p 304 A89-27249

Computer-generated map display for the pilot/vehicle interface [SAE PAPER 881440] p 319 A89-28214

Notar reduces pilot workload, improves response in OH-6A p 385 A89-29348

General aviation p 437 A89-34448

Safety philosophies in air transport p 597 A89-39859

A pilot's view of intelligent systems p 688 A89-45294

Man-in-the-loop simulation as a design tool [AIAA PAPER 89-3284] p 787 A89-48404

Cooper-Harper pilot rating variability [AIAA PAPER 89-3358] p 780 A89-49062

A simulator investigation of the use of digital data link for pilot/ATC communications in a single pilot operation [NASA-TP-2837] p 90 N89-11726

Application of linearized Kalman filter-smoother to aircraft trajectory estimation [AD-A194382] p 136 N89-12231

Pilot factors guidelines for the operational inspection of navigation systems [NASA-CR-181844] p 91 N89-12557

Voice recognition and artificial intelligence in an air traffic control environment [AD-A197219] p 81 N89-12559

Autonomous RPRV navigation, guidance and control [NASA-CR-179425] p 161 N89-14228

A piloted evaluation of an oblique-wing research aircraft motion simulation with decoupling control laws [NASA-TP-2874] p 248 N89-15930

Piloted-simulation evaluation of escape guidance for microburst wind shear encounters [NASA-TP-2886] p 321 N89-16820

Measures of merit for advanced military avionics: A user's perspective on software utility p 398 N89-18447

Chemical warfare protection for the cockpit of future aircraft p 396 N89-19859

Aircraft accident report: Continental Airlines, Inc., Flight 1713, McDonnell Douglas DC-9-14, N626TX, Stapleton International Airport, Denver, Colorado, November 15, 1987 [PB88-910411] p 464 N89-20112

AH-1S communication switch integration program [NASA-TM-101053] p 466 N89-20978

Response equivocation analysis for the smart stick controller [AD-A203146] p 475 N89-20989

Model-based analysis and cooperative synthesis of control and display augmentation for piloted flight vehicles p 540 N89-22610

AGARD highlights 88/2 p 566 N89-23403

Advanced piloted aircraft flight control system design methodology. Volume 1: Knowledge base [NASA-CR-181726-VOL-1] p 690 N89-26013

Advanced piloted aircraft flight control system design methodology. Volume 2: The FCX flight control design expert system [NASA-CR-181726-VOL-2] p 691 N89-26014

Applications of fuzzy sets to rule-based expert system development p 712 N89-26606

F-15E EADI (Electronic Attitude Director Indicator) evaluation: A comparison of three formats [AD-A206809] p 769 N89-26846

Design considerations of manipulator and feel system characteristics in roll tracking [NASA-CR-4111] p 783 N89-26860

PILOT TRAINING

Aerospace technology - Windshear FAA: Boeing Windshear Training Aid program [SAE PAPER 872441] p 19 A89-10655

Enroute turbulence avoidance procedures [AIAA PAPER 89-0739] p 303 A89-25558

Photo-based three dimensional graphics models for multi-sensor simulation --- terrain data bases for flight simulator p 348 A89-27787

Cockpit-canopy fragmentation system for immediate pilot rescue p 606 A89-43115

Economic aspects of simulation in air transportation p 691 A89-45047

Need-based evaluation of simulator force and motion cuing devices [AIAA PAPER 89-3272] p 785 A89-48386

An experimenter operator station for helicopter flight simulator research and training [AIAA PAPER 89-3304] p 788 A89-48412

Full field of view dome display system [AIAA PAPER 89-3318] p 788 A89-48425

Novoview LCV - Balancing performance and cost for a 'low cost' visual system [AIAA PAPER 89-3321] p 789 A89-48430

Constraints and issues in application of R&M 2000 - Lessons learned [SAE PAPER 89-2103] p 801 A89-49481

Hypersonic aerodynamics at the Ohio State University [SAE PAPER 881519] p 718 A89-51365

Hypersonic aerodynamics at North Carolina State University [SAE PAPER 881524] p 718 A89-51369

Piloted simulation of a ground-based time-control concept for air traffic control [AIAA PAPER 89-3625] p 829 A89-52700

Aircraft accident/incident summary report, Travis Air Force Base, California, 8 April 1987 [PB88-910414] p 306 N89-16768

PILOTLESS AIRCRAFT

Digital autopilots for rotary winged unmanned aerial vehicles p 39 A89-12417

The U.S. Navy unmanned air vehicle program p 437 A89-33555

Flight test of XRAE-1 to establish aerodynamic data p 468 A89-33582

The development of a preliminary sizing method for unmanned air vehicles p 468 A89-33584

The computer controlled system for multi-drone performing formation flight in a same aerial zone p 481 A89-33586

Evolution of a small turbine engine family for unmanned aerial vehicles p 477 A89-33570

Low cost avionics system for UMA --- unmanned aircraft p 475 A89-33571

Investigation of the effects of payload loads and airbrakes on the longitudinal stability of the X-RAE 2 unmanned aircraft in the 24 foot wind-tunnel [RAE-TM-AERO-2124] p 103 N89-11744

RPV (Remote Piloted Vehicle) applications in the US Navy [AD-A202151] p 398 N89-19293

Preliminary design of a modular unmanned research vehicle. Volume 2: Subsystem technical development design study [AD-A205878] p 607 N89-23454

Flight test method development for a quarter-scale aircraft with minimum instrumentation [AD-A207896] p 835 N89-29337

PILOTS (PERSONNEL)

Current military/government applications for speech recognition [SAE PAPER 871750] p 23 A89-10580

The design eye reference point --- for determining geometric entities defining cockpit layouts [SAE PAPER 871783] p 31 A89-10582

Should technology assist or replace the pilot? [SAE PAPER 880774] p 57 A89-10593

Pilot ejection from a pronated flying position [AIAA PAPER 89-0885] p 471 A89-35205

Pronated escape system (PRESS) p 755 A89-48659

PIPE FLOW

A design method of 'wigglesnap' film-cooling construction of flame tube p 50 A89-11039

PIPERIDINE

Supersonic jet studies of fluorene clustered with water, ammonia and piperidine [AD-A209562] p 860 N89-29497

PITCHING MOMENTS

PIPES (TUBES)

Buckling characteristics of hypersonic aircraft wing tubular panels [NASA-TM-87756] p 193 N89-13816

Aerodynamic drag of cylindrical vehicles moving concentrically within long tubes [AD-A197947] p 219 N89-15076

PISTON ENGINES

Analysis of performance measurements for a propeller-driven aircraft. III - Power plant characteristics p 99 A89-18076

Condor for high altitudes p 269 A89-26674

Engines for Mini-RPV XM-1A [AD-A198336] p 178 N89-14236

Advanced ceramics: A critical assessment of wear and lubrication [PB89-188569] p 797 N89-27005

PITCH (INCLINATION)

On the compensation of the phugoid mode induced by initial conditions and windshears p 68 A89-13545

Nonlinear aerodynamics of delta wings in combined pitch and roll p 73 A89-13688

Toward dynamic separation without dynamic stall p 214 A89-22805

The separated flow field on a slender wing undergoing transient pitching motions [AIAA PAPER 89-0194] p 278 A89-25169

Nonlinear aerodynamics of a delta wing in combined pitch and roll p 362 A89-29169

Unconventional helicopter tail rotor offers forward thrust advantage p 385 A89-29349

Large amplitude oscillation effects on cone pitch stability in viscous hypersonic flow p 367 A89-30537

Parametric study of a simultaneous pitch/yaw thrust vectoring single expansion ramp nozzle [AIAA PAPER 89-2812] p 682 A89-47098

Nonadiabatic hypersonic boundary layers with nonsimilar pressure gradients [AIAA PAPER 89-2181] p 721 N89-47643

Design of a new contraction for the ARL low speed wind tunnel [ARL-AERO-R-171] p 116 N89-11755

Aerodynamic drag of ridge arrays in adverse pressure gradients p 219 N89-15075

Stability of compressible boundary layers p 456 N89-20953

Studies of the structure of attached and separated regions of viscous/inviscid interaction and the effects of combined surface roughness and blowing in high Reynolds number hypersonic flows [AD-A204364] p 518 N89-21774

Control of separated flow past a cylinder using tangential wall jet blowing [NASA-CR-185918] p 825 N89-29326

PRESSURE MEASUREMENT

Experimental study of rotating stall in single-stage axial compressor p 8 N89-11059

The application and improvement of 'wall pressure signature' correction method for the tunnel wall interference p 71 N89-13630

The use of sweep-frequency excitation for unsteady pressure measurement --- in aerodynamics p 147 N89-18940

An investigation of wall interference correction to the pressure measurement in low speed wind tunnel with solid walls p 183 N89-19808

Measurements of wall pressure and heat transfer rate in the interaction regions of shock waves and turbulent boundary layers induced by blunt fins p 218 N89-24319

Heat transfer and pressure comparisons between computation and wind tunnel for a research hypersonic aircraft [AIAA PAPER 89-0029] p 272 N89-25025

Unsteady blade pressure measurements on a model counterrotation propeller [AIAA PAPER 89-1144] p 631 N89-40175

Transonic unsteady pressure measurements on a supercritical airfoil at high Reynolds numbers p 578 N89-42010

Measurement and computation of the velocity field of a cylinder in the wake of a rotor in forward flight [AIAA PAPER 89-1844] p 583 N89-42072

Application of modern measurement methods to turbomachines p 773 N89-49020

Pressure-time history of pylon wake signature on a pusher propeller in flight [AIAA PAPER 89-2052] p 812 N89-49425

Experimental investigation of transonic flow on wing profiles in wind tunnels of reduced measurement section [ETN-88-93233] p 85 N89-11720

Porous plug for reducing orifice induced pressure error in airfoils [NASA-CASE-LAR-13569-1] p 129 N89-12841

Internal pressure measurements for a liquid payload at low Reynolds numbers [AD-A197438] p 191 N89-13727

The international vortex flow experiment p 422 N89-18619

Experimental transonic steady state and unsteady pressure measurements on a supercritical wing during flutter and forced discrete frequency oscillations p 377 N89-19261

Unsteady blade pressure measurements on a model counterrotation propeller [NASA-TM-102002] p 504 N89-20779

Ejector effects on a supersonic nozzle at low altitude and Mach number [AD-A206049] p 594 N89-23427

Pressure measurement technique of WT-WK --- wind tunnels [DFVLR-MITT-88-11] p 693 N89-25243

PRESSURE OSCILLATIONS

Space-time correlations of wall pressure fluctuations in shock-induced separated turbulent flows p 74 N89-14039

Dynamic pressure loads associated with twin supersonic plume resonance p 107 N89-16111

Effects of inlet pressure fluctuations on axial flow compressors p 255 N89-22287

Low frequency pressure oscillations in a model ramjet combustor - The nature of frequency selection [AIAA PAPER 89-0623] p 323 N89-25493

Evidence of a strange attractor in ramjet combustion [AIAA PAPER 89-0624] p 323 N89-25494

Acoustic-vortex interactions and low-frequency oscillations in axisymmetric combustors --- of ramjet engines p 325 N89-28336

Fluctuating pressures on wing surfaces in the slipstream of a single-rotor propfan [AIAA PAPER 89-1058] p 564 N89-36218

Pressure fluctuations on an oscillating trailing edge p 645 N89-45458

Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 4: Plots of time histories of pressures and overall loads [AD-A198682] p 152 N89-13402

Terminal shock response in ramjet inlets to abrupt downstream perturbations [AD-A209788] p 748 N89-27640

PRESSURE PULSES

A study on upstream moving pressure waves induced by vortex separation p 65 N89-12915

Characteristics of the spectra of pressure fluctuations in front of a step in supersonic transition flow p 741 N89-50937

PRESSURE RATIO

Advanced core technology: Key to subsonic propulsion benefits [NASA-TM-101420] p 178 N89-14237

Static internal performance of convergent single-expansion-ramp nozzles with various combinations of internal geometric parameters [NASA-TM-4112] p 517 N89-21768

PRESSURE REDUCTION

Total pressure loss in supersonic nozzle flows with condensation - Numerical analyses p 79 N89-16352

An experimental study and prediction of a two-phase pressure drop in microgravity [AIAA PAPER 89-0074] p 343 N89-25085

An experimental research on mixture pressure loss in combustor p 675 N89-45556

Coolant passage heat transfer with rotation p 351 N89-17314

PRESSURE REGULATORS

Modern digital pressure control system [AIAA PAPER 88-3948] p 172 N89-18119

A top-down SFP analysis of a complex system --- single failure points p 701 N89-46472

PRESSURE SENSORS

Optimization of a complex baroinertial computer of aircraft's vertical velocity and flight height p 242 N89-21554

Miniaturized compact water-cooled pitot-pressure probe for flow-field surveys in hypersonic wind tunnels p 348 N89-27659

Unsteady blade pressure measurements on a model counterrotation propeller [AIAA PAPER 89-1144] p 631 N89-40175

Porous plug for reducing orifice induced pressure error in airfoils [NASA-CASE-LAR-13569-1] p 129 N89-12841

Theoretical derivation and calibration technique of a hemispherical-tipped, five-hole probe [NASA-TM-4047] p 151 N89-13396

Shock tube investigation of dynamic response of pressure transducers for validation of rotor performance measurements [NASA-CR-182673] p 220 N89-15082

Unsteady blade pressure measurements on a model counterrotation propeller [NASA-TM-102002] p 504 N89-20779

Supersonic particle probes: Measurement of internal wall losses [AD-A205863] p 521 N89-22589

PRESSURE SWITCHES

Power efficient hydraulic systems. Volume 2: Hardware demonstration phase [AD-A203900] p 473 N89-20128

PRESSURE VESSELS

Fracture of pressurized composite cylinders with a high strain-to-failure matrix system p 551 N89-36319

PRESSURIZED CABINS

- Analyses of the transmission of sound into the passenger compartment of a propeller aircraft using the finite element method p 95 A89-13635
Pressure cabins of elliptic cross section p 100 A89-16322

PRESSURIZING

- Wind tunnel pressurization and recovery system [NASA-CR-184591] p 408 A89-18499

PRINTED CIRCUITS

- CAD/CAM - Managerial challenges and research issues p 879 A89-54908

PROBABILITY DENSITY FUNCTIONS

- Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 5: Power spectral density plots of the overall loads for harmonic oscillation and the response of overall loads to (1-COS) inputs [AD-A198683] p 152 A89-13403
Statistical properties of atmospheric turbulence relevant to the calculation of airplane loads [NLR-TR-88013-U] p 246 A89-15120
Matching Power Spectra Density (PSD)-design load --- aircraft structures [NLR-MP-87059-U] p 472 A89-20126

PROBABILITY DISTRIBUTION FUNCTIONS

- A methodology for determining the survivability of fixed-wing aircraft against small arms [AD-A205730] p 607 A89-23455

PROBABILITY THEORY

- Probabilistic constitutive relationships for material strength degradation models [AIAA PAPER 89-1368] p 419 A89-30843
Probabilistic analysis of aircraft structure p 665 A89-46470
Time dependent probabilistic failure of coated components [AIAA PAPER 89-2900] p 704 A89-47163
Probabilistic methods for estimating the remaining life of structural elements of operating aircraft gas turbine engines p 839 A89-52832
Use of Markov probability and reliability model generation methods in the analysis of reliability of a fault tolerant, hardware and software based system with flexible repair policies p 421 A89-18477
Icing considerations for HALE (High Altitude, Long Endurance) aircraft [AD-A202584] p 464 A89-20975
Composite failure criterion: Probabilistic formulation and geometric interpretation [AD-A205275] p 548 A89-21851
Probabilistic damage tolerance methods for metallic aerospace structures p 672 A89-25237
Composite material repair and reliability [AD-A209150] p 859 A89-28574

PROBLEM SOLVING

- Integrating causal reasoning at different levels of abstraction --- in problem-solving system functioning as pilot assistant in commercial air transport emergencies p 355 A89-27609
Numerical optimisation techniques applied to problems in continuum mechanics p 139 A89-12471
Accuracy problems in wind tunnels during transport aircraft development p 338 A89-16877
Avionics expert systems p 399 A89-18469
R and M (Reliability and Maintainability) quality team concept and C-17 design at Douglas Aircraft Company: An R and M 2000 initiative case study [AD-A201574] p 361 A89-19228
Minimax and maximax optimal control problems with applications in aerospace engineering p 406 A89-19311
Reliability and performance evaluation of systems containing embedded rule-based expert systems [NASA-CR-181769] p 500 A89-20683
Hypersonic drone design: A multidisciplinary experience [NASA-CR-184740] p 473 A89-20981
Composite Blade Structural Analyzer (COBSTRAN) demonstration manual [NASA-TM-101957] p 622 A89-24459
Review on turbomachinery blading design problems p 777 A89-27662
- PROCESS CONTROL (INDUSTRY)**
Manufacturing - The cutting edge p 61 A89-12951
In situ composite cure monitoring using infrared transmitting optical fibers p 415 A89-29977
Machine vision for control of gas tungsten arc welding p 700 A89-45950
The relationship between manufacturing technology and design --- aircraft engines [PNR90537] p 403 A89-19307
New metallic materials for gas turbines p 549 A89-22660

PROCUREMENT

- Aircraft airframe cost estimating relationships: All mission types [AD-A200262] p 269 A89-16719
Aircraft airframe cost estimating relationships: Fighters [AD-A200263] p 270 A89-16720
Aircraft airframe cost estimating relationships: Bombers and transports [AD-A200264] p 270 A89-16721
Estimating and explaining the production cost of high-technology systems: The case of military aircraft [AD-A208391] p 719 A89-26809

PRODUCT DEVELOPMENT

- Air-to-air combat helicopter development p 165 A89-18929
BK 117 - Surviving in a desperate market place --- helicopter product development p 207 A89-23349
McDonnell aircraft composites manufacturing - Experiencing growth p 414 A89-29469
New wings, new ways p 471 A89-35825
Superplastic forming - A new production technology p 624 A89-41590
Aeronautical research in the European future p 638 A89-45037
European gas turbine engines p 675 A89-45042
Airbus - The new families p 662 A89-45043
Project Genesis - The development of a low cost simulator p 791 A89-48836
The design and development of transonic multistage compressors p 329 A89-16834
Assessment, development, and application of combustor aerothermal models p 479 A89-20138
Development and testing of critical components for technological preparation of an Airbus-CFRP-fuselage, phase 2 [MBB-UT-129/87] p 531 A89-22600
FAA rotorcraft research, engineering and development bibliography, 1962-1988: Supplement [AD-A207162] p 673 A89-26000

PRODUCTION COSTS

- Strategic bombers: B-1B cost and performance remain uncertain [AD-A206751] p 673 A89-25998
Estimating and explaining the production cost of high-technology systems: The case of military aircraft [AD-A208391] p 719 A89-26809
Superplastic forming of aluminum, task C [AD-A207282] p 797 A89-26962

PRODUCTION ENGINEERING

- Genesis of a flexible turning center p 189 A89-18894
Automated wire preparation system p 189 A89-18895
The combination of simulation and response methodology and its application in an aggregate production plan p 190 A89-19806
Incorporating five nations' operational requirements into a single aircraft: The F-16 multinational fighter program viewed from the operational side [AD-A202552] p 474 A89-20986

PRODUCTION MANAGEMENT

- Control of on-board software p 398 A89-18452

PROGRAM VERIFICATION (COMPUTERS)

- Validation of in-house and acquired software at Aerospatiale p 431 A89-31905
Verification of aerodrome forecasts p 870 A89-54824
Analysis of verification parameters for non-convective Sigmets --- significant meteorology to airmen p 870 A89-54825
Verification and validation of flight critical software p 432 A89-18460
The formal verification of safety-critical assembly code [PNR90524] p 401 A89-18495
Validation of Computational Fluid Dynamics. Volume 1: Symposium papers and round table discussion [AGARD-CP-437-VOL-1] p 422 A89-18610
Status of CFD validation on the vortex flow experiment p 422 A89-18620
The DFVLR-F5 wing experiment: Towards the validation of the numerical simulation of transonic viscous wing flows p 373 A89-18623
CFD validation experiments for internal flows p 423 A89-18635
Computational techniques and validation of 3D viscous/turbulent codes for internal flows p 423 A89-18638
Efforts toward the validation of a computational fluid dynamics code for analysis of internal aerodynamics p 423 A89-18643
A comparative study and validation of upwind and central-difference Navier-Stokes codes for high-speed flows p 424 A89-18647
Transonics and fighter aircraft: Challenges and opportunities for CFD p 454 A89-20932

PARC code validation for propulsion flows

[AD-A204293] p 557 A89-22066

PROGRAMMING LANGUAGES

- Use of the GALA and PALAS tools to enhance the development of avionics software [AIAA PAPER 88-3943] p 199 A89-18115
In search of effective diversity - A six-language study of fault-tolerant flight control software p 710 A89-44423
Development of a microcomputer based integrated design system for high altitude long endurance aircraft p 668 A89-25159

PROJECT MANAGEMENT

- The CFM56 venture [AIAA PAPER 89-2038] p 774 A89-49418
SST/Concorde - Lessons for hypersonic programs p 877 A89-54337
The Federal Aviation Administration's Low Level Windshear Alert System - A project management perspective p 871 A89-54854
Helicopter roll control effectiveness criteria program summary [NASA-CR-177477] p 39 A89-10046

PROJECT PLANNING

- Thoroughgoing DV-support from project planning to factory control - Practical example from near-development aircraft design [MBB-UD-526-88-PUB] p 568 A89-42928
SST/Concorde - Lessons for hypersonic programs p 877 A89-54337

PROJECTILE CRATERING

- Impact cratering in low-gravity environments - Results of reconnaissance experimentation on the NASA KC-135A reduced-gravity aircraft p 544 A89-36543

PROJECTILES

- The ram accelerator and its applications - A new approach for reaching ultrahigh velocities p 63 A89-12884
High spin effect on the dynamics of a high l/d finned projectile from free-flight tests p 405 A89-31451
A self-adaptive computational method for transonic turbulent flow past a real projectile p 443 A89-34730
Numerical computations of transonic critical aerodynamic behavior [AD-A202412] p 379 A89-19277

PROJECTORS

- A universal projector for simulators displays [AIAA PAPER 89-3317] p 788 A89-48426
Display characteristics of example light-valve projectors [AD-A209580] p 877 A89-29193

PROLATE SPHEROIDS

- Vortical wakes over a prolate spheroid p 150 A89-20181
Drag measurements on a modified prolate spheroid using a magnetic suspension and balance system [AIAA PAPER 89-0648] p 335 A89-25512
Evolution of axisymmetric wakes from attached and separated flows p 818 A89-52945
The birth of open separation on a prolate spheroid [AD-A201350] p 426 A89-19509

PROLOG (PROGRAMMING LANGUAGE)

- A knowledge-based en route monitor for air traffic control p 660 A89-45065

PRONE POSITION

- Pilot ejection from a pronated flying position [AIAA PAPER 89-0885] p 471 A89-35205
Pronated escape system (PRESS) p 755 A89-48659

PROP-FAN TECHNOLOGY

- Results of acoustic tests of a prop-fan model p 59 A89-10112
Propfan design by propeller-nacelle interaction analysis p 36 A89-11055
Return of the turboprops p 104 A89-12953
Euler analysis of a swirl recovery vane design for use with an advanced single-rotation propfan [AIAA PAPER 88-3152] p 144 A89-17940
Experimental investigation of propfan aeroelastic response in off-axis flow with mistuning [AIAA PAPER 88-3153] p 175 A89-17941
An experimental and theoretical investigation of the propagation of sound waves through a turbulent boundary layer p 266 A89-22785
MTU propfan project CRISP for performance analysis in DFVLR wind tunnels --- Counter Rotating Integrated Shrouded Propfan p 240 A89-23807
Prop-fan airflow icing characteristics [AIAA PAPER 89-0753] p 303 A89-25561
Prop-fan structural results from PTA tests [SAE PAPER 881418] p 324 A89-28202
Measurement of model propfan noise in high speed wind tunnel [ONERA, TP NO. 1988-100] p 434 A89-29252

Near-field noise of a pusher propeller [AIAA PAPER 89-1096] p 502 A89-33736

The effect of the wind tunnel wall boundary layer on the acoustic testing of propellers [AIAA PAPER 89-1097] p 503 A89-33737

Propeller modelling effects on interior noise in cylindrical cavities with application to active control [AIAA PAPER 89-1123] p 489 A89-33757

Transient dynamics of aircraft propellers during touch-down impact p 470 A89-34509

Numerical solutions for the flowfield around a counter-rotating propeller p 445 A89-34887

Prediction of counter-rotation propeller noise [AIAA PAPER 89-1141] p 564 A89-36221

Asymptotic analysis of the transonic region of a high-speed propeller [AIAA PAPER 89-1077] p 565 A89-37852

Comparison of propeller cruise noise data taken in the NASA Lewis 8- by 6-foot wind tunnel with other tunnel and flight data [AIAA PAPER 89-1059] p 631 A89-40472

A numerical study of a wing and propeller in mutual interference [AIAA PAPER 89-2215] p 723 A89-47672

Numerical and experimental investigation of isolated propeller wakes in axial flight p 737 A89-50063

The effect of front-to-rear propeller spacing on the interaction noise at cruise conditions of a model counterrotation propeller having a reduced diameter aft propeller [NASA-TM-101329] p 60 N89-10603

Experimental aerodynamic performance of advanced 40 deg-swept 10-blade propeller model at Mach 0.8 to 0.85 [NASA-TM-88969] p 17 N89-10865

Flow-field survey of an empennage wake interacting with a pusher propeller [NASA-TM-101003] p 62 N89-11694

Aerodynamic optimization by simultaneously updating flow variables and design parameters with application to advanced propeller designs [NASA-CR-182181] p 109 N89-11750

Laser velocimeter measurements of the flowfield generated by an advanced counterrotating propeller [NASA-TM-101437] p 153 N89-13409

A potential flow solution on marine propeller and axial rotating fan [AD-A198781] p 191 N89-13735

High lift, low pitching moment airfoils [NASA-CASE-LAR-13215-1] p 154 N89-14224

Parametric studies of advanced turboprops [NASA-TM-101389] p 195 N89-14465

Users' manual for the Langley high speed propeller noise prediction program (DFP-ATP) [NASA-CR-4208] p 204 N89-14820

Measured far-field flight noise of a counterrotation turboprop at cruise conditions [NASA-TM-101383] p 267 N89-15686

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 1: Theory and application [NASA-CR-4199-VOL-1] p 222 N89-15896

An analysis for high speed propeller-nacelle aerodynamic performance prediction. Volume 2: User's manual [NASA-CR-4199-VOL-2] p 223 N89-15897

NASA advanced propeller research [NASA-TM-101361] p 241 N89-15913

Lift and longitudinal forces on propeller/nacelle/wing/flap systems [ESDU-88031] p 298 N89-16736

Wind tunnel validation of aerodynamic field calculation codes for rotors and propellers in various flight conditions p 423 N89-18639

Validation of a multi-block Euler flow solver with propeller-slipstream flows p 373 N89-18649

Comparison of propeller cruise noise data taken in the NASA Lewis 8- by 6-foot wind tunnel with other tunnel and flight data [NASA-TM-101978] p 505 N89-21628

High speed turboprop aeroacoustic study (single rotation). Volume 1: Model development [NASA-CR-182257-VOL-1] p 633 N89-24139

Cruise noise of the SR-2 propeller model in a wind tunnel [NASA-TM-101480] p 633 N89-24886

A lifting surface method for the calculation of steady and unsteady, incompressible propeller aerodynamics [DFVLR-FB-89-04] p 657 N89-25972

PROPORTIONAL CONTROL

Multivariable control law design for the Control Reconfigurable Combat Aircraft (CRCA) [AD-A202697] p 540 N89-21803

PROPULSION

Variable geometry control of reacting shear layers [AIAA PAPER 89-0978] p 411 A89-30492

Coupling factor method for studying elastic motion of flight vehicles p 544 A89-37004

Fiber optic control system integration [NASA-CR-179568] p 140 N89-13256

Advanced computational techniques for hypersonic propulsion [NASA-TM-102005] p 627 N89-23809

PROPULSION SYSTEM CONFIGURATIONS

Study of the engine influence on wings with modern high-bypass propulsion concepts [DGLR PAPER 87-063] p 5 A89-10510

Aspects of increasing economy using future low-power aircraft propulsion systems [DGLR PAPER 87-100] p 33 A89-10528

From single rotating propfan to counter rotating ducted propfan - Propeller/fan characteristics p 105 A89-13558

High speed airbreathing propulsion [AIAA PAPER 88-3069] p 107 A89-16479

Advanced transmission studies p 189 A89-18906

Development of ram propulsion for flight vehicles [DGLR PAPER 87-101] p 178 A89-20240

From Sir Frank Whittle to the year 2000 - What is new in propulsion? p 241 A89-23872

Facility requirements for hypersonic propulsion system testing [AIAA PAPER 89-0184] p 335 A89-25159

Thermodynamics and wave processes in high Mach number propulsive ducts [AIAA PAPER 89-0261] p 278 A89-25219

Propulsion systems for hypersonic vehicles p 400 A89-29441

National Aerospace Plane technology development p 359 A89-29442

Advanced propulsion systems for large subsonic transports [AIAA PAPER 89-2477] p 677 A89-46861

Testing of the 578-DX propfan propulsion system [AIAA PAPER 89-2581] p 679 A89-46938

Integration of scramjets with waverider configurations [AIAA PAPER 89-2675] p 695 A89-47005

Numerical investigation of thrust-reversing nozzle using an implicit TVD scheme [AIAA PAPER 89-2899] p 683 A89-47162

Integrated flight/propulsion control study for STOVL applications [AIAA PAPER 89-2908] p 688 A89-47166

A static investigation of several STOVL exhaust system concepts [AIAA PAPER 89-2928] p 684 A89-47180

Average-passage simulation of counter-rotating propfan propulsion systems as applied to cruise missiles [AIAA PAPER 89-2943] p 651 A89-47187

Trends in military aircraft propulsion p 772 A89-48277

Split torque helicopter transmissions with widely separated engines p 772 A89-48282

One-dimensional modeling of hypersonic flight propulsion engines [AIAA PAPER 89-2026] p 774 A89-49412

Installation features of advanced, very high bypass turbofan propulsion systems [AIAA PAPER 89-2141] p 774 A89-49482

NASP aerodynamics [AIAA PAPER 89-5013] p 742 A89-51338

QUANTITATIVE ANALYSIS

- Infrared thermography - A quantitative tool for heat study
[ONERA, TP NO. 1989-3] p 553 A89-37627

QUATERNARY ALLOYS

- Influence of alloying elements on the oxidation behavior of NbAl₃
[NASA-TM-101398] p 120 N89-12717

QUENCHING (COOLING)

- The application of process modelling to heat treatment of superalloys
p 252 N89-15281
- Quench sensitivity of airframe aluminum alloys
[NLR-MP-88003-U] p 489 N89-20231
- Quench sensitivity of airframe aluminium alloys
[PB89-146039] p 621 N89-23656

R

RADAR

- A critical examination of sensor fusion
p 768 A89-50302
- Aircraft position report demonstration plan
[AD-A196564] p 90 N89-11727

- Analysis of temperature and velocity microturbulence parameters from aircraft data and relationship to atmospheric refractive index structure
[AD-A196542] p 196 N89-13854

RADAR ANTENNAS

- Active arrays replacing active radomes
p 226 A89-24700
- Some new ideas in radar antenna technology
p 347 A89-26542
- Evaluation of a Kalman filter for SAR motion compensation
p 347 A89-26721
- Advanced technology ultra reliable radar (URR)
p 599 A89-42652
- Future terrain following radars
p 599 A89-42655
- Adaptive optimum attitude extrapolation for precise antenna pointing control
p 610 A89-42656
- A family of radars for advanced systems
p 799 A89-48304

RADAR APPROACH CONTROL

- An analytical tool to define criteria for helicopter airborne radar approach procedures to offshore installations
p 225 A89-23358
- Precision approach radars Twenthe and Volkel (Netherlands). Multipath propagation problems
[FEL-1988-15] p 193 N89-14372
- Design of automated system for management of arrival traffic
[NASA-TM-102201] p 598 N89-24290

RADAR BEACONS

- Functional requirements of the Communications Interface Driver (CID)
[DOT/FAA/CT-TN87/41-REV] p 707 N89-26121
- Mode S performance test plan
[DOT/FAA/CT-TN89/24] p 707 N89-26127

RADAR CROSS SECTIONS

- Fractal features of sea surface manifested in microwave remote sensing signatures
p 258 A89-24872
- Near-field scattering measurements for determining complex target RCS
p 532 A89-39587
- A CFD-based finite-volume procedure for computational electromagnetics - Interdisciplinary applications of CFD methods
[AIAA PAPER 89-1987] p 633 A89-41830
- Analog-to-digital converter effects on airborne radar performance
p 599 A89-42661
- Experimental localized radar cross sections of aircraft
p 673 A89-45105
- Review of FD-TD numerical modeling of electromagnetic wave scattering and radar cross section
p 673 A89-45107
- Radar cross section of arbitrarily shaped bodies of revolution
p 674 A89-45111
- The analysis and measurements of radar cross section (RCS) of some wing structure models
p 674 A89-46298
- Electromagnetic properties of ice coated surfaces
[NASA-CR-184780] p 495 N89-20355
- Electromagnetic scattering from a structured slab comprised of periodically placed resistive cards
[AD-A210145] p 806 N89-27953

RADAR DATA

- Digital recording of radar data in an aircraft
[PB88-209507] p 51 N89-10212

RADAR DETECTION

- Combined numerical and symbolic processing for airborne surveillance
[AIAA PAPER 88-3985] p 157 A89-18143
- Wobbly goblin - Not perfect but first --- F-117A combat aircraft
p 233 A89-24699
- Analog-to-digital converter effects on airborne radar performance
p 599 A89-42661
- Stealth technology for reducing aircraft recognition
p 673 A89-44645
- Camouflage cap allows aircraft to disappear
p 838 A89-54482
- Remote detection of aircraft icing hazards by Doppler radar
p 826 A89-54805
- Intracloud lightning as a precursor to thunderstorm microbursts
p 56 N89-10490
- Electromagnetic properties of ice coated surfaces
[NASA-CR-184780] p 495 N89-20355

RADAR ECHOES

- Electromagnetic properties of ice coated surfaces
[NASA-CR-184780] p 495 N89-20355

RADAR EQUIPMENT

- The operation of modern air-space surveillance radars
p 51 A89-12151
- Optimization of algorithms for data processing in radar altimeters with electronic stabilization of the radiation pattern
p 174 A89-18401
- LIRAS - A proposal for an airport traffic safety system
p 308 A89-28293
- The US airborne radar scene
p 567 A89-40856
- Airborne pulsed Doppler radar --- Book
p 750 A89-48895

RADAR IMAGERY

- Evaluation of a Kalman filter for SAR motion compensation
p 347 A89-26721
- Avionics expert systems
p 399 N89-18469

RADAR MAPS

- Phase-only filters with improved signal to noise ratio
p 356 A89-28382
- Airborne rain mapping radar
p 837 A89-53313

RADAR MEASUREMENT

- Syntactic classification of radar measurements of commercial aircraft
p 800 A89-42680
- An airborne U-band solid state pulse-compression radar
p 787 A89-47607
- Ground based weather radar for aviation
p 871 A89-54856

RADAR NAVIGATION

- A Kalman filter for an integrated Doppler/GPS navigation system
p 308 A89-26740

RADAR RECEIVERS

- Airborne MTI via digital filtering
p 397 A89-29428
- A family of radars for advanced systems
p 799 A89-48304

RADAR RESOLUTION

- Effect of phase fluctuations and additive noise on the characteristics of an SAR
p 254 A89-21480

RADAR SCATTERING

- Near-field scattering measurements for determining complex target RCS
p 532 A89-39587
- A 35 GHz helicopter-borne polarimeter radar
p 134 N89-13038

RADAR SIGNATURES

- Camouflage cap allows aircraft to disappear
p 838 A89-54482
- Techniques for the detection of microburst events using airport surveillance radars - Cross-spectral velocity estimation
p 872 A89-54868
- The importance of aircraft performance and signature reduction upon combat survivability
[AD-A202106] p 396 N89-19292
- Analysis of Doppler radar windshear data
[NASA-CR-181762] p 464 N89-20111

RADAR TARGETS

- Near-field scattering measurements for determining complex target RCS
p 532 A89-39587
- Experimental localized radar cross sections of aircraft
p 673 A89-45105
- The analysis and measurements of radar cross section (RCS) of some wing structure models
p 674 A89-46298
- LORAN C Offshore Flight Following (LOFF) in the Gulf of Mexico
[AD-A197179] p 91 N89-12558

RADAR TRACKING

- Techniques for robust tracking in airborne radars
p 600 A89-42666
- Radar coverage analysis of LAX traffic-control areas
[AIAA PAPER 89-2077] p 750 A89-49441

RADAR TRANSMISSION

- Future terrain following radars
p 599 A89-42655

RADAR TRANSMITTERS

- A family of radars for advanced systems
p 799 A89-48304

RADIAL DISTRIBUTION

- A study on exit radial temperature profile of 2D experimental combustor
p 535 A89-37759

RADIAL FLOW

- Three dimensional inviscid flow calculations in turbomachinery components
p 67 A89-13518
- Turbulence measurements in a radial upwash
p 294 A89-27706
- Prediction of turbomachinery performance - Application to a centrifugal pump, a centrifugal compressor, and a radial inflow turbine
p 640 A89-44638
- On the modelling of losses with distributed forces for calculating transonic flow fields in radial diffusers
p 733 A89-49141

- Evaluation of different boundary algorithms using the example of a transonic flow field in the wheel of a radial compressor
p 734 A89-49598

- Radial swirl flows between parallel discs at critical flow rate
p 802 A89-49826

- A multi-objective optimum design method for a radial-axial flow turbine with the optimum criteria of blade twist at outlet of blades
p 838 A89-52306

- LDV measurements and investigation of flow field through radial turbine guide vanes
p 538 N89-22609

RADIATION ABSORPTION

- Effects of wind-tunnel wall absorption on acoustic radiation of propellers
p 266 A89-22285
- A method for monitoring the variability in nuclear absorption characteristics of aviation fuels
[NASA-TM-4077] p 136 N89-12234

RADIATION DAMAGE

- EMP-induced transients and their impact on system performance
p 422 N89-18591

SUBJECT INDEX

RADIATION PROTECTION

EMP susceptibility insights from aircraft exposure to lightning p 88 A89-15937

RADIATION SHIELDING

Glazing into the future --- shielding coatings for military cockpit canopies p 832 A89-52525

RADIATIVE HEAT TRANSFER

Application of simple wave theory to the radiative boundary conditions required for an internal flow Euler solver [AIAA PAPER 89-2577] p 648 A89-46935

Radiation attenuation by a wall layer p 795 A89-47966

Variational problems in radiative gas dynamics in the case of surface gas injection p 733 A89-49203

RADIO ALTIMETERS

Optimization of algorithms for data processing in radar altimeters with electronic stabilization of the radiation pattern p 174 A89-18401

RADIO ANTENNAS

Out-of-band response of VHF/UHF airborne antennae p 830 A89-53484

Stress analysis report for the Microwave Landing System (MLS) class V modification C-130 aircraft [AD-A196722] p 91 N89-11730

RADIO COMMUNICATION

Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, Nov. 17-19, 1987, Proceedings p 62 A89-16201

A simulator investigation of the use of digital data link for pilot/ATC communications in a single pilot operation [NASA-TP-2837] p 90 N89-11726

RADIO CONTROL

Development of a simple flight experiment system using a radio controlled research airplane p 225 A89-24317

Photographic analysis of the location and the attitude of the radio-controlled research vehicle p 225 A89-24318

Data links for video and IR surveillance p 465 A89-33567

Flight test method development for a quarter-scale aircraft with minimum instrumentation [AD-A207896] p 835 N89-29337

RADIO DIRECTION FINDERS

Geodetic positioning system for flying aircraft (May 1987) [REPT-013/88] p 527 N89-22598

RADIO ELECTRONICS

Fundamentals of the maintenance of the radio-electronic equipment of aircraft --- Russian book p 525 A89-38513

Precision and efficiency of the radio electronic systems of aircraft --- Russian book p 625 A89-42524

RADIO FREQUENCY INTERFERENCE

Out-of-band response of VHF/UHF airborne antennae p 830 A89-53484

Electrification of hovering helicopters p 22 N89-10460

RADIO NAVIGATION

Radionavigation needs for the Europe of the future p 160 A89-18753

Omega Navigation System - A status report p 160 A89-19867

An overview of space-based radionavigation systems p 160 A89-20122

An overview of the Federal Radionavigation Plan p 160 A89-20123

Formulation of gain and impedance relations for corner reflectors employed in conjunction with localizer antenna arrays p 694 A89-43892

Civil satellite navigation and location systems p 660 A89-43893

Omega navigation in the shadow of Antarctica p 660 A89-45221

Some aspects of interference on Loran-C p 660 A89-45221

The Locstar radiodetermination satellite system p 830 A89-53660

Flight tests of three-dimensional path-redefinition algorithms for transition from Radio Navigation (RNAV) to Microwave Landing System (MLS) navigation when flying an aircraft on autopilot [NASA-TM-4089] p 246 N89-15116

RADIO RECEIVERS

Preconditions for G.P.S. installation - Receivers in differential operation for landing aircraft in general aviation [DGLR PAPER 87-132] p 23 A89-10523

EURONAV - A state of the art military GPS receiver p 340 A89-26711

Parachute jump testing of portable GPS receivers p 717 A89-49794

Practical integration of a digital GPS receiver with in systems p 751 A89-50307

RADIO TELEMETRY

A survey on fading channel over West-Java area for flight test radio telemetering purposes p 384 A89-31015

A system conforming to the new IIRIG standard for processing MIL-STD-1553 data p 397 A89-31019

RADIO TRANSMISSION

An adaptive transmit power control system for digital airborne communications p 225 A89-24054

A survey on fading channel over West-Java area for flight test radio telemetering purposes p 384 A89-31015

RADIO TRANSMITTERS

Out-of-band response of VHF/UHF airborne antennae p 830 A89-53484

RADIOACTIVE MATERIALS

An analysis of severe air transport accidents [DE89-012642] p 749 N89-27642

RADIOGRAPHY

Description of a rapid, high-sensitivity real-time radiographic system p 124 A89-14697

Micro radiography and tomography for high resolution NDT of advanced materials and microstructural components p 495 A89-35081

RADIOMETERS

The measurement of temperature from an aircraft in cloud p 353 N89-17978

RADOMES

Radome technology p 123 A89-13666

Structural performance of radomes at high Mach numbers p 763 A89-51215

RAFTS

Qualification and operational aspects of light weight SKAD (light weight survival kit air droppable) p 18 A89-10471

RAIN

The development of a capability for aerodynamic testing of large-scale wing sections in a simulated natural rain environment p 337 A89-28457

[AIAA PAPER 89-0762] p 337 A89-28457

Effect of heavy rain on aviation engines [AIAA PAPER 89-0799] p 326 A89-28462

NASA will study heavy rain effects on wing aerodynamics p 407 A89-29347

Airborne rain mapping radar p 837 A89-53313

Steady-state and transitional aerodynamic characteristics of a wing in simulated heavy rain [NASA-TP-2932] p 655 N89-25951

Feasibility of predicting performance degradation of airfoils in heavy rain [NASA-CR-181842] p 657 N89-25973

RAIN EROSION

Advancements in erosion testing of rotor blade leading edges p 163 A89-18888

RAKES

Riblet drag at flight conditions p 515 A89-39196

RAMAN LASERS

Instantaneous profiles and turbulence statistics of supersonic free shear layers by Raman excitation + laser-induced electronic fluorescence (relief) velocity tagging of oxygen p 440 A89-33424

RAMAN SPECTROSCOPY

Coherent Raman spectroscopy for supersonic flow measurements p 83 N89-11699

RAMJET ENGINES

Development of ram propulsion for flight vehicles [DGLR PAPER 87-101] p 176 A89-20240

Flowfield modifications of combustion rates in unstable ramjets p 322 A89-25092

Low frequency pressure oscillations in a model ramjet combustor - The nature of frequency selection [AIAA PAPER 89-0623] p 323 A89-25493

Evidence of a strange attractor in ramjet combustion [AIAA PAPER 89-0624] p 323 A89-25494

Acoustic-vortex interactions and low-frequency oscillations in axisymmetric combustors --- of ramjet engines p 325 A89-28336

Variable geometry control of reacting shear layers [AIAA PAPER 89-0979] p 411 A89-30492

Investigation of a small solid fuel ramjet combustor p 544 A89-39028

Automatic control of jet engines (3rd revised and enlarged edition) --- Russian book p 613 A89-42509

The ATR/RJ engine performance at constant dynamic pressure and the consideration of transition condition p 694 A89-46016

Review of passive shear-flow control research for improved subsonic and supersonic combustion [AIAA PAPER 89-2786] p 703 A89-47083

Numerical study of reactive ramjet dump combustor flowfields with a pressure based CFD method [AIAA PAPER 89-2798] p 681 A89-47091

Ramjet combustor modeling for engineering design [AIAA PAPER 89-2799] p 681 A89-47092

RAREFIED GAS DYNAMICS

Combustion behavior of boron-based BAMO/NMNO fuel-rich solid propellants [AIAA PAPER 89-2884] p 696 A89-47149

The influence of swirl and fuel composition of boron-containing fuels on combustion in a solid fuel ramjet combustion chamber p 683 A89-47150

Effects of bypass air on the combustion of boron particles in a solid fuel ramjet [AIAA PAPER 89-2886] p 683 A89-47151

Plasma torch igniter for scramjets p 558 A89-53355

Numerical simulations of the flowfield in central-dump ramjet combustors. Part 2: Effects of inlet and combustor acoustics p 108 N89-11745

Fire extinguishing agent evaluation in the Aircraft Engine Nacelle Fire Test Simulator (AENFTS) [AD-A198523] p 157 N89-14227

Flame driving of longitudinal instabilities in liquid fueled dump combustors p 412 N89-19392

Terminal shock response in ramjet inlets to abrupt downstream perturbations [AD-A209788] p 748 N89-27640

RAMPS (STRUCTURES)

Predictions of side-spillage of supersonic ramp inlets p 80 A89-16833

Interaction of a compression ramp with a hypersonic laminar boundary layer [AIAA PAPER 89-1843] p 583 A89-42071

Separation shock motion and ensemble-averaged wall pressures in a Mach 5 compression ramp interaction [AIAA PAPER 89-1853] p 585 A89-42081

RANDOM ACCESS MEMORY

Arranging computer architectures to create higher-performance controllers p 711 A89-46147

RANDOM LOADS

Optimum structural sizing for gust-induced response p 394 A89-31866

Response of discretely stiffened structures and transmission of structure-borne noise p 54 N89-11270

RANDOM PROCESSES

Time-correlated gust loads using matched filter theory and random process theory - A new way of looking at things [AIAA PAPER 89-1374] p 391 A89-30849

On the relationship between matched filter theory as applied to gust loads and phased design loads analysis [NASA-CR-181802] p 472 N89-20125

Time-correlated gust loads using Matched-Filter Theory and Random-Process Theory: A new way of looking at things [NASA-TM-101573] p 671 N89-25232

A new class of random processes with application to helicopter noise [NASA-CR-185037] p 713 N89-26679

RANDOM VIBRATION

The use of static analysis and the stress modes approach as an engineering oriented procedure for calculating the response of aeronautical structures to random excitation p 122 A89-13552

Mechanical durability prediction methods p 701 A89-46468

RANGE (EXTREMES)

Effect of centrifugal force on range of the Aero-Space Plane p 394 A89-31865

RANGEFINDING

Development of a low cost tracking/ranging system p 465 A89-33572

Communication and ranging systems for navigation experiment using Engineering Test Satellite V p 525 A89-36618

RAPID QUENCHING (METALLURGY)

Rapidly solidified aluminum alloys for high temperature/high stiffness applications p 488 A89-33474

Rapidly solidified Al-Ti alloys via advanced melt spinning p 621 A89-41888

RAREFIED GAS DYNAMICS

Mach reflection of a moving, plane shock wave under rarefied flow conditions p 65 A89-12907

Flow in the region of the interaction of an underexpanded rarefied jet and a conical skimmer p 67 A89-13347

Experimental flowfields around NACA 0012 airfoils located in subsonic and supersonic rarefied air streams p 81 A89-17015

Solutions of the Navier-Stokes equations for sub- and supersonic flows in rarefied gases p 81 A89-17019

Three-dimensional flow simulation about the AFE vehicle in the transitional regime --- Aeroassist Flight Experiment [AIAA PAPER 89-0245] p 278 A89-25207

Supersonic low-density flow over airfoils [AIAA PAPER 89-0530] p 286 A89-25424

Three-dimensional rarefied-gas flow past conical bodies p 364 A89-30106

- Direct statistical modeling of flow of a rarefied gas past a sphere in the transition regime p 371 A89-32279
 Computation of flow fields for hypersonic flight at high altitudes p 440 A89-33627
 Flow of rarefied gases over two-dimensional bodies [AIAA PAPER 89-1970] p 575 A89-41814
 Numerical simulation of 3D rarefied hypersonic flows [AIAA PAPER 89-1715] p 591 A89-43230
 Rarefied gas flow through two-dimensional nozzles [AIAA PAPER 89-2893] p 650 A89-47156
 Monte Carlo simulation for molecular gas dynamics p 737 A89-50012
- RAREFIED GASES**
 Consideration of the effect of surface roughness on regime coefficients in local interaction theory p 512 A89-38432
 The Reynolds number dependence of the drag coefficient of convex bodies in a rarefied gas p 741 A89-50995
- RATES (PER TIME)**
 Intracloud lightning as a precursor to thunderstorm microbursts p 56 N89-10490
 An assessment of ground effects determined by static and dynamic testing techniques p 16 N89-10854
 Trajectory scoring in rectangular coordinates using transponder-interrogator range and range rate data [DE89-007005] p 466 N89-20119
- RATINGS**
 Simulator evaluation of a display for a Takeoff Performance Monitoring System [NASA-TP-2908] p 615 N89-23469
- RATIOS**
 Axial velocity density ratio influence on exit flow angle in transonic/supersonic cascades p 329 N89-16830
- REACTION KINETICS**
 Analysis of artificial viscosity effects on reacting flows using a spectral multidomain technique p 213 A89-22735
 Fast numerical technique for nozzle flows with finite-rate chemical kinetics p 411 A89-31332
 Parametric study of thermal and chemical nonequilibrium nozzle flow p 585 A89-42084
 Analysis of eccentric annular pressure seals: A new solution procedure for determining reactive force and rotor-dynamic coefficients p 259 N89-15412
 Fuels combustion research [AD-A204161] p 490 N89-21071
 Hypersonic vehicle environment simulation, phase 1 [AD-A209030] p 864 N89-28754
- REACTION PRODUCTS**
 Effect of the diffusive separation of chemical elements on a catalytic surface --- for supersonic aerodynamics p 66 A89-13165
- REACTIVITY**
 Atmospheric photochemical modeling of turbine engine fuels and exhausts. Computer model development, volume 1 [AD-A198690] p 196 N89-13832
- REAL GASES**
 High speed inlet calculations with real gas effects [AIAA PAPER 88-3076] p 75 A89-14980
 28th Lancaster Memorial Lecture - Experimental real-gas hypersonics p 257 A89-23870
 Progress on a Taylor weak statement finite element algorithm for high-speed aerodynamic flows [AIAA PAPER 89-0654] p 289 A89-25517
 Computational methods for hypersonic flows - Special techniques and real gas effects [ONERA, TP NO. 1989-100] p 441 A89-33640
 A three-dimensional upwind parabolized Navier-Stokes code for real gas flows [AIAA PAPER 89-1651] p 626 A89-43177
 Simulation of inviscid hypersonic real gas flows p 644 A89-45414
 Hypersonic blunt body computations including real gas effects [ONERA, TP NO. 1989-85] p 729 A89-48765
 Hypervelocity atmospheric flight: Real gas flow fields [NASA-TM-101055] p 805 N89-27117
- REAL TIME OPERATION**
 Automated landing approach using machine seeing [DGLR PAPER 87-131] p 23 A89-10522
 Description of a rapid, high-sensitivity real-time radiographic system p 124 A89-14697
 Universal Ada Test Language (UATL) to support real-time software/system integration and factory/maintenance fault isolation p 197 A89-18009
 Aircraft maneuver optimization under fuel constraints - A real time algorithm p 246 A89-24529
 Real-time comparison of X-29A flight data and simulation data p 332 A89-27736
 Real-time simulation for survivable penetration [SAE PAPER 881515] p 333 A89-28236
 A system conforming to the new IRIG standard for processing MIL-STD-1553 data p 397 A89-31019
- LEADER - An automatic, real-time diagnostic knowledge system**
 [SAE PAPER 881443] p 534 A89-37651
 Generic imagery processing and exploitation p 622 A89-40255
 The conformed panoramic - A new concept in electro-optical sensors p 622 A89-40266
 User friendly real time display p 609 A89-40272
 Real-time solution of the airflow continuity equations for a hovercraft simulation p 589 A89-43147
 The System 500, a real-time flight test telemetry system p 660 A89-45134
 Arranging computer architectures to create higher-performance controllers p 711 A89-46147
 Gain transfer - An algorithm for decentralized hierarchical estimation p 711 A89-46150
 The search for a new flight simulation software modeling standard - A modular approach using features of the Ada programming language [AIAA PAPER 89-3278] p 809 A89-48392
 Real-time flight simulation support for the X-31 aircraft program [AIAA PAPER 89-3283] p 755 A89-48395
 Modular aircrew simulation systems - 1989 advances [AIAA PAPER 89-3296] p 787 A89-48405
 NAL flight simulator real-time computer systems [AIAA PAPER 89-3297] p 787 A89-48406
 Synchronization and time tagging in distributed real time simulation [AIAA PAPER 89-3300] p 787 A89-48408
 An improved numerical integration method for flight simulation [AIAA PAPER 89-3306] p 809 A89-48414
 Simulation made easy - The development of an integrated data driven simulation operating system [AIAA PAPER 89-3309] p 788 A89-48417
 An alternate approach to table look-up routines for real-time digital flight simulation [AIAA PAPER 89-3310] p 809 A89-48418
 Development of a realtime man-in-the-loop simulation incorporating transportable Ada flight control software [AIAA PAPER 89-3277] p 789 A89-48439
 Graphic displays for real-time monitoring in research simulation p 790 A89-48831
 Ada as a real-time development tool p 810 A89-48843
 On self-tuning controller for aircraft terrain following/gust alleviation control system p 781 A89-49109
 Pilot's associate - The generation of real-time performance [AIAA PAPER 89-2097] p 768 A89-49455
 A real-time expert system for self-repairing flight control [AIAA PAPER 89-3427] p 843 A89-52528
 Piloted simulation of a ground-based time-control concept for air traffic control [AIAA PAPER 89-3625] p 829 A89-52700
 A real-time guidance algorithm for aerospace plane optimal ascent to low earth orbit p 855 A89-54085
 Real-time flight test analysis and display techniques for the X-29A aircraft [NASA-TM-101692] p 168 N89-13424
 RT-BUILD: An expert programmer for implementing and simulating Ada real-time control software p 265 N89-16343
 A parallel expert system for the control of a robotic air vehicle p 433 N89-19842
 High-speed real-time animated displays on the ADAGE (trademark) RDS 3000 raster graphics system [NASA-TM-4095] p 433 N89-19899
 Real-time display of time dependent data using a head-mounted display [AD-A203051] p 476 N89-20993
 Study of the real emulation of the electronic integrated system [PB89-116271] p 557 N89-22016
 Application of a PC based, real-time, data-acquisition system in rotorcraft wind-tunnel testing [NASA-TM-4119] p 630 N89-24079
 A real time microcomputer implementation of sensor failure detection for turbofan engines [NASA-TM-102327] p 876 N89-29032
- REATTACHED FLOW**
 HISS - A higher-order panel method for subsonic and supersonic attached flow about arbitrary configurations p 10 A89-11484
 An experimental study of a reattaching supersonic shear layer [AIAA PAPER 89-1801] p 579 A89-42036
 Analysis of reattachment during ramp down tests --- helicopter blade upper surface flow in dynamic stall conditions p 816 A89-52043
 Experimental results for the Epller 387 airfoil at low Reynolds numbers in the Langley low-turbulence pressure tunnel [NASA-TM-4062] p 15 N89-10842

RECEIVERS

- Global positioning system (GPS) receiver initialization methods for MIL-STD-1760A [SAE PAPER 872501] p 42 A89-10691
 Transient flow thrust prediction for an ejector propulsion concept [AIAA PAPER 89-2906] p 774 A89-49688
 Laser communication test system [AD-A199612] p 349 N89-17215
 High-dynamic GPS tracking [NASA-CR-184868] p 465 N89-20113
 Geodetic positioning system for flying aircraft (May 1987) [REPT-013/88] p 527 N89-22598
- RECIRCULATIVE FLUID FLOW**
 Heat transfer in the recirculating region formed by a backward-facing step p 51 A89-12252
 Separation-bubble flow solution using Euler/Navier-Stokes zonal approach with downstream compatibility conditions p 212 A89-22576
 Cold flow measurements for a double swirler combustor p 675 A89-45557
 Investigation on of the flow around a backward facing step with spanwise blowing [CERT-RF-OA-68/2259-AYD] p 17 N89-10859
 Efficient numerical techniques for complex fluid flows p 131 N89-12894
 Improved numerical methods for turbulent viscous recirculating flows p 131 N89-12895
 Validation of Computational Fluid Dynamics. Volume 2: Poster papers [AGARD-CP-437-VOL-2] p 424 N89-18648
- RECLAMATION**
 T55-L712 turbine engine compressor housing refurbishment-plasma spray project [NASA-TM-101310] p 44 N89-10156
- RECONNAISSANCE**
 Fusion of multisensor data: A summary of the JASMIN project [FOA-C-30498-3.3] p 563 N89-23213
- RECONNAISSANCE AIRCRAFT**
 Fiber optic applications to the high altitude reconnaissance vehicle [AIAA PAPER 88-3930] p 187 A89-18104
 Airborne reconnaissance XII; Proceedings of the Meeting, San Diego, CA, Aug. 16, 17, 1988 [SPIE-979] p 567 A89-40251
 Reconnaissance sensor management system - Vicon 2000 p 609 A89-40254
 Generic imagery processing and exploitation p 622 A89-40255
 Airborne pod structures p 603 A89-40261
 Use of magnetic suspension for sensor vibration isolation p 622 A89-40262
 The conformed panoramic - A new concept in electro-optical sensors p 622 A89-40266
 User friendly real time display p 609 A89-40272
 HALE - A high-altitude, long-endurance manned aircraft p 604 A89-41109
 Digital flight and inlet control in the SR-71 p 664 A89-45160
 Unmanned high altitude long-endurance aircraft [AIAA PAPER 89-2011] p 757 A89-49401
 High Altitude Long Endurance (HALE) RPV [AIAA PAPER 89-2014] p 758 A89-49403
 High altitude reconnaissance aircraft design [AIAA PAPER 89-2109] p 833 A89-54200
 CONDOR: Long endurance high altitude vehicle, volume 5 [NASA-CR-184703] p 360 N89-18411
- RECORDING**
 Digital recording of radar data in an aircraft [PB88-209507] p 51 N89-10212
- RECOVERABILITY**
 Model predictions for improved recoverability of a multistage axial-flow compressor [AIAA PAPER 89-2687] p 650 A89-47017
- RECOVERY**
 Launch, recovery and handling systems for vertical take-off and landing UAVs operating from small ships p 484 A89-33569
- RECOVERY PARACHUTES**
 Testing of a new recovery parachute system for the F111 aircraft crew escape module - An update [AIAA PAPER 89-0891] p 471 A89-35209
 The development and testing of the HISAC parachute recovery system [AIAA PAPER 89-0921] p 462 A89-35231
 A seat-mounted combined harness [AIAA PAPER 89-0937] p 463 A89-35245
 The effects of unsteady aerodynamics on single and clustered parachute system [AIAA PAPER 89-0934] p 448 A89-35250
 Testing of a new recovery parachute system for the F111 aircraft crew escape module: An update [DE89-007139] p 524 N89-22592

RECOVERY VEHICLES

Design aspects of a naval RPV recovery system
p 484 A89-33568

RECTANGULAR PANELS

Buckling and postbuckling behaviour of composite panels
p 122 A89-13594

RECTANGULAR PLANFORMS

Effect of roughness on rollup of tip vortices on a rectangular hydrofoil
p 362 A89-29168
Some effects of aerodynamic spoilers on wing flutter
[NASA-TM-101632]
p 825 A89-29324

RECTANGULAR PLATES

An approximate method for sonic fatigue analysis of plates and shells
p 565 A89-39515
Flutter of general laminated panels in supersonic flow
p 803 A89-50174

RECTANGULAR WINGS

Unified computation method of unsteady supersonic/hypersonic flow past two dimensional flat plate and rectangular wings
[SAE PAPER 872447]
p 7 A89-10660
Effect of simulated glaze ice on a rectangular wing
[AIAA PAPER 89-0750]
p 303 A89-25560
The effects of aspect ratio on the stall of a finite wing
[AIAA PAPER 89-0570]
p 296 A89-28434
Effects of modal symmetry on transonic aeroelastic characteristics of wing-body configurations
p 385 A89-29171

The application of the two-dimensional unsteady Euler equations perturbation solutions on the supersonic rectangular wings
p 511 A89-37787

Transonic aeroelasticity of fighter wings with active control surfaces
p 579 A89-42020
Flow separation and vortex bursting locations on wings pitching at constant rates
[AIAA PAPER 89-2160]
p 719 A89-47627

Unsteady three-dimensional stall on a rectangular wing
p 14 A89-10027

Coupling linearized far-field boundary conditions with nonlinear near-field solutions in transonic flow
[AD-A198721]
p 153 A89-13405

Development and application of a program to calculate transonic flow around an oscillating three-dimensional wing using finite difference procedures
[NASA-CR-181744]
p 450 A89-20093

Flutter of a low-aspect-ratio rectangular wing
[NASA-TM-4116]
p 606 A89-23447

RECYCLING

Plastic media blasting recycling equipment study
[AD-A202463]
p 556 A89-21987

REDUCED GRAVITY

An experimental study and prediction of a two-phase pressure drop in microgravity
[AIAA PAPER 89-0074]
p 343 A89-25065
Impact cratering in low-gravity environments - Results of reconnaissance experimentation on the NASA KC-135A reduced-gravity aircraft
p 544 A89-36543
Acceleration forces aboard NASA KC-135 aircraft during microgravity maneuvers
p 620 A89-42022

REDUCED ORDER FILTERS

Modal observability and controllability measures for first and second order linear systems and model reduction
p 57 A89-11680

Efficient procedures for the optimization of aircraft structures with a large number of design variables
p 95 A89-13651

Controller reduction methods maintaining performance and robustness
p 429 A89-28595
Measures of modal controllability and observability for first- and second-order linear systems
p 563 A89-36943

Synthesis of a helicopter full authority controller
[AIAA PAPER 89-3448]
p 843 A89-52547

Algebraic loop transfer recovery - An application to the design of a helicopter output feedback control law
[AIAA PAPER 89-3579]
p 849 A89-52662

REDUNDANCY

Configuration of tuned dry gyro redundant system
p 554 A89-38189

X-15 pilot-in-the-loop and redundant/emergency systems evaluation
p 664 A89-45168
SPAREL - A model for reliability and sparing in the world of redundancies
p 702 A89-46493

Sensor failure detection for jet engines
[NASA-TM-101396]
p 177 A89-13432

Development of new redundant flight safety system using inertial sensors
[ISAS-634]
p 306 A89-17585

The application of software fault tolerance to air traffic control: Study contract overview
[BR108567]
p 465 A89-20114

A closed-form trim solution yielding minimum trim drag for airplanes with multiple longitudinal-control effectors
[NASA-TP-2907]
p 615 A89-23468

Control surface dual redundant servomechanism
[AD-D014058]
p 783 A89-26857

REDUNDANCY ENCODING

Advanced detection, isolation, and accommodation of sensor failures - Real-time evaluation
p 113 A89-16156

REDUNDANT COMPONENTS

An experimental optical coupling device for an airborne digital redundant system
[NAL-TR-1003]
p 835 A89-28514

REELS

Hose reel monitor for inflight refueling system
[AD-D014054]
p 765 A89-26836

REENTRY EFFECTS

Thermal analysis of a hypersonic wing test structure
[NASA-CR-185319]
p 595 A89-24265

REENTRY TRAJECTORIES

Stability and control of hypervelocity vehicles
[AD-A205160]
p 540 A89-21807

REENTRY VEHICLES

The X-planes: X-1 to X-31 (2nd revised and enlarged edition) --- Book
p 205 A89-20251
Prediction of supersonic/hypersonic viscous flows over RVs and decoys
[AIAA PAPER 89-0028]
p 272 A89-25024

International Instrumentation Symposium, 34th, Albuquerque, NM, May 2-6, 1988, Proceedings
p 348 A89-27651
Computation of flow fields for hypersonic flight at high altitudes
p 440 A89-33627

Analysis of the expansion-fan flowfield for holes in a hypersonic configuration
p 738 A89-50540

Feasibility of flight experiments and instrumentation hardware for in-flight hypersonic boundary-layer measurements
[NASA-CR-184896]
p 517 A89-21772

REFLECTANCE

Automated optical instrument for extracting water droplet impingement data from wind tunnel experiments
p 47 A89-10261

REFLECTION

Transmission and reflection on pressure waves by compressor and turbine stages, based on an actuator-disk model
[AD-A203513]
p 496 A89-20426

REFLECTOR ANTENNAS

Design, implementation and computer aided tests of a shaped reflector for an air traffic control system
[ETN-89-94229]
p 556 A89-22014

REFLECTORS

Formulation of gain and impedance relations for corner reflectors employed in conjunction with localizer antenna arrays
p 525 A89-39500

REFRACTIVITY

Visualization of aerodynamic flow fields using photorefractive crystals
p 555 A89-38764
Analysis of temperature and velocity microturbulence parameters from aircraft data and relationship to atmospheric refractive index structure
[AD-A196542]
p 196 A89-13854

REFRACTORY COATINGS

Life modeling of thermal barrier coatings for aircraft gas turbine engines
p 480 A89-20143

REFRACTORY MATERIALS

Elevated temperature aluminum alloys for advanced fighter aircraft
[AIAA PAPER 89-1407]
p 391 A89-30880
Taming ceramic fiber
p 547 A89-36721
Elevated temperature strain gages
p 130 A89-12886

A proposal for funding to purchase a high-temperature furnace to enable determination of the high temperature mechanical properties of structural carbon materials
[AD-A204103]
p 542 A89-21809

REFRACTORY METAL ALLOYS

Beyond superalloys - The goals, the materials and some reality
p 546 A89-36418

REFRIGERANTS

Wind tunnel pressurization and recovery system
[NASA-CR-184591]
p 408 A89-18499

REFUELING

Gravity refueling nozzles and ports interface standards for civil aircraft
[SAE AS 1852]
p 544 A89-37659

REGENERATION (ENGINEERING)

Influence of regeneration treatments on creep rupture lives of turbine blades
p 43 A89-11214

REGIONAL PLANNING

Instrument landing system mathematical modeling study for Orlando International Airport Runway 17R localizer, Orlando, Florida, revised airside docking plan (Scheme 3A)
[AD-A204722]
p 526 A89-21783

REGIONS

V/STOL aircraft configurations and opportunities in the Pacific Basin
[SAE PAPER 872403]
p 18 A89-10631

REGRESSION ANALYSIS

Regressed relations for forced convection heat transfer in a direct injection stratified charge rotary engine
[SAE PAPER 880626]
p 51 A89-12308

Partitioning of flight data for aerodynamic modeling of aircraft at high angles of attack
p 394 A89-31858
Very short-range aerodrome forecasts using regression techniques
p 870 A89-54831

Estimation of longitudinal stability and control derivatives for an icing research aircraft from flight data
[NASA-TM-4099]
p 247 A89-15925

A comparative analysis of tilt rotor aircraft versus helicopters using simulator results
[AD-A202190]
p 396 A89-19294

Estimating and explaining the production cost of high-technology systems: The case of military aircraft
[AD-A208391]
p 719 A89-26809

REGULATIONS

The defense of aviation mechanics and repair facilities from enforcement actions of the Federal Aviation Administration
p 267 A89-24703

Noise issues - An FAA perspective on transport noise
[AIAA PAPER 89-2362]
p 710 A89-46775

FAA conceptual changes in minimum equipment list policies
[AIAA PAPER 89-2055]
p 716 A89-49427

Regulatory aspect of crashworthiness
p 380 A89-18422

Aviation safety: Measuring how safely individual airlines operate
[GAO/RCED-88-61]
p 464 A89-20974

A procedure for operating dependent instrument approaches to converging runways
[AD-A204723]
p 526 A89-21784

Safe skies for tomorrow: Aviation safety in a competitive environment
[PB89-114318]
p 524 A89-22591

REINFORCED PLASTICS

Efficient optimization of integrated aerodynamic-structural design
p 500 A89-34569

Divergence instability of reinforced composite cylindrical shells
p 495 A89-35146

Technology of aircraft construction (selected chapters)
[AD-A199946]
p 569 A89-24261

REINFORCED PLATES

Aeroelastic flutter of low aspect ratio cantilever composite plate
p 347 A89-26281

REINFORCED SHELLS

The load-bearing capacity of closed-profile oblong cylindrical shells made of a metal/polymer composite laminate
p 492 A89-34128

Application of the theory of fuzzy sets to the two-criterion stochastic optimization of ribbed shells
p 556 A89-39823

REINFORCEMENT (STRUCTURES)

On the design of biaxially stiffened composite plates
p 493 A89-34867

Reinforcing solutions for a panel cut-out
p 698 A89-45177

Using the properties of nonlinear vibrations for flaw detection in the reinforcement elements of thin-walled structures
p 803 A89-51044

REINFORCEMENT RINGS

Axisymmetric panel flutter of ring-reinforced composite cylindrical shells
[AIAA PAPER 89-1167]
p 417 A89-30658

RELAXATION (MECHANICS)

Model problem of the hypersonic relaxing-gas flow past bodies
p 211 A89-22245

RELAXATION METHOD (MATHEMATICS)

Multigrid acceleration of a relaxation procedure for the reduced Navier-Stokes equations
p 148 A89-19904

An improved upwind finite volume relaxation method for high speed viscous flows
[AIAA PAPER 89-0549]
p 286 A89-25441

Three-dimensional viscous flow simulations using an implicit relaxation scheme
p 291 A89-25965

A vectorized Gauss-Seidel line relaxation scheme for solving 3D Navier-Stokes equations
[AIAA PAPER 89-1948]
p 573 A89-41795

Upwind-biased, point-implicit relaxation strategies for viscous, hypersonic flows
[AIAA PAPER 89-1972]
p 575 A89-41816

Multigrid methods in boundary element calculations
[NLR-MP-87025-U]
p 137 A89-12335

Verification of an implicit relaxation method for steady and unsteady viscous and inviscid flow problems
p 423 A89-18625

RELIABILITY

Effect of design variables, temperature gradients, and speed on life and reliability of a rotating disk
p 799 A89-47719

A highly reliable computer for airborne applications
p 59 A89-10833

- Noninteractive macroscopic reliability model for ceramic matrix composites with orthotropic material symmetry [NASA-TM-101414] p 259 N89-15437
- Importance of sensitivity and reliability of NDI techniques on damage tolerance based life prediction of turbine discs p 350 N89-17257
- Use of Markov probability and reliability model generation methods in the analysis of reliability of a fault tolerant, hardware and software based system with flexible repair policies p 421 N89-18477
- The application of software fault tolerance to air traffic control: Study contract overview [BR108567] p 465 N89-20114
- Composite material repair and reliability [AD-A209150] p 859 N89-28574
- ### RELIABILITY ANALYSIS
- An approach to solving large reliability models [AIAA PAPER 88-3905] p 199 A89-18086
- Modeling mission reliability of advanced integrated communication, navigation, identification avionics systems [AIAA PAPER 88-4023] p 173 A89-18174
- A 'new' philosophy of structural reliability, fail safe versus safe life p 188 A89-18852
- Amber for long endurance p 269 A89-26673
- U.S. Army requirements for fatigue integrity p 414 A89-29473
- Reliability analysis of the Virkler fatigue crack growth data [AIAA PAPER 89-1256] p 418 A89-30741
- Detection, diagnosis and prognosis of rotating machinery to improve reliability, maintainability, and readiness through the application of new and innovative techniques p 392 A89-30976
- Markov reliability models for digital flight control systems p 430 A89-31463
- The reliability analysis of aircraft structures p 467 A89-33146
- Two-time probabilistic model of the evolution of aircraft engine reliability p 612 A89-42463
- A corollary to - Duane's postulate on reliability growth p 701 A89-46474
- SPAREL - A model for reliability and sparing in the world of redundancies p 702 A89-46493
- Testing of reliability - Analysis tools p 702 A89-46503
- Transmission overhaul and replacement predictions using Weibull and renewal theory [AIAA PAPER 89-2919] p 704 A89-47173
- Diagnostics of aircraft components --- Russian book p 748 A89-48938
- Computerized life and reliability modeling for turboprop transmissions p 863 A89-53364
- On the diagnostic emulation technique and its use in the AIRLAB [NASA-TM-4027] p 58 N89-10524
- Use of Markov probability and reliability model generation methods in the analysis of reliability of a fault tolerant, hardware and software based system with flexible repair policies p 421 N89-18477
- Reliability and performance evaluation of systems containing embedded rule-based expert systems [NASA-CR-181769] p 500 N89-20683
- Transmission overhaul and replacement predictions using Weibull and renewal theory [NASA-TM-102022] p 562 N89-22925
- ### RELIABILITY ENGINEERING
- Structural system reliability combining the constraint of damage tolerance design p 256 A89-23012
- XRD techniques in aero engine development --- X-ray diffraction p 555 A89-38632
- A nontraditional approach to reliability p 701 A89-46483
- Fault management in aircraft power plant controls p 327 N89-16809
- R and M (Reliability and Maintainability) quality team concept and C-17 design at Douglas Aircraft Company: An R and M 2000 initiative case study [AD-A201574] p 361 N89-19228
- Toward improved durability in advanced aircraft engine hot sections [NASA-TM-4087] p 479 N89-20135
- Airworthiness and flight characteristics evaluation of an improved engine air filtration system on the UH-1H helicopter [AD-A203446] p 480 N89-20145
- The designer of the 90's: A live demonstration p 705 N89-25164
- An experimental optical coupling device for an airborne digital redundant system [NAL-TR-1003] p 835 N89-28514
- ### REMOTE CONTROL
- A signal filter with zero phase lag p 336 A89-27674
- The computer controlled system for multi-drone performing formation flight in a same aerial zone p 481 A89-33566
- Remote guidance of payloads under maneuverable parachutes [E-639] p 115 N89-12571
- Flight test experience and controlled impact of a remotely piloted jet transport aircraft [NASA-TM-4084] p 236 N89-15910
- ### REMOTE HANDLING
- Autonomous flight and remote site landing guidance research for helicopters [NASA-CR-177478] p 114 N89-11752
- ### REMOTE SENSING
- Fractal features of sea surface manifested in microwave remote sensing signatures p 258 A89-24872
- Investigation of aeroacoustic mechanisms by remote thermal imaging p 407 A89-29511
- Remote detection of aircraft icing hazards by Doppler radar p 826 A89-54805
- Aircraft icing conditions detected by combined remote sensors - A preliminary study p 827 A89-54807
- Sensors for ceramic components in advanced propulsion systems: Summary of literature survey and concept analysis, task 3 report [NASA-CR-180900] p 54 N89-11192
- ### REMOTE SENSORS
- Advanced detection, isolation, and accommodation of sensor failures - Real-time evaluation p 113 A89-16156
- Multispectral terrain background simulation techniques for use in airborne sensor evaluation p 499 A89-33664
- ### REMOTELY PILOTED VEHICLES
- Modern techniques for the control of RPV's [SAE PAPER 872457] p 39 A89-10669
- 'The Pointer', a new concept for RPV air vehicles p 28 A89-12416

Analysis of low Reynolds number separation bubbles using semiempirical methods p 652 A89-47351
The Reynolds number dependence of the drag coefficient of convex bodies in a rarefied gas p 741 A89-50995
High-resolution liquid-crystal heat-transfer measurements on the endwall of a turbine passage with variations in Reynolds number p 862 A89-53289
On Reynolds number effects and simulation: Report of the review committee of AGARD Working Group 09 [NLR-MP-87041-U] p 85 N89-11714
Reynolds number effects in transonic flow [AGARD-AG-303] p 300 N89-16760
The effects of freestream turbulence on airfoil boundary layer behavior at low Reynolds numbers [AD-A201665] p 372 N89-18419
High-resolution liquid-crystal heat-transfer measurements on the end wall of a turbine passage with variations in Reynolds number [NASA-TM-100827] p 424 N89-18664
Use of riblets to obtain drag reduction on airfoils at high Reynolds number flows [AD-A201485] p 378 N89-19267
Observed Reynolds number effects on airfoils and high aspect ratio wings at transonic flow conditions [NLR-MP-88006-U] p 451 N89-20102

REYNOLDS STRESS

- The correlation between Reynolds stress and turbulent kinetic energy in the near wake of a symmetric airfoil p 448 A89-35393
Stress tensor measurements within the vaneless diffuser of a centrifugal compressor p 556 A89-39050
Rectangular jets in a crossflow p 802 A89-50057

RHEOLOGY

- Determining cure cycles for thermosetting epoxy resins [SME PAPER EM88-533] p 864 A89-54890

RIBBON PARACHUTES

- Wall-interference corrections for parachutes in a closed wind tunnel [AIAA PAPER 89-0900] p 485 A89-35217
A coupling apparent mass for parachute inflation equations [AIAA PAPER 89-0933] p 447 A89-35243
The effects of unsteady aerodynamics on single and clustered parachute system [AIAA PAPER 89-0934] p 448 A89-35250
Flow past two-dimensional ribbon parachute models p 579 A89-42015
Fast brake --- F-111 high-performance parachute system development p 657 A89-46593

RIBLETS

- The wall-pressure fluctuations of modified turbulent boundary layer with riblets p 47 A89-10163
Behaviour of internal manipulators - 'Riblet' models in subsonic and transonic flows [AIAA PAPER 89-0963] p 365 A89-30479
Riblet drag at flight conditions p 515 A89-39196
Effects of contamination on riblet performance p 579 A89-42021
Effects of riblets on the wake characteristics of an airfoil [AIAA PAPER 89-2199] p 723 A89-47658
Use of riblets to obtain drag reduction on airfoils at high Reynolds number flows [AD-A201485] p 378 N89-19267

- Effect of riblets upon flow separation in a subsonic diffuser [AD-A203178] p 458 N89-20967

RIBS (SUPPORTS)

- Structural efficiency study of composite wing rib structures [NASA-CR-183004] p 119 N89-11827

RICCATI EQUATION

- Approximation theory for LQG (Linear-Quadratic-Gaussian) optimal control of flexible structures [NASA-CR-181705] p 114 N89-11753

RIDING QUALITY

- Detailed design of a Ride Quality Augmentation System for commuter aircraft [NASA-CR-4230] p 615 N89-23470

RIGID ROTORS

- The bistable behavior of a rigid rotor with squeeze film damper p 49 A89-11029
Simple balance methods of high-speed rotors in field p 126 A89-18856
Aeroelastic optimization of a helicopter rotor p 163 A89-18898
Dynamics of a rigid rotor mounted on discontinuously non-linear elastic supports p 190 A89-19125
An experimental and analytical investigation of stall effects on flap-lag stability in forward flight p 243 A89-23305
Application of higher harmonic control (HHC) to hingeless rotor systems [AIAA PAPER 89-1215] p 430 A89-30703
Analytic simulation of higher harmonic control using a new aeroelastic model [AIAA PAPER 89-1321] p 390 A89-30798
Forward flight aeroelasticity of a hingeless rotor blade by bilinear formulation [AIAA PAPER 89-1233] p 392 A89-30892
Design and development tests of a five-bladed hingeless helicopter main rotor [MBB-UD-531-88-PUB] p 603 A89-39845
Calculation of the steadily periodic and gust responses of a hingeless rotor helicopter using two-dimensional time domain unsteady aerodynamics p 182 N89-14240
Aeroelastic optimization of a helicopter rotor p 316 N89-16778

- Nonlinear rotorcraft analysis-experimental and analytical [AD-A203967] p 475 N89-20990

- Flap-lag stability data for a small-scale isolated hingeless rotor in forward flight [NASA-TM-102189] p 706 N89-25479

RIGID STRUCTURES

- On optimal rigid body motions [AIAA PAPER 89-3616] p 850 A89-52694

RING LASERS

- Dithered ring laser gyros for angular rate stabilization of tracking systems [AAS PAPER 88-014] p 236 A89-20837
Update 89 - Additional results with the multifunction RLGS system [AIAA PAPER 89-3583] p 837 A89-52716
Performance test results of a multi-function fault-tolerant RLGS system [AIAA PAPER 89-3584] p 837 A89-52717

RING STRUCTURES

- Optical fiber data transfer system [NASA-CR-181704] p 194 N89-14376

RING WINGS

- Steady and unsteady potential flows around axisymmetric bodies and ring airfoils p 11 A89-11489

RISK

- Trajectory optimization with risk minimization for military aircraft p 538 A89-36929
Fire behavior and risk analysis in spacecraft [NASA-TM-100944] p 42 N89-10111
Description of the derivation of the collision risk model used in the vertical separation simulation risk model [AD-A205109] p 523 N89-21781

RIVETED JOINTS

- Ensuring the quality of the covering surface in the case of riveted joints with high radial interference p 492 A89-34159
Procedure for evaluating the effect of structural parameters on the life of longeron-wall joints p 799 A89-47941

ROADS

- Investigations on the cracking behavior of joints in airfields and roads: Field investigations and laboratory simulations [PB89-141279] p 619 N89-23479
Design criteria for aggregate-surfaced roads and airfields [AD-A207059] p 694 N89-26019

ROBOTICS

- Robotic deburring of complex machined parts p 190 A89-18936

- A parallel expert system for the control of a robotic air vehicle p 433 N89-19842
- Structural dynamics branch research and accomplishments for FY 1988 [NASA-TM-101406] p 562 N89-22939
- ROBOTS**
- An optimal material removal strategy for automated repair of aircraft canopies p 874 A89-53416
- ROBUSTNESS (MATHEMATICS)**
- Enhanced assessment of robustness for an aircraft's sliding mode controller p 113 A89-16154
- The variable structure design of aircraft servo loop p 101 A89-16834
- Reduced conservative singular value analysis for robustness p 197 A89-17489
- Automatic robust landing control system design for ante plane using equivalent nonlinear elimination method --- for canard-configured aircraft p 244 A89-23977
- Structured stability robustness improvement by eigenspace techniques - A hybrid methodology --- in multivariable linear feedback systems for flight control p 405 A89-31456
- Active control law synthesis for flexible aircraft p 482 A89-35045
- Robust control of an active vibration isolation system for helicopters p 539 A89-39458
- Techniques for robust tracking in airborne radars p 600 A89-42666
- Improved time-domain stability robustness measures for linear regulators p 630 A89-43068
- Worst-case analysis of flight control systems using the structured singular value p 781 A89-49406
- Linear quadratic Gaussian design for robust performance of a highly maneuverable aircraft [AIAA PAPER 89-3457] p 844 A89-52555
- A surrogate system approach to robust control design [AIAA PAPER 89-3492] p 873 A89-52585
- Application of stochastic robustness to aircraft control systems p 846 A89-52598

Statistics on aircraft gas turbine engine rotor failures that occurred in US commercial aviation during 1984
[NAPC-PE-185] p 841 N89-28516
Statistics on aircraft gas turbine engine rotor failures that occurred in US commercial aviation during 1985
[NAPC-PE-188] p 841 N89-28517
Turbomachinery rotor support with damping
[NASA-CASE-MFS-28345-1] p 865 N89-28841
Noise produced by turbulent flow into a rotor: Users manual for atmospheric turbulence prediction and mean flow and turbulence contraction prediction
[NASA-CR-181791] p 876 N89-29154

RUDDERS

Integral rudder system for aircraft steering
p 539 A89-39258
Development of an aircraft side rudder in a new type of carbon fiber composite technology
p 717 A89-50362
RUNGE-KUTTA METHOD
Navier-Stokes calculations for DFVLR F5-wing in wind tunnel using Runge-Kutta time-stepping scheme
p 291 A89-25867
Effect of sidewall boundary layer on a wing in a wind tunnel
p 294 A89-27742
Inviscid prediction of transonic flows in turbomachines using a Runge-Kutta integration scheme
p 444 A89-34736
Explicit Runge-Kutta method for unsteady rotor/stator interaction
p 509 A89-36912
Development of an efficient multigrid code for 3-D Navier-Stokes equations
[AIAA PAPER 89-1791] p 625 A89-42027
Vortex-dominated conical-flow computations using unstructured adaptively-refined meshes
[AIAA PAPER 89-1816] p 580 A89-42046
Multigrid solution of the Euler equations for three-dimensional cascade flows
[AIAA PAPER 89-1818] p 581 A89-42048
A cell-vertex multigrid method for the Navier-Stokes equations
[NASA-TM-101557] p 451 N89-20101
The 3-D Euler and Navier-Stokes calculations for aircraft components
p 498 N89-20950
An explicit Runge-Kutta method for turbulent reacting flow calculations
[NASA-TM-101945] p 536 N89-21799

RUNWAY ALIGNMENT

Microwave landing system instrumentation - A pilot's viewpoint
[SAE PAPER 881461] p 661 A89-47340

RUNWAY CONDITIONS

A summary of recent aircraft/ground vehicle friction measurement tests
[SAE PAPER 881403] p 336 A89-28196
Airline operations and the contaminated runway
[SAE PAPER 881460] p 658 A89-47339

Observations and forecasts for runway (pavement) surfaces
p 826 A89-54802
Verification of aerodrome forecasts
p 870 A89-54824
Very short-range aerodrome forecasts using regression techniques
p 870 A89-54831
Warm fog dissipation using large volume water sprays
[NASA-CASE-MFS-25962-1] p 693 N89-25242
A comparison of rutting behavior of asphalt concrete under the F-4C/G and F-15C/D aircraft
[AD-A208911] p 794 N89-27678

RUNWAY LIGHTS

Aircraft jet engine exhaust blast effects on Par-56 runway threshold lamp fixtures
[DOT/FAA/CT-89/4] p 694 N89-26018

RUNWAYS

Critical speed data for model floating ice roads and runways
p 134 A89-15706
Parallel runway operations are the key to increasing airport traffic capacity
p 224 A89-21817
Aircraft flexible pavement overlay design and evolution
[ETN-88-93230] p 117 N89-11759
Alternative modified binders for airfield pavements
[AD-A197902] p 249 N89-15124
Hard-surface runways in Antarctica
[AD-A200444] p 249 N89-15931
Instrument landing system mathematical modeling study for Orlando International Airport Runway 17R localizer, Orlando, Florida, revised airside docking plan (Scheme 3A)
[AD-A204722] p 526 N89-21783
Evaluation of barrier cable impact pad materials
[AD-A204356] p 542 N89-21811
Instrument landing system mathematical modeling study for Orlando International Airport Runway 35L localizer, Orlando, Florida, Final airside docking plan (Scheme 3A)
[AD-A205351] p 600 N89-23438
Investigations on the cracking behavior of joints in airfields and roads: Field investigations and laboratory simulations
[PB89-141279] p 619 N89-23479
Improved marking of taxiway intersections for Instrument Flight Rules (IFR) operations
[DOT/FAA/CT-TN89/23] p 619 N89-24330
Warm fog dissipation using large volume water sprays
[NASA-CASE-MFS-25962-1] p 693 N89-25242
Design criteria for aggregate-surfaced roads and airfields
[AD-A207059] p 694 N89-26019
Evaluation of nondestructive test equipment for airfield pavements. Phase 1: Calibration test results and field data collection
[AD-A207159] p 694 N89-26020
Acta Aeronautica et Astronautica Sinica, Volume 8, Number 12, December 1987 (selected articles)

p 157 A89-17183
- Satellite communications for air transport
p 225 A89-23819
- Ranging and Processing Satellite (RAPSAT)
p 340 A89-26738
- The emergence of satellite communication for commercial aircraft
[SAE PAPER 881370] p 308 A89-28183
- International Conference on Satellite Systems for Mobile Communications and Navigation, 4th, London, England, Oct. 17-19, 1988, Proceedings
p 552 A89-36576
- NTT's program of experimental mobile satellite system (EMSS) using ETS-V and preliminary results
p 552 A89-36585
- AvSat - The first dedicated aeronautical satellite communications system
p 524 A89-36592
- Inmarsat's aeronautical satellite communication system
p 552 A89-36593

Technical design and performance analysis of aeronautical satellite communication systems

- p 524 A89-36594
- Field trials of aeronautical satellite communication system
p 524 A89-36595
- Collaborative experiments involving a satellite based data link for air traffic services
p 525 A89-36596
- Communication and ranging systems for navigation experiment using Engineering Test Satellite V
p 525 A89-36618
- Aircraft position report demonstration plan
[AD-A196564] p 90 A89-11727
- Evaluation of low data rate voice CODECS for air traffic control applications
[DOT/FAA/CT-TN89/13] p 805 A89-27047
- SATELLITE DESIGN**
- Aeronautical satellite networks
p 160 A89-20117
- SATELLITE GROUND SUPPORT**
- Fiber optic links for airborne EHF SATCOM terminal applications
p 258 A89-24096
- The Locstar radiodetermination satellite system
p 830 A89-53660

SATELLITE GUIDANCE

- Guided around the earth by satellites - Extreme accuracy in navigation from space
p 224 A89-22808

SATELLITE INSTRUMENTS

- Low-temperature performance of a power-pack for a 2-watt ELT
p 709 A89-44016

SATELLITE NAVIGATION SYSTEMS

- Automatic dependent surveillance for oceanic air traffic control applications
p 384 A89-31564
- International Conference on Satellite Systems for Mobile Communications and Navigation, 4th, London, England, Oct. 17-19, 1988, Proceedings
p 552 A89-36576
- RAIM and GIC working together - The ultimate solution to the GPS integrity problem --- Receiver Autonomous Integrity Monitoring and GPS Integrity Channel
p 750 A89-49791
- Correction algorithms for differential GPS reference stations
p 750 A89-49792

SATELLITE NETWORKS

- Low-orbit navigation concepts
p 184 A89-19870
- Aeronautical satellite networks
p 160 A89-20117
- The Locstar radiodetermination satellite system
p 830 A89-53660
- Airborne lidar global positioning investigations
p 752 A89-28179

SATELLITE ORBITS

- Combining the use of geostationary and inclined orbit satellites for integrated communications and navigation applications
p 544 A89-36611

SATELLITE SOUNDING

- Dallas microburst storm environmental conditions determined from satellite soundings
p 888 A89-54779

SATELLITE TRACKING

- Deriving a geocentric reference frame for satellite positioning and navigation
p 466 A89-20330
- Determination of GPS orbits to submeter accuracy
p 466 A89-20331

SATURATION

- Design of feedback control systems for stable plants with saturating actuators
p 428 A89-28536

SCALE EFFECT

- Some types of scale effect in low-speed, high-lift flows
p 72 A89-13642

SCALE MODELS

- Cruise noise of the 2/9 scale model SR-7A propeller
p 59 A89-12561
- Testing and correlation on an advanced technology, bearingless rotor
p 182 A89-18900
- Numerical and experimental study of the crash behavior of helicopters and fixed-wing aircraft
p 309 A89-24919

- Acoustic characteristics of counterrotating fans from model scale tests
[AIAA PAPER 89-1142] p 477 A89-33769

- Nacelle/pylon interference study on a 1/17th-scale, twin-engine, low-wing transport model
[AIAA PAPER 89-2480] p 665 A89-46864

- Mach 4 testing of scramjet inlet models
[AIAA PAPER 89-2680] p 649 A89-47010

- Comparison of experimental and numerical results for transient electromagnetic fields induced on a scale model aircraft by current injection technique
[ONERA, TP NO. 1989-86] p 756 A89-48766

- Estimating electric field enhancement factors on an aircraft utilizing a small scale model: A method evaluation
p 21 A89-10454

- Flight control systems development and flight test experience with the HiMAT research vehicles
[NASA-TP-2822] p 248 A89-15929

- Control of nonlinear systems using partial dynamic inversion
p 406 A89-19310

- Investigation of the effects of increased sophistication of simulation of the atmospheric wind in wind tunnels
p 543 A89-22620

- Small scale model tests in small wind and water tunnels at high incidence and pitch rates. Volume 3: Water tunnel (HFF) data base
[AD-A208690] p 747 A89-27638

- Small scale model tests in small wind and water tunnels at high incidence and pitch rates. Volume 2: Small wind tunnel (ADF) data base
[AD-A208539] p 794 A89-27678

- Small scale model tests in small wind and water tunnels at high incidence and pitch rates. Volume 1: Test program and discussion of results
[AD-A208647] p 821 A89-28488

SCALING LAWS

- Problems in understanding aircraft icing dynamics
[AIAA PAPER 89-0735] p 302 A89-25553
- Flow structure and scaling laws in lateral wing-tip blowing
p 652 A89-47352
- Scaling effects in the static large deflection response of graphite-epoxy composite beams
[NASA-TM-101619] p 766 A89-26843

SCATTERING

- A microcomputer pollution model for civilian airports and Air Force bases. Model application and background
[AD-A199794] p 499 A89-20557

SCENE ANALYSIS

- Synthetic IR scene generation
p 125 A89-15887

SCHEDULES

- Software development guidelines
p 431 A89-18450

SCHEDULING

- Biting the bullet on aviation safety
p 3 A89-12537
- Airport activity statistics of certificated route air carriers
[AD-A199186] p 224 A89-15089
- Simulation evaluation of TIMER, a time-based, terminal air traffic, flow-management concept
[NASA-TP-2870] p 227 A89-15901

SCHLIEREN PHOTOGRAPHY

- A two-spark schlieren system for very-high velocity measurement
p 555 A89-38874
- The application of dynamic schlieren-photon correlation technique to a supersonic shear layer
p 515 A89-39474
- Observations of supersonic free shear layers
p 736 A89-50004

- The Schlieren Observation System installed in the NAL two-dimensional high-Reynolds number transonic wind tunnel and attempts to improve it
[NAL-TR-964] p 693 A89-28015

SCINTILLATION

- Airborne laser communications scintillation measurements and model - A comparison of results
p 89 A89-15797

SCOOPS

- Rotating air scoop as airfoil boundary-layer control
p 150 A89-20149

SCORING

- Trajectory scoring in rectangular coordinates using transponder-interrogator range and range rate data
[DE89-007005] p 466 A89-20119

SCREWS

- Ball and the jack --- ball bearing screw for aircraft actuator linear motion control
p 258 A89-24324

SEA ICE

- Critical speed data for model floating ice roads and runways
p 134 A89-15706

SEALERS

- Joint sealants for airport pavements. Phase 1: Laboratory and field investigations
[DOT/FAA/DS-89/2-PHASE-1] p 654 A89-28523

SEALS (STOPPERS)

- Annular honeycomb seals: Test results for leakage and rotordynamic coefficients - Comparisons to labyrinth and smooth configurations
[ASME PAPER 88-TRIB-35] p 493 A89-34794

- An entrance region friction factor model applied to annular seal analysis - Theory versus experiment for smooth and honeycomb seals
[ASME PAPER 88-TRIB-41] p 493 A89-34796

- Tribological properties of alumina-boria-silicate fabric from 25 C to 850 C
p 859 A89-54982

- Analysis of eccentric annular pressure seals: A new solution procedure for determining reactive force and rotor-dynamic coefficients
p 259 A89-15412

- Rotordynamic Instability Problems in High-Performance Turbomachinery, 1988
[NASA-CP-3026] p 558 A89-22891

- Annular honeycomb seals: Test results for leakage and rotordynamic coefficients; comparisons to labyrinth and smooth configurations
p 559 A89-22899

- Rotordynamic coefficients for labyrinth seals calculated by means of a finite difference technique
p 560 A89-22900

- Rotordynamic coefficients for stepped labyrinth gas seals
p 560 A89-22901

SERVOCONTROL

Sensitivity derivatives of flutter characteristics and stability margins for aeroservoelastic design
[AIAA PAPER 89-3467] p 845 A89-52562

SERVO MECHANISMS

The electrochemical erosion of servo valves by phosphate ester fire-resistant hydraulic fluids
p 48 A89-10573

Performance improvement of flight simulator servactuators
p 125 A89-15119

The variable structure design of aircraft servo loop
p 101 A89-16834

The possible realization of servomechanisms in active control systems
p 798 A89-47525

Assessment of the effects of reconfiguration on aeroservoelastic stability margins
[AIAA PAPER 89-2016] p 781 A89-49405

A microcomputer controlled optimal adaptive flight simulator servo system
p 811 A89-50782

Power efficient hydraulic systems. Volume 2: Hardware demonstration phase
[AD-A203900] p 473 N89-20128

Actuator rate saturation compensator
[AD-D013962] p 616 N89-23474

Aeroservoelastic wind-tunnel investigations using the Active Flexible Wing Model: Status and recent accomplishments
[NASA-TM-101570] p 609 N89-24313

Recent activities within the Aeroservoelasticity Branch at the NASA Langley Research Center
[NASA-TM-101582] p 609 N89-24314

Control surface dual redundant servomechanism
[AD-D014058] p 783 N89-26857

SET THEORY

Estimating projections of the playable set
p 430 A89-31459

Application of the theory of fuzzy sets to the two-criterion stochastic optimization of ribbed shells
p 556 A89-39823

SEXTANTS

Air navigation systems. I - Astronomical navigation in the air 1919-1969. Part II - Instruments
p 532 A89-39828

SH-3 HELICOPTER

A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 1: Basic use
[AD-A208058] p 835 A89-29339

A user's manual for the ARL mathematical model of the Sea King Mk-50 helicopter. Part 2: Use with ARL flight data
[AD-A208059] p 836 N89-29340

Identification of an adequate model for collective response dynamics of a Sea King helicopter in hover
[AD-A208060] p 836 N89-29341

SHADOWGRAPH PHOTOGRAPHY

Initial supersonic combustion facility measurements
[AIAA PAPER 89-2462] p 692 A89-46849

An investigation into the use of an existing shock tube as a driver for a hypersonic shock tunnel
[AD-A208483] p 793 N89-26872

SHAFTS (MACHINE ELEMENTS)

Analytical failure prediction of bolted connections in composite shafts
p 802 A89-49833

Finite difference analysis of rotor dynamic seal coefficients for an eccentric shaft position
p 580 N89-22906

SHAPE CONTROL

Shape sensitivity analysis of flutter response of a laminated wing
[AIAA PAPER 89-1267] p 389 A89-30750

Shape sensitivity analysis of wing static aeroelastic characteristics
p 755 A89-46654

Shape sensitivity analysis of flutter response of a laminated wing
[NASA-CR-181725] p 102 N89-11740

The efficacy of color-coded symbols to enhance air-traffic control displays
[AD-A201594] p 385 N89-19284

SHAPES

Radar cross section of arbitrarily shaped bodies of revolution
p 674 A89-45111

Treatment of body forces in boundary element design sensitivity analysis
p 705 N89-25187

Procedures for shape optimization of gas turbine disks
p 685 N89-25207

SHARP LEADING EDGES

Convective heat transfer in a boundary layer behind a shock wave propagating along a flat plate with a sharp leading edge - A calculation method and a comparison with experimental data
p 144 A89-18546

The structure of aerodynamic heating in three-dimensional shock wave/turbulent boundary layer interactions induced by sharp and blunt fins
[AIAA PAPER 89-1854] p 585 A89-42082

Numerical simulation of leading-edge vortex breakdown using an Euler code
[AIAA PAPER 89-2189] p 721 A89-47650

The role of the numerical dissipation on the computational Euler-equations-solutions for vortical flows
[AIAA PAPER 89-2232] p 725 A89-47687

SHEAR FLOW

Pressure cabins of elliptic cross section
p 100 A89-16322

Linear stability analysis of nonhomotropic, inviscid compressible flows
p 80 A89-16861

Direct numerical simulation of compressible free shear flows
[AIAA PAPER 89-0374] p 283 A89-25317

The influence of freestream vorticity on particle lift, drag, and heat transfer
[AIAA PAPER 89-0555] p 345 A89-25445

Finite element simulation of 3D turbulent free shear flows
p 294 A89-26946

Shear flow control by mechanical tabs
[AIAA PAPER 89-0994] p 416 A89-30505

Finite element modelling of sheared flow effects on the radiation characteristics of acoustic sources in a circular duct
[AIAA PAPER 89-1085] p 502 A89-33726

Highly-resolved flowfield induced by Mach reflection
p 512 A89-38125

Numerical study of the 3D separating flow about obstacles with sharp corners
p 641 A89-45363

A concentration probe for the study of mixing in supersonic shear flows
[AIAA PAPER 89-2459] p 703 A89-46846

Review of passive shear-flow control research for improved subsonic and supersonic combustion
[AIAA PAPER 89-2786] p 703 A89-47083

New instability modes for bounded, free shear flows
p 736 A89-49854

Turbulent shear flows 6; International Symposium, 6th, Universite de Toulouse III, France, Sept. 7-9, 1987, Selected Papers
p 861 A89-52943

Combustion-related shear-flow dynamics in elliptic supersonic jets
p 819 A89-53930

Velocity-scalar pdf methods for turbulent shear flows with two-point time scales
p 84 N89-11706

A spectral collocation solution to the compressible stability eigenvalue problem
[NASA-TP-2858] p 86 N89-12543

Analysis of the wake behind a propeller using the finite element method with a two-equation turbulence model
p 597 N89-24286

SHEAR LAYERS

Boundary-layer measurements on an airfoil at low Reynolds numbers
p 4 A89-10108

On the pairing process in an excited, plane, turbulent mixing layer
p 47 A89-10173

Navier-Stokes simulation for flow past an open cavity
p 78 A89-18096

Computational analysis of unsteady supersonic cavity flows driven by thick shear layers
p 145 A89-18803

Computational studies of a localized supersonic shear layer
[AIAA PAPER 89-0125] p 275 A89-25110

Structure of the compressible turbulent shear layer
[AIAA PAPER 89-0126] p 275 A89-25111

Numerical simulation of the growth of instabilities in supersonic free shear layers
[AIAA PAPER 89-0376] p 283 A89-25319

Effects of a downstream disturbance on the structure of a turbulent plane mixing layer
p 348 A89-27692

Variable geometry control of reacting shear layers
[AIAA PAPER 89-0979] p 411 A89-30492

Instantaneous profiles and turbulence statistics of supersonic free shear layers by Raman excitation + laser-induced electronic fluorescence (relief) velocity tagging of oxygen
p 440 A89-33424

Acoustic forcing of three dimensional shear layers
[AIAA PAPER 89-1063] p 501 A89-33712

Aero-optical analysis of compressible flow over an open cavity
p 509 A89-36914

The application of dynamic schlieren-photon correlation technique to a supersonic shear layer
p 515 A89-39474

An experimental study of a reattaching supersonic shear layer
[AIAA PAPER 89-1801] p 579 A89-42036

Experimental study of free-shear layer transition above a cavity at Mach 3.5
[AIAA PAPER 89-1813] p 580 A89-42043

Separation shock motion and ensemble-averaged wall pressures in a Mach 5 compression ramp interaction
[AIAA PAPER 89-1853] p 585 A89-42081

Experimental study of spreading rate enhancement of high Mach number turbulent shear layers
[AIAA PAPER 89-2458] p 648 A89-46845

A concentration probe for the study of mixing in supersonic shear flows
[AIAA PAPER 89-2459] p 703 A89-46846

Compressibility and shock wave interaction effects on free shear layers
[AIAA PAPER 89-2460] p 648 A89-46847

Observations of supersonic free shear layers
p 736 A89-50004

Analysis of the expansion-fan flowfield for holes in a hypersonic configuration
p 738 A89-50540

The design of the GARTEUR low aspect-ratio wing for use in the validation of shear layer and overall flow prediction methods
p 394 A89-18652

Flame driving of longitudinal instabilities in liquid fueled dump combustors
[AD-A201293] p 412 N89-19392

Characteristic time model validation
[AD-A201374] p 426 N89-19510

Subharmonic and fundamental high amplitude excitation of an axisymmetric jet
[NASA-TM-101948] p 452 N89-20920

Investigation of the flowfield created by the interaction of a sonic jet and a co-flowing supersonic stream
[AD-A205823] p 593 N89-23425

Design and calibration of the mixing layer and wind tunnel
[NASA-CR-185472] p 792 N89-26866

Numerical simulation of control of supersonic shear layers
[AD-A209703] p 747 N89-27639

SHEAR PROPERTIES

Integrated aerodynamic/dynamic optimization of helicopter rotor blades
[NASA-TM-101553] p 473 N89-20982

SHEAR STRAIN

A geometrically nonlinear theory of shear deformable laminated composite plates and its use in the postbuckling analysis
p 122 A89-13538

SHEAR STRENGTH

Test specimens for bearing and by-pass stress interaction in carbon fibre reinforced plastic laminates
p 342 N89-17696

SHEAR STRESS

Effect of adhesive debond on stress-intensity factors in bonded composite panels
p 45 A89-10091

Turbulence measurements with symmetrically bent V-shaped hot-wires. I - Principles of operation. II - Measuring velocity components and turbulent shear stresses
p 121 A89-13378

Nondestructive testing of composite aircraft structures with infrared and shearographic imaging technologies
p 189 A89-18891

NASTRAN modelling of honeycomb sandwich panels subjected to picture frame shear
p 415 A89-29474

Effects of transverse shear on large deflection random response of symmetric composite laminates with mixed boundary conditions
[AIAA PAPER 89-1356] p 418 A89-30831

Liquid crystals for surface shear stress visualization on wind turbine airfoils
[DE89-017117] p 267 N89-15730

SHEARING

Sheared wing-tip aerodynamics - Wind-tunnel and computational investigation
p 361 A89-29162

SHEATHS

Ensuring the quality of the covering surface in the case of riveted joints with high radial interference
p 492 A89-34159

SHELL STABILITY

The load-bearing capacity of closed-profile oblong cylindrical shells made of a metal/polymer composite laminate
p 492 A89-34128

Formulation and solution of axisymmetric problems in the statics of multilayer shells of revolution with contact interaction between layers
p 492 A89-34129

SHELL THEORY

Quadrilateral Coons surface shell finite element with discrete principal curvature lines
p 122 A89-13563

Local/global structural analysis by transition elements
p 253 A89-21138

Computational procedures for postbuckling of composite shells
p 628 N89-24642

SHELLS (STRUCTURAL FORMS)

An approximate method for sonic fatigue analysis of plates and shells
p 565 A89-39515

Study of the dynamic behaviour of stiffened composite fuselage shell structures
p 382 N89-18434

Computational procedures for postbuckling of composite shells
p 628 N89-24642

SHELTERS

Avionics testing in the military bare-base environment
p 141 A89-18011

SHIELDING

Lightning tests to measure the bulk current levels associated with the electronic engine control of a turboprop commuter transport
p 21 N89-10457

- Electrification of hovering helicopters p 22 N89-10460
- Indirect effects on electronic and mechanical systems installed in carbon fibre compound aircraft structures p 22 N89-10492

Nonlinear control of a supermaneuverable aircraft [AIAA PAPER 89-3486] p 845 A89-52579
Navier-Stokes simulation of transonic wing flow fields using a zonal grid approach p 13 N89-10022
Linear and nonlinear interpretation of CV-580 lightning data p 21 N89-10451
Lightning tests on an all-composite helicopter p 21 N89-10452
Numerical investigation of a jet in ground effect using the fortified Navier-Stokes scheme p 16 N89-10857
A simulator investigation of the use of digital data link for pilot/ATC communications in a single pilot operation [NASA-TP-2837] p 90 N89-11726
A two-dimensional numerical simulation of a supersonic, chemically reacting mixing layer p 86 N89-12542
[NASA-TP-4055] p 86 N89-12542
LORAN C Offshore Flight Following (LOFF) in the Gulf of Mexico p 91 N89-12558
[AD-A197179] p 91 N89-12558
An evaluation of ground collision avoidance system algorithm p 91 N89-12560
[AD-A197831] p 91 N89-12560
Lightning simulation test technique evaluation [DOT/FAA/CT-87/38] p 156 N89-13415
Investigation of a moving-model technique for measuring ground effect p 154 N89-14217
[NASA-TM-4080] p 154 N89-14217
Fire extinguishing agent evaluation in the Aircraft Engine Nacelle Fire Test Simulator (AENFTS) p 157 N89-14227
[AD-A198523] p 157 N89-14227
Simulation of 3-D viscous flow within a multi-stage turbine p 178 N89-14238
[NASA-TM-101376] p 178 N89-14238
Use of the Terminal Area Simulation System (TASS) to study microburst wind shears p 197 N89-14899
Application of a lower-upper implicit scheme and an interactive grid generation for turbomachinery flow field simulations p 219 N89-15077
[NASA-TM-101412] p 219 N89-15077
Simulated final approach path captures using the microwave landing system p 227 N89-15099
[NASA-CR-181696] p 227 N89-15099
High alpha feedback control for agile half-loop maneuvers of the F-18 airplane p 234 N89-15106
[NASA-CR-181360] p 234 N89-15106
In-flight simulation investigation of rotorcraft pitch-roll cross coupling p 246 N89-15118
[NASA-TM-101059] p 246 N89-15118
Simulation evaluation of TIMER, a time-based, terminal air traffic, flow-management concept p 227 N89-15901
[NASA-TP-2870] p 227 N89-15901
Accuracy requirements for high-speed test with engine simulation on transport aircraft models in the NLR-HST p 338 N89-16870

Validation of a multi-block Euler flow solver with propeller-slipstream flows p 373 N89-18649
Large-scale viscous simulation of laminar vortex flow over a delta wing p 374 N89-18660
Experimental simulation of transonic vortex-airfoil interactions p 378 N89-19274
[AD-A201934] p 378 N89-19274
High Reynolds number incompressible flow simulation about parachute canopies and similar bluff bodies p 450 N89-20096
Simulation analysis on ceramic gas turbine [DE88-756469] p 548 N89-21926
Aeroelastic modeling for the FIT (Functional Integration Technology) team F/A-18 simulation p 670 N89-25192

Hose reel monitor for inflight refueling system [AD-D014054] p 765 N89-26836
Aircraft propeller induced structure-borne noise [NASA-CR-4255] p 876 N89-29155

SIMULATORS

Aircraft and cloud sky simulator p 429 A89-29529
A comparative evaluation of RPD (Rotary Particle Depositor) and ferrographic diagnostic methods for turbine engine lubricant samples p 38 N89-10044
[AD-A196207] p 38 N89-10044
Optical fire detector testing in the aircraft engine nacelle fire test simulator p 168 N89-13427
[AD-A197974] p 168 N89-13427
Fire extinguishing agent evaluation in the Aircraft Engine Nacelle Fire Test Simulator (AENFTS) p 157 N89-14227
[AD-A198523] p 157 N89-14227
Fabrication and testing of lightweight hydraulic system simulator hardware. Phase 2: Addendum p 184 N89-14243
[AD-A198524] p 184 N89-14243
A real-time simulator of a turbofan engine [NASA-TM-100869] p 481 N89-20995
Transonic operational characteristics and performance [NAL-TR-968] p 591 N89-23408
Simulator evaluation of a display for a Takeoff Performance Monitoring System p 615 N89-23469
[NASA-TP-2908] p 615 N89-23469
Computational structural mechanics engine structures computational simulator p 866 N89-29792
Interfacing modules for integrating discipline specific structural mechanics codes p 866 N89-29793

SINE WAVES

Ground vibration test results of a JetStar airplane using impulsive sine excitation [NASA-TM-100448] p 236 N89-15909

SINGLE CRYSTALS

The high temperature oxidation behavior of the single crystal Ni-base alloy M002 mod. with and without protective coatings p 43 A89-11216
Tensile behaviour of a nickel-based single crystal superalloy - Effects of temperature and orientation [ONERA, TP NO. 1988-7] p 409 A89-29203
Modelling of viscoplastic anisotropic behaviour of single crystals [ONERA, TP NO. 1988-127] p 409 A89-29278
Second-generation nickel-base single crystal superalloy p 546 A89-36424
Enhanced rupture properties in advanced single crystal alloys p 546 A89-36425
Constitutive modelling of single crystal and directionally solidified superalloys p 120 N89-12912
Constitutive modelling of single crystal and directionally solidified superalloys p 342 N89-17325
High temperature constitutive and crack initiation modeling of coated single crystal superalloys p 342 N89-17334
Development of stress and lifing criteria for single crystal turbine blades p 549 N89-22663

SINGLE STAGE TO ORBIT VEHICLES

Conceptual study of turbo-engines for horizontal takeoff and landing space plane [IAF PAPER 88-253] p 184 A89-17745
NASP natural environment definitions for design [AIAA PAPER 89-0764] p 339 A89-25568
Fundamental aspects of an aerospaceplane p 544 A89-38234
Computational requirements for hypersonic flight performance estimates --- of space vehicles [AIAA PAPER 89-1670] p 620 A89-43193
Propulsion cycles for transatmospheric accelerators p 840 A89-54328

SINGULARITY (MATHEMATICS)

A treatment of multivalued singularity of sharp corner in inviscid hypersonic flow p 76 A89-15666
Reduced conservative singular value analysis for robustness p 197 A89-17489
Investigation of internal singularity methods for multielement airfoils p 294 A89-27748
Three-dimensional singular points in aerodynamics [NASA-TM-100045] p 457 N89-20964

SISO (CONTROL SYSTEMS)

On the design of nonlinear controllers for flight control systems [AIAA PAPER 89-3489] p 845 A89-52582
Stability robustness improvement of direct eigenspace assignment based feedback systems using singular value sensitivities [NASA-CR-182302] p 784 N89-27672

SITE SELECTION

Hard-surface runways in Antarctica [AD-A200444] p 249 N89-15931

SIZE (DIMENSIONS)

Compact holographic sight p 125 A89-15785

SIZING

Aircraft configuration analysis/synthesis expert system - A new approach to preliminary sizing of combat aircraft p 96 A89-13668
HASA: Hypersonic Aerospace Sizing Analysis for the preliminary design of aerospace vehicles [NASA-CR-182226] p 234 N89-15107

SKIN (STRUCTURAL MEMBER)

Damped aircraft components for minimum weight p 98 A89-15099
Age creep forming aluminum aircraft skins p 624 A89-41584
Sensitive skins p 837 A89-52974
Lightning tests on an all-composite helicopter p 21 N89-10452
Typical joints in a wing structure p 317 N89-17693
Test specimens for bearing and by-pass strass interaction in carbon fibre reinforced plastic laminates p 342 N89-17696
Composite transport wing technology development [NASA-CR-178409] p 766 N89-26842

SKIN FRICTION

A vector potential model for vortex formation at the edges of bodies in flow p 127 A89-17122
Toward lower drag with laminar flow technology p 371 A89-32301
Riblet drag at flight conditions p 515 A89-39196
The effect of an adverse pressure gradient on the drag reduction performance of manipulators p 571 A89-41771
Flat plate reduction by turbulence manipulation p 737 A89-50008
Structural and acoustic noise generated by a large-eddy break-up device p 812 A89-51453
Experimental research on swept shock wave/boundary layer interactions p 53 N89-11189
Studies of the structure of attached and separated regions of viscous/inviscid interaction and the effects of combined surface roughness and blowing in high Reynolds number hypersonic flows p 518 N89-21774
[AD-A204364] p 518 N89-21774
Low density flow effects for hypervelocity vehicles [AD-A206218] p 747 N89-27633

SKIN TEMPERATURE (NON-BIOLOGICAL)

Infrared technique to measure the skin temperature on an electrothermal de-icer - Comparison with numerical simulations [AIAA PAPER 89-0760] p 303 A89-25566

SLEDS

Multi-axis seat ejection (MASE) sled p 26 A89-10466
Schlieren measurements at the 10,000-foot sled track [DE88-012748] p 42 N89-10899

SLENDER BODIES

Engineering analysis of slender-body aerodynamics using Sychev similarity parameters p 4 A89-10108
The formation mechanism of the asymmetric spatial vortex of slender bodies at high angle of attack [SAE PAPER 872435] p 7 A89-10652
Experimental study on low-speed aerodynamic characteristics of non-axisymmetric slender bodies p 151 A89-20635
Similarity for high-angle-of-attack subsonic/transonic slender-body aerodynamics p 218 A89-24308
Numerical simulation of vortex unsteadiness on slender bodies of revolution at large incidence [AIAA PAPER 89-0195] p 276 A89-25170
Effect of nose bluntness on flow field over slender bodies in hypersonic flows [AIAA PAPER 89-0270] p 279 A89-25228
Viscous shock-layer solutions for the low-density hypersonic flow past long slender bodies [AIAA PAPER 88-0460] p 295 A89-28251
Computational modeling of axisymmetric propeller-hull interaction in slender low drag bodies [AIAA PAPER 89-2674] p 649 A89-47004
Effects of nose bluntness, roughness, and surface perturbations on the asymmetric flow past slender bodies at large angles of attack [AIAA PAPER 89-2236] p 725 A89-47690

- Navier-Stokes computations of symmetric and asymmetric vortex shedding around slender bodies
[AIAA PAPER 89-3397] p 732 A89-49097
- Wind-tunnel investigation of the low-speed aerodynamics of slender accelerator-type configurations
[SAE PAPER 881356] p 742 A89-51354
- Transonic flows with vorticity transport around slender bodies
p 820 A89-53949
- Direct simulation of hypersonic transitional flows over blunt slender bodies
p 82 N89-11696
- Viscous shock layer analysis of hypersonic flows over long slender vehicles
p 451 N89-20097
- Low density flow effects for hypervelocity vehicles
[AD-A206218] p 747 N89-27633
- SLENDER CONES**
- Results of an industry representative study of code to code validation of axisymmetric configurations at hypervelocity flight conditions
[AIAA PAPER 88-2691] p 80 A89-16527
- The computation of Navier-Stokes solutions exhibiting asymmetric vortices
[AIAA PAPER 89-1817] p 580 A89-42047
- Study of hypersonic flow past sharp cones
[AIAA PAPER 89-1713] p 591 A89-43228
- Asymmetric separated flows about sharp cones in a supersonic stream
p 643 A89-45402
- SLENDER WINGS**
- Aspects of the control and stabilization of supersonic commercial aircraft
[DGLR PAPER 87-122] p 39 A89-10519
- Transonic investigations on high aspect ratio forward- and aft-swept wings
p 68 A89-13527
- Basic analysis of the flow fields of slender delta wings using the Euler equations
p 72 A89-13644
- A discrete vortex method for slender wing vortex-sheet computation
p 80 A89-16835
- Analytic prediction of the maximum amplitude of slender wing rock
p 218 A89-24305
- The separated flow field on a slender wing undergoing transient pitching motions
[AIAA PAPER 89-0194] p 276 A89-25169
- The effects of aspect ratio on the stall of a finite wing
[AIAA PAPER 89-0570] p 296 A89-28434
- Sheared wing-tip aerodynamics - Wind-tunnel and computational investigation
p 361 A89-29162
- Influence of pitching motion on subsonic wing rock of slender delta wings
p 514 A89-39187
- Vorticity equation solutions for slender wings at high incidence
[AIAA PAPER 89-1989] p 577 A89-41832
- Development of an analytical model of wing rock for slender delta wings
p 728 A89-48658
- Analytical study of the subsonic wing-rock phenomenon for slender delta wings
p 782 A89-50058
- On the structure, interaction, and breakdown characteristics of slender wing vortices at subsonic, transonic, and supersonic speeds
[AIAA PAPER 89-3345] p 739 A89-50806
- Numerical simulation of rolling up of leading/trailing-edge vortex sheets for slender wings
p 819 A89-53926
- Optimization of slender wings for center-of-pressure shift due to change in Mach number
p 154 N89-14897
- Trailing edge strips to reduce the drag of slender wings
p 221 N89-15889
- Observed Reynolds number effects on airfoils and high aspect ratio wings at transonic flow conditions
[NLR-MP-88006-U] p 451 N89-20102
- Wind tunnel tests on flutter control of a high-aspect-ratio cantilevered wing
[NAL-TR-978] p 616 N89-24321
- SLIP FLOW**
- Supersonic low-density flow over airfoils
[AIAA PAPER 89-0530] p 286 A89-25424
- 'Hypersonic slip flows' and issues on extending continuum model beyond the Navier-Stokes level
[AIAA PAPER 89-1663] p 590 A89-43187
- SLIPSTREAMS**

Investigation of a small solid fuel ramjet combustor p 544 A89-39028
Combustion behavior of boron-based BAMO/MMMO fuel-rich solid propellants [AIAA PAPER 89-2884] p 696 A89-47149
The influence of swirl and fuel composition of boron-containing fuels on combustion in a solid fuel ramjet combustion chamber [AIAA PAPER 89-2885] p 683 A89-47150
Diagnostic techniques for propulsion systems p 839 A89-52960
- SOLID PROPELLANT ROCKET ENGINES**
Effects of bypass air on the combustion of boron particles in a solid fuel ramjet [AIAA PAPER 89-2886] p 683 A89-47151
- SOLID ROCKET PROPELLANTS**
Aviation and space news [AD-A197702] p 62 N89-11693
- SOLID STATE DEVICES**
The effect of technology on the supportability and cost of avionics equipment [AD-A200450] p 238 N89-15912
- SOLID-SOLID INTERFACES**
A study of contact interaction in aircraft structural elements p 188 A89-18644
- SOLIDIFICATION**
Rapidly solidified Al-Ti alloys via advanced melt spinning p 621 A89-41888
Measurements of diffusion limited solidification at varying gravity [AIAA PAPER 89-1755] p 626 A89-43266
Evaluation of RST (Rapidly Solidified Technology) structural durability and life cycle costs [AD-A199336] p 252 N89-16031
- SOLUTIONS**
Solution and sensitivity analysis of a complex transcendental eigenproblem with pairs of real eigenvalues [NASA-CR-182241] p 193 N89-13819
- SOLVENTS**
The effects of plastic media blasting paint removal on the microstructure of graphite/epoxy composite materials [AD-A204801] p 550 N89-22688
- SONIC BOOMS**
Review of sonic boom theory [AIAA PAPER 89-1105] p 564 A89-36219
Detailed design specification for a prototype Assessment System for Aircraft Noise (ASAN) [AD-A197936] p 204 N89-14818
Status of sonic boom methodology and understanding [NASA-CP-3027] p 592 N89-23415
Noise and sonic boom impact technology. PCBOOM computer program for sonic boom research, volume 1 [AD-A206290] p 594 N89-23429
Noise and sonic boom impact technology. PCBOOM computer program for sonic boom research. Volume 2: Program Users/Computer operations manual [AD-A206291] p 594 N89-23430
- SONIC NOZZLES**
An experimental study of sonic and supersonic nozzles and their application to high pressure ejectors for aircraft attitude control p 260 N89-16117
- SOOT**
Measurements of gas turbine combustor and engine augmentor tube sooting characteristics [AD-A199768] p 328 N89-16821
Fuels combustion research [AD-A204181] p 490 N89-21071
- SORTIE SYSTEMS**
Combat aircraft mission tradeoff models for conceptual design evaluation p 102 N89-11736
- SOUND FIELDS**
Noise field of a propeller with angular inflow p 59 A89-11102
A lifting line model for propeller noise [AIAA PAPER 89-1079] p 502 A89-33723
An approximate method for sonic fatigue analysis of plates and shells p 585 A89-39515
Active control of sound fields in elastic cylinders by multicontrol forces p 632 A89-40904
Structure of artificial perturbations generated by an external acoustic source in a supersonic boundary layer p 740 A89-50933
The acoustics of a lined duct with flow [NLR-TR-87002-U] p 139 N89-12363
A spectral method for the computation of propeller acoustics [NLR-MP-87038-U] p 139 N89-12364
- SOUND GENERATORS**
Sound generated from the interruption of a steady flow by a supersonically moving aerofoil p 82 A89-17063
Contributions to the theory of sound production by vortex-airfoil interaction, with application to vortices with finite axial velocity defect p 203 A89-19672
On sound generated when a vortex is chopped by a circular airfoil p 585 A89-39514
- SOUND PRESSURE**
The effects of nonlinear damping on the large deflection response of structures subjected to random excitation p 193 N89-13796
Users' manual for the Langley high speed propeller noise prediction program (DFP-ATP) [NASA-CR-4208] p 204 N89-14820
- SOUND PROPAGATION**
Fuselage boundary layer effects on sound propagation and scattering [AIAA PAPER 89-1098] p 503 A89-33738
- SOUND TRANSMISSION**
Analyses of the transmission of sound into the passenger compartment of a propeller aircraft using the finite element method p 95 A89-13635
Sound transmission into a finite, closed, cylindrical shell having an absorbing layer on its inner surface p 138 A89-15088
Comparisons of calculation methods for determining atmospheric absorption of sound emitted by aircraft p 134 A89-15090
Transmission loss of double wall panels containing Helmholtz resonators p 138 A89-15091
Influence of a floor on sound transmission into an aircraft fuselage model p 166 A89-20135
Acoustic transmissibility of advanced turboprop aircraft windows p 204 A89-20143
Sound transmission of stiffened composite panels - Hydrothermal effect [AIAA PAPER 89-1358] p 434 A89-30833
Installation effects on propeller wake/vortex induced structure-borne noise transmission [AIAA PAPER 89-1072] p 468 A89-33717
Reduction of sound transmission through fuselage walls by alternate resonance tuning (A.R.T.) [AIAA PAPER 89-1046] p 631 A89-40470
Sound attenuation and speech transmission quality of five types of headsets [IZF-1987-23] p 193 N89-14373
Evaluation of the ride quality of a light twin engine airplane using a ride quality meter [NASA-TP-2913] p 507 N89-22588
Noise and sonic boom impact technology. PCBOOM computer program for sonic boom research, volume 1 [AD-A206290] p 594 N89-23429
Interior noise control ground test studies for advanced turboprop aircraft applications [NASA-CR-181819] p 633 N89-24141
Aircraft propeller induced structure-borne noise [NASA-CR-4255] p 876 N89-29155
- SOUND WAVES**
Effects of wind-tunnel wall absorption on acoustic radiation of propellers p 266 A89-22285
An experimental and theoretical investigation of the propagation of sound waves through a turbulent boundary layer p 266 A89-22785
- Exact and simplified computation of noise radiation by an annular duct [ONERA, TP NO. 1988-102] p 434 A89-29254
An acoustic experimental and theoretical investigation of single disc propellers [AIAA PAPER 89-1146] p 632 A89-40478
Structural and acoustic noise generated by a large-eddy break-up device p 812 A89-51453
- SOUND-SOUND INTERACTIONS**
The effect of front-to-rear propeller spacing on the interaction noise at cruise conditions of a model counterrotation propeller having a reduced diameter aft propeller [NASA-TM-101329] p 60 N89-10603
- SOUNDING**
The electrical structure of thunderstorm anvils p 56 N89-10470
- SOVIET SPACECRAFT**
Aerospace glasnost p 268 A89-24321
- SPACE BASED RADAR**
Airborne rain mapping radar p 837 A89-53313
- SPACE CHARGE**
New electric field instrumentation and the effects of space charge at Kennedy Space Center p 55 N89-10444
- SPACE COMMERCIALIZATION**
Aerothermodynamics - The required tools [SAE PAPER 880928] p 12 A89-12316
- SPACE ENVIRONMENT SIMULATION**
New application possibilities for balloon-borne case studies - MIKROBA (Microgravity by balloons) [DGLR PAPER 87-069] p 184 A89-20233
- SPACE EXPLORATION**
Aerospace vehicle design, Spacecraft Section final project reports [NASA-CR-184742] p 472 N89-20122
- SPACE FLIGHT**
Yearbook 1987 II; DGLR, Annual Meeting, Berlin, Federal Republic of Germany, Oct. 5-7, 1987, Reports p 142 A89-20226
- SPACE INDUSTRIALIZATION**
Investigations in the history and theory of the development of aviation and rocket and space science and technology. No. 6 --- Russian book p 879 A89-52923
- SPACE LAW**
Hypersonic flight - The need for a new legal regime p 834 A89-41855
Annals of air and space law. Volume 13 --- Book p 714 A89-45175
Transnational legal problems for commercial hypersonic flight p 878 A89-54356
- SPACE MAINTENANCE**
Low energy cured composite repair system p 410 A89-28957
- SPACE MISSIONS**
From Kitty Hawk to the year 2000 [SAE PAPER 872395] p 1 A89-10628
- SPACE NAVIGATION**
An overview of space-based radionavigation systems p 160 A89-20122
Navigation - Ships to space p 224 A89-21178
PLANS '88 - IEEE Position Location and Navigation Symposium, Orlando, FL, Nov. 29-Dec. 2, 1988, Record p 339 A89-28701
- SPACE PLASMAS**
Merging of aircraft vortex trails - Similarities to magnetic field merging p 356 A89-26630
- SPACE PROCESSING**
Measurements of diffusion limited solidification at varying gravity [AIAA PAPER 89-1755] p 626 A89-43266
- SPACE PROGRAMS**
Aerospace '88 p 268 A89-21796
Recent progress in the National Aerospace Plane program p 588 A89-41651
International Conference on Hypersonic Flight in the 21st Century, 1st, University of North Dakota, Grand Forks, Sept. 20-23, 1988, Proceedings p 855 A89-54326
- SPACE SHUTTLE BOOSTERS**
Space Shuttle propulsion performance reconstruction from flight data [AIAA PAPER 89-3355] p 795 A89-49059
- SPACE SHUTTLES**
Developing error-free software p 201 A89-19679
Aerospace glasnost p 268 A89-24321
Analysis of extreme wind shear [AIAA PAPER 89-0710] p 352 A89-25549
Flying qualities from early airplanes to the Space Shuttle p 614 A89-43051
Stability and control of hypervelocity vehicles [AD-A205160] p 540 N89-21807

SPACE STATION STRUCTURES

Research and technology plans for FY 1989 and accomplishments for FY 1988 --- Structural Mechanics Division
[NASA-TM-101592] p 807 N89-28035

SPACE STATIONS

CSM research: Methods and application studies
p 867 N89-29794

SPACE TRANSPORTATION

Aerothermodynamics - The required tools
[SAE PAPER 880928] p 12 A89-12316
Aerospace '88 p 268 A89-21796
The prospects for European aerospace transporters. II
- A design concept for a minimum-cost aerospace transporter p 408 A89-30536
Economic analysis of a beam-powered, personalized global aerospace transportation system
[AIAA PAPER 89-2443] p 714 A89-46835
Seenger aerospaceplane gains momentum
p 855 A89-52973

SPACE TRANSPORTATION SYSTEM

Seenger II, a hypersonic flight and space transportation system
p 117 A89-13570
Design and integration of air-breathing propulsion systems of space transports and hypersonic aircraft
[DGLR PAPER 87-103] p 176 A89-20241

SPACEBORNE LASERS

Past progress and future advances in space laser communications
p 250 A89-24068
Automatic acquisition and tracking for laser communication using video techniques
p 225 A89-24070

SPACECRAFT

Operating safety of automatic objects --- Russian book
p 49 A89-10714

SPACECRAFT CHARGING

Triggering of lightning by the Atlas Centaur vehicle
p 55 N89-10438

SPACECRAFT CONFIGURATIONS

Numerical methods for hypersonic flows
[DGLR PAPER 87-084] p 150 A89-20235
Technology requirements for hypersonic airbreathing aircraft
p 468 A89-33626

SPACECRAFT CONSTRUCTION MATERIALS

U.S. government policies and hypersonic flight in the 21st century
p 634 A89-41654
Space age metals technology; Proceedings of the Second International SAMPE Metals and Metals Processing Conference, Dayton, OH, Aug. 2-4, 1988
p 696 A89-45927

Aerospace materials for the twenty-first century
p 796 A89-49627

Aerospace investment casting in the U.S.A. 1988
p 857 A89-52022

Aeronautical applications of high-temperature superconductors
[AIAA PAPER 89-2142] p 840 A89-53304

Materials and structures for 2000 and beyond: An attempted forecast
[DFVLR-MITT-89-02] p 708 N89-25358

Aeronautical applications of high-temperature superconductors
[NASA-TM-102311] p 686 N89-26008

SPACECRAFT CONTROL

Feedback control of vibrations in an extendible cantilever sweptback wing
p 332 A89-26193
Voice of authority --- control systems for space vehicles
p 544 A89-37646

AIAA Guidance, Navigation and Control Conference, Boston, MA, Aug. 14-16, 1989, Technical Papers. Parts 1 & 2
p 842 A89-52526

SPACECRAFT DESIGN

International Pacific Air and Space Technology Conference, Melbourne, Australia, Nov. 13-17, 1987, Proceedings
[SAE P-208] p 1 A89-10627

From Kitty Hawk to the year 2000
[SAE PAPER 87-2395] p 1 A89-10628

Aerodynamic design and performance of a bent-axis geometry vehicle
[AIAA PAPER 87-2491] p 42 A89-11119

Structural reliability in aerospace design
p 340 A89-27175

The prospects for European aerospace transporters. II - A design concept for a minimum-cost aerospace transporter
p 408 A89-30536

Technology requirements for hypersonic airbreathing aircraft
p 468 A89-33626

New developments in air and space research - Contributions of the German aircraft and space industry to advanced programs and international cooperation
[MBB-Z-177-88-PUB] p 635 A89-42927

The National Aero-Space Plane program
[AIAA PAPER 89-5053] p 715 A89-48184

NASP aerodynamics
[AIAA PAPER 89-5013] p 742 A89-51338

Aeronautical applications of high-temperature superconductors
[AIAA PAPER 89-2142] p 840 A89-53304

HASA: Hypersonic Aerospace Sizing Analysis for the preliminary design of aerospace vehicles
[NASA-CR-182226] p 234 A89-15107

Feasibility of flight experiments and instrumentation hardware for in-flight hypersonic boundary-layer measurements
[NASA-CR-184896] p 517 N89-21772

Transition to turbulence in laminar hypersonic flow
p 522 N89-22830

Recent Advances in Multidisciplinary Analysis and Optimization, part 3
[NASA-CP-3031-PT-3] p 670 N89-25201

Aeronautical applications of high-temperature superconductors
[NASA-TM-102311] p 686 N89-26008

SPACECRAFT INSTRUMENTS
Fiber-optic sensor systems for aerospace applications
p 47 A89-10359

Instrumentation of hypersonic structures - A review of past applications and needs for the future
[AIAA PAPER 88-2612] p 117 A89-16526

Laser altimetry measurements from aircraft and spacecraft
p 624 A89-41691

SPACECRAFT LAUNCHING
Analysis of extreme wind shear
[AIAA PAPER 89-0710] p 352 A89-25549

National lightning detection - A real-time service to aerospace
[AIAA PAPER 89-0787] p 352 A89-25578

SPACECRAFT MAINTENANCE
Technical evaluation report
p 548 N89-22655

SPACECRAFT MODELS
Design, simulation and laboratory test of an inertial system for measuring the attitude and narrow-spaced motions
[ESA-TT-1104] p 250 N89-15160

SPACECRAFT PERFORMANCE
Flying qualities from early airplanes to the Space Shuttle
p 614 A89-43051

SPACECRAFT POWER SUPPLIES
Aerospace power systems technology; Proceedings of the Aerospace Technology Conference and Exposition, Anaheim, CA, Oct. 3-6, 1988
[SAE SP-758] p 324 A89-28254

SPACECRAFT PROPULSION
Design and integration of air-breathing propulsion systems of space transports and hypersonic aircraft
[DGLR PAPER 87-103] p 176 A89-20241

Combined propulsion for hypersonic and space vehicles
p 322 A89-24917

Probabilistic constitutive relationships for material strength degradation models
[AIAA PAPER 89-1368] p 419 A89-30843

Heat transfer in aerospace propulsion
p 862 A89-53282

The Trisicon aerospace motor - Propulsion vehicle for the 21st century
p 856 A89-54359

Application of Advanced Material for Turbomachinery and Rocket Propulsion
[AGARD-CP-449] p 548 N89-22654

Technical evaluation report
p 548 N89-22655

Application of advanced materials for turbomachinery and rocket propulsion
p 549 N89-22656

SPACECRAFT RELIABILITY
Modern avionics connector unreliability
[AIAA PAPER 89-2099] p 768 A89-49457

SPACECRAFT STABILITY
Integrated structure/control law design by multilevel optimization
[AIAA PAPER 89-3470] p 873 A89-52564

Integrated structure/control law design by multilevel optimization
[NASA-TM-101623] p 712 N89-26623

SPACECRAFT STRUCTURES
Quadrilateral Coons surface shell finite element with discrete principal curvature lines
p 122 A89-13563

Vibrations in aerospace structures - Prediction, prevention and control
[ONERA, TP NO. 1989-9] p 553 A89-37631

Eigensolution of periodic assemblies of multi-mode component systems
p 556 A89-39519

Technology of structures maintains high standards
p 637 A89-44642

Materials and structures for 2000 and beyond: An attempted forecast
[DFVLR-MITT-89-02] p 708 N89-25358

SPACECRAFT SURVIVABILITY
Fire behavior and risk analysis in spacecraft
[NASA-TM-100944] p 42 N89-10111

SPACECRAFT TEMPERATURE
Anodized aluminum and aluminum alloy coatings for thermal control
p 547 A89-38153

SPANWISE BLOWING

A flow visualization and aerodynamic force data evaluation of spanwise blowing on full and half span delta wings
[AIAA PAPER 89-0192] p 276 A89-25167

Flow structure and scaling laws in lateral wing-tip blowing
p 652 A89-47352

Unsteady aerodynamics and control of delta wings with tangential leading-edge blowing
[AIAA PAPER 89-3374] p 731 A89-49078

The control of asymmetric vortical flows over delta wings at high angles of attack
[AIAA PAPER 89-3347] p 733 A89-49102

Investigation on the flow around a backward facing step with spanwise blowing
[CERT-RF-OA-68/2259-AYD] p 17 N89-10859

Spanwise lift distributions and wake velocity surveys of a semi-span wing with a discontinuous twist
[NASA-CR-177532] p 653 N89-25122

SPARE PARTS
US Army aircraft combat maintenance/battle damage repair program
p 142 A89-18860

Aircraft sustainability model version 1.5: Users manual
[AD-A207015] p 638 N89-25949

Nondestructive qualification of UH-1 replacement parts: Completion enhancement
[AD-A206674] p 672 N89-25995

SPARK IGNITION
Alternate fuels for General Aviation aircraft with spark ignition engines
[DOT/FAA/CT-88/05] p 44 N89-10179

SPARKS
Measurements in the field of a spark excited compressible axisymmetric jet
p 203 A89-18948

SPATIAL DISTRIBUTION
Effect of spatial wind gradients on airplane aerodynamics
p 514 A89-39190

SPATIAL FILTERING
Phase-only filters with improved signal to noise ratio
p 356 A89-28382

SPATIAL MARCHING
Euler solvers for hypersonic aerothermodynamic problems
p 77 A89-15696

Spatial marching techniques for approximate solutions to the hypersonic blunt body problem
p 143 A89-17460

Computation of axisymmetric supersonic jet using space marching technique
p 145 A89-18750

A set of strongly coupled, upwind algorithms for computing flows in chemical nonequilibrium
[AIAA PAPER 89-0199] p 277 A89-25174

Calculation of winged-body-like flow fields using an implicit upwind space-marching code
[AIAA PAPER 89-1826] p 581 A89-42056

The application of 3D marching scheme for the prediction of supersonic free jets
[AIAA PAPER 89-2697] p 651 A89-47160

SPECIFICATIONS
Materials tests: Means and techniques
p 548 N89-21983

SPECIMEN GEOMETRY
Creep tests for slow and fast fatigue conditions on aluminum alloy specimens
[REPT-MO-535200] p 45 N89-11020

SPECKLE INTERFEROMETRY
Summary of laser speckle photogrammetry for HOST
p 131 N89-12889

SPECKLE PATTERNS
Summary of laser speckle photogrammetry for HOST
p 131 N89-12889

SPECTRA
Supersonic jet studies of fluorene clustered with water, ammonia and piperidine
[AD-A209562] p 860 N89-29497

SPECTRAL CORRELATION
A new class of random processes with application to helicopter noise
[NASA-CR-185037] p 713 N89-26679

SPECTRAL EMISSION
A study of shock wave radiation near models at hypersonic velocities in air
p 513 A89-38445

Directional spectral emissivity measurements on a ceramic mold material
[DE88-015407] p 44 N89-10167

SPECTRAL METHODS
Frequency-domain method for the computation of propeller acoustics
p 203 A89-19902

Effect of signal jitter on the spectrum of rotor impulsive noise
p 266 A89-22327

Rub in high performance turbomachinery. II - Spectral analysis and pattern recognition
p 400 A89-30986

Computations of the hypersonic flow by the spectral method
p 369 A89-31512

Pseudo-spectral and asymptotic sensitivity investigation of counter-rotating vortices
p 861 A89-51755

- A numerical study of viscous vortex rings using a spectral method p 518 N89-22572
- SPECTROMETERS**
Performance of the forward scattering spectrometer probe in NASA's Icing Research Tunnel [AIAA PAPER 89-0789] p 346 A89-25570
Performance of the forward scattering spectrometer probe in NASA's icing research tunnel [NASA-TM-101381] p 129 N89-12845
- SPECTROSCOPY**
Modern multiple-pulse, high field NMR studies of high density jet fuels [AD-A203320] p 490 N89-21130
Supersonic jet studies of fluorene clustered with water, ammonia and piperidine [AD-A209582] p 880 N89-29497
- SPECTRUM ANALYSIS**
Miniature PCM compatible wideband spectral analyzer for hypersonic flight research p 318 A89-27864
Interference of precipitation static discharges with aircraft navigational systems p 21 N89-10459
On the appropriateness of applying chi-square distribution based confidence intervals to spectral estimates of helicopter flyover data [NASA-CR-181892] p 59 N89-10601
The spectral analysis of an aero-engine assembly incorporating a squeeze-film damper p 558 N89-22895
- SPEECH RECOGNITION**
Current military/government applications for speech recognition [SAE PAPER 871750] p 23 A89-10580
AFTI/F-16 voice interactive avionics evaluation [SAE PAPER 871751] p 24 A89-10581
Speech recognition in advanced rotorcraft - Using speech controls to reduce manual control overload p 24 A89-12404
Evaluation of the performance of a vocal recognition system in air traffic control tasks - Vocal workstation of an air traffic control simulator p 89 A89-14491
A task-oriented dialogue system - An aeronautical application p 384 A89-31907
Voice recognition and artificial intelligence in an air traffic control environment [AD-A197219] p 91 N89-12559
Sound attenuation and speech transmission quality of five types of headsets [IZF-1887-23] p 193 N89-14373
An evaluation of automating Carrier Air Traffic Control Center (CATCC) status boards utilizing voice recognition input [AD-A200626] p 309 N89-17588
- SPEED CONTROL**
Optimizing design for turboengine digital speed controller p 535 A89-37773
Comparison of interpolation algorithms for speed control in air traffic management [AD-A206314] p 601 N89-23444
- SPEED INDICATORS**
Precision characteristics of a coordinate device for estimating the velocity of an object p 830 A89-52779
- SPHERES**
Direct statistical modeling of flow of a rarefied gas past a sphere in the transition regime p 371 A89-32279
- SPHERICAL COORDINATES**
Transonic wing design using inverse methods in curvilinear coordinates p 151 A89-20316
A direct-inverse transonic wing-design method in curvilinear coordinates including viscous-interaction [AIAA PAPER 89-2204] p 753 A89-47663
- SPIKES (AERODYNAMIC CONFIGURATIONS)**
Forward facing spike effects on bodies of different cross section in supersonic flow p 739 A89-50586
- SPILLING**
Predictions of side-spillage of supersonic ramp inlets p 80 A89-16833
Three dimensional hazard zones p 195 A89-18259
Fuel containment system concept to reduce spillage [DOT/FAA/CT-TN89/22] p 672 N89-25994
- SPIN DYNAMICS**
Use of dynamically scaled models for studies of the high-angle-of-attack behavior of airplanes p 116 A89-16515
High spin effect on the dynamics of a high I/d finned projectile from free-flight tests p 405 A89-31451
A mathematical model of aircraft spin and results of its computer integration p 481 A89-34130
Spin testing methods in flight p 470 A89-35196
The analysis and prediction of the spin equilibrium point of modern aircrafts p 539 A89-36459
Rotary balances: A selected, annotated bibliography [NASA-TM-4105] p 408 N89-18500
- SPLINE FUNCTIONS**
A modified cubic spline approach for terrain following system p 112 A89-16069
Finite-surface spline p 500 A89-34900
- SPLINES**
The effects of internal rotor friction on dynamic characteristics of turbopumps p 128 N89-12629
- SPLIT FLAPS**
Aerodynamic pressures and heating rates on surfaces between split elevons at Mach 6.6 [NASA-TP-2855] p 129 N89-12822
- SPOILERS**
Vortical flows past normal plate and spoiler of time dependent height [AIAA PAPER 89-0291] p 280 A89-25248
Wind tunnel tests of 16 percent thick airfoil section with spoilers at different chordwise positions --- wind turbines [FFA-TN-1987-39] p 520 N89-22582
Computation of dynamics and control of unsteady vortical flows p 627 N89-23822

- Steady and unsteady transonic small disturbance analysis of realistic aircraft configurations p 473 N89-20946
- Methodology for using steady experimental aerodynamic data to improve steady and unsteady aerodynamic analysis p 459 N89-20972
- A model for prediction of STOVL ejector dynamics [NASA-TM-102098] p 614 N89-24319

SUBJECT INDEX

Numerical simulation of feedback control of aerodynamic configurations in steady and unsteady ground effects p 617 N89-24326

A lifting surface method for the calculation of steady and unsteady, incompressible propeller aerodynamics [DFVLR-FB-89-04] p 657 N89-25972

STEADY STATE

Modification of an unsteady transonic small disturbance procedure to allow a prescribed steady-state initial condition [AD-A196744] p 84 N89-11708

T55-L-714 engine development and qualification: Tip clearance analysis [AD-A198849] p 177 N89-13431

Experimental transonic steady state and unsteady pressure measurements on a supercritical wing during flutter and forced discrete frequency oscillations p 377 N89-19261

Steady-state and transitional aerodynamic characteristics of a wing in simulated heavy rain [NASA-TP-2932] p 655 N89-25951

STEAM TURBINES

Condensation phenomena in a turbine blade passage p 511 A89-37939

Steady-state and time-dependent aerodynamics in an annular turbine cascade operating at high subsonic Mach numbers [AIAA PAPER 89-2941] p 651 A89-47185

STEELS

Selection of rolling-element bearing steels for long-life applications p 704 A89-47250

Effect of protective coatings on life of heat-resistant nickel steel under cyclic heat load p 45 N89-11005

Mechanism of single shear fastened joints p 352 N89-17700

STEERABLE ANTENNAS

Field trials of aeronautical satellite communication system p 524 A89-36595

STEREOSCOPIC VISION

Stereoscopic 3-D displays for cockpits [AIAA PAPER 88-3887] p 170 A89-18080

Stereopsis as a visual cue in flight simulation [AIAA PAPER 89-3288] p 786 A89-48399

Stereopsis cueing effects on a simulated precision rotorcraft 'hover-in-turbulence' task [AIAA PAPER 89-3289] p 786 A89-48400

Visibility with a moving point of view p 631 N89-24876

STEREOSCOPY

A comparison of a stereoscopic 3-D display versus a 2-D display using advanced air-to-air format p 398 A89-31611

Evaluation of a projection algorithm for the stereographic representation of aircraft in an air traffic control system [DOT/FAA/CT-TN89/20] p 661 N89-25985

Effect of three-dimensional object type and density in simulated low-level flight [AD-A209756] p 795 N89-27679

STIFFENING

Buckling and final failure of graphite/PEEK stiffener sections p 190 A89-19911

On the design of biaxially stiffened composite plates p 493 A89-34867

STIFFNESS

Composites in shock and vibration isolation p 50 A89-11251

Fore-and-aft stiffness and damping characteristics of 30 x 11.5-14.5, Type VIII, bias-ply and radial-belted aircraft tires [SAE PAPER 881357] p 313 A89-28176

Rapidly solidified aluminum alloys for high temperature/high stiffness applications p 488 A89-33474

Integrating matrix solutions of problems in aeroelastic tailoring p 101 N89-11732

The effects of internal rotor friction on dynamic characteristics of turbopumps p 128 N89-12629

Magnetic bearing stiffness control using frequency band filtering p 560 N89-22910

Role of circumferential flow in the stability of fluid-handling machine rotors p 561 N89-22915

STOCHASTIC PROCESSES

Partial decomposition of stochastic systems --- dynamic models for aircraft trajectories p 89 A89-13080

Observer design for compensation of network-induced delays in integrated communication and control systems p 500 A89-35044

Quantitative design for systems with uncertainty and control failures p 500 A89-35283

A critique of several failure detection approaches for navigation systems p 809 A89-48124

Prediction of inplane damping from deterministic and stochastic models --- rotor blade stability in turbulent flow p 832 A89-52042

Application of stochastic robustness to aircraft control systems [AIAA PAPER 89-3505] p 846 A89-52598

A demonstration of the method of stochastic finite element analysis [AD-A206135] p 630 N89-24127

Advanced durability analysis. Volume 2: Analytical predictions, test results and analytical correlations [AD-A207215] p 765 N89-26838

STORAGE TANKS

Conceptual design tools for internal tankage of the hypersonic transport p 834 A89-54338

Support of the eight-foot high-temperature tunnel modifications project [NASA-CR-183356] p 117 N89-12572

STORMS (METEOROLOGY)

Severe weather - Impact on aviation and FAA programs in response [AIAA PAPER 89-0794] p 352 A89-25583

Impact of severe weather on aviation - An NWS perspective [AIAA PAPER 89-0795] p 304 A89-25584

The effects of inclement weather on airline operations [AIAA PAPER 89-0797] p 304 A89-25585

Dallas microburst storm environmental conditions determined from satellite soundings p 868 A89-54779

Oklahoma-Kansas preliminary regional experiment for storm-central (O-K pre-storm). Volume 3: Aircraft mission summary [PB88-205489] p 56 N89-10499

STRAIN DISTRIBUTION

An expression for dynamic strain in a 'weak link' [AIAA PAPER 89-0942] p 495 A89-35247

STRAIN ENERGY RELEASE RATE

Experimental study on applicability of damage failure criterion of composite laminates p 727 A89-48194

STRAIN GAGE BALANCES

On internal bending-beam strain-gage wind tunnel balances [RR-070] p 793 N89-26870

STRAIN GAGES

The dual element method of strain gauge temperature compensation p 51 A89-12276

Theoretical and experimental determination of the elastic and inertial properties of an helicopter blade p 256 A89-23332

Apparent strain characteristics of strain gauges under high temperature environment p 697 A89-43844

Development of strain gage balances with air flow-through system for ONERA wind tunnels [ONERA, TP NO. 1989-55] p 789 A89-48740

Elevated temperature strain gages p 130 N89-12886

Development of a high temperature static strain sensor p 130 N89-12887

The NASA Lewis Strain Gauge Laboratory: An update p 130 N89-12888

Advanced high temperature instrument for hot section research applications p 479 N89-20137

Evaluation of a strain-gage load calibration on a low-aspect-ratio wing structure at elevated temperature [NASA-TP-2921] p 807 N89-28034

STRAIN MEASUREMENT

The dual element method of strain gauge temperature compensation p 51 A89-12276

Nondestructive testing of composite aircraft structures with infrared and shearographic imaging technologies p 189 A89-18891

The determination of rotor blade loading from measured strains p 232 A89-23366

Apparent strain characteristics of strain gauges under high temperature environment p 697 A89-43844

Sensors for ceramic components in advanced propulsion systems: Summary of literature survey and concept analysis, task 3 report [NASA-CR-180900] p 54 N89-11192

Elevated temperature strain gages p 130 N89-12886

Development of a high temperature static strain sensor p 130 N89-12887

The NASA Lewis Strain Gauge Laboratory: An update p 130 N89-12888

High temperature stress-strain analysis p 133 N89-12913

Efficient load measurements using singular value decomposition [NASA-CR-184614] p 202 N89-14795

Advanced high temperature instrument for hot section research applications p 479 N89-20137

STRAKES

Control of autorotational characteristics of light-airplane fuselages p 39 A89-12555

A numerical method for calculating the low-speed aerodynamic characteristics of the strake-wing configurations p 292 A89-25941

STREAM FUNCTIONS (FLUIDS)

An Euler analysis of leading-edge vortex flows on a forebody-strake at supersonic speeds [AIAA PAPER 89-0343] p 293 A89-26371

Effect of wing tip strakes on wing lift-drag ratio p 445 A89-34886

Numerical simulation of vortical flows over a strake-delta wing p 738 A89-50528

Development in helicopter tail boom strake applications in the US [NASA-TM-101496] p 40 N89-10059

Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 1: General description and discussion of results [AD-A196456] p 18 N89-10867

Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 3: Plots of the zeroth and first harmonic unsteady pressure distributions (Concluded) and plots of steady and first harmonic unsteady overall loads [AD-A197541] p 84 N89-11711

A wind tunnel investigation at low speed of the flow about a straked delta wing, oscillating in pitch [NLR-MP-87046-U] p 85 N89-11715

Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 4: Plots of time histories of pressures and overall loads [AD-A198682] p 152 N89-13402

Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 5: Power spectral density plots of the overall loads for harmonic oscillation and the response of overall loads to (1-COS) inputs [AD-A198683] p 152 N89-13403

Unsteady low-speed windtunnel test of a straked delta wing, oscillating in pitch. Part 6: Presentation of the visualization program [AD-A198684] p 152 N89-13404

Use of high-resolution upwind scheme for vortical flow simulations [NASA-CR-185910] p 824 N89-29321

STRANGE ATTRACTORS

Evidence of a strange attractor in ramjet combustion [AIAA PAPER 89-0624] p 323 A89-25494

STRAPDOWN INERTIAL GUIDANCE

Packaged fiber optic gyros with high bias stability p 46 A89-10121

Optimal integration of inertial sensor functions for flight-control and avionics [AIAA PAPER 88-3878] p 170 A89-18072

Strapdown issues for airborne EO sensors [AIAA PAPER 88-3927] p 171 A89-18102

Configuration of tuned dry gyro redundant system p 554 A89-38189

Wideband linear quadratic Gaussian control of strapdown dry tuned gyro/accelerometers [AIAA PAPER 89-3441] p 837 A89-52540

Development and flight evaluation of an integrated GPS/INS navigation system [AIAA PAPER 89-3498] p 828 A89-52590

Design, simulation and laboratory test of an inertial system for measuring the attitude and narrow-spaced motions [ESA-TT-1104] p 250 N89-15160

STRAPS

An experimental and analytical evaluation of the tapered tension-torsion strap concept [NASA-TM-101049] p 191 N89-13746

STRATA

Effect of small-scale turbulence on the development of coherent structures in a mixing layer --- subsonic free aerodynamics p 208 A89-21515

STRATEGY

The MBB test strategy and tool set for software and system integration p 432 N89-18463

STRATIFIED FLOW

Regressed relations for forced convection heat transfer in a direct injection stratified charge rotary engine [SAE PAPER 880626] p 51 A89-12308

STRATOSPHERE

A study of the sensitivity of stratospheric ozone to hypersonic aircraft emissions [DE89-001240] p 261 N89-15464

Preventing depletion of stratospheric ozone: Implications on future aircraft emissions [DE89-009964] p 710 N89-25530

Preventing depletion of stratospheric ozone: Implications on future aircraft emissions, revision 1 [DE89-013779] p 808 N89-27273

STREAM FUNCTIONS (FLUIDS)

Application of an artificial density scheme of potential stream function method to design of airfoil p 7 A89-11053

Wind tunnel blockage corrections for bluff bodies with lift p 73 A89-13686

Development of airfoil wake in a longitudinally curved stream p 78 A89-16110

[AD-A203331] p 459 N89-20971
- The NASA Langley laminar-flow-control experiment on a swept supercritical airfoil: Basic results for slotted configuration
[NASA-TM-4100] p 516 N89-21762
- Comparison of boundary layer trips of disk and grit types on airfoil performance at transonic speeds
[AD-A205206] p 519 N89-22575
- Computational and experimental research on buffet phenomena of transonic airfoils
[NAL-TR-996T] p 616 N89-24322
- SUPERCritical FLOW**
- Transonic characteristics of a humped airfoil
p 12 A89-12551

- Unsteady flow in a supercritical supersonic diffuser
[AIAA PAPER 87-0162] p 212 A89-22357
- Computation of non-linear acoustics in two-dimensional blade-vortex interactions
p 218 A89-23309
- Experimental investigation of transonic flow on wing profiles in wind tunnels of reduced measurement section
[ETN-88-93233] p 85 N89-11720
- The effects of internal rotor friction on dynamic characteristics of turbopumps
p 128 N89-12629
- Inverse methods for blade design, controlled diffusion blading for supercritical compressor flow
p 329 N89-16832

SUPERCritical WINGS

- Transonic shock boundary layer interaction with passive control
p 73 A89-13685
- A flux-difference split algorithm for unsteady thin-layer Navier-Stokes solutions
[AIAA PAPER 89-1995] p 577 A89-41838
- Investigation of the buffet characteristics of two supercritical airfoils
p 727 A89-48857
- Transonic region of high dynamic response encountered on an elastic supercritical wing
p 737 A89-50067
- Investigation and suppression of high dynamic response encountered on an elastic supercritical wing
p 377 N89-19255
- Experimental transonic steady state and unsteady pressure measurements on a supercritical wing during flutter and forced discrete frequency oscillations
p 377 N89-19261

SUPERFLUIDITY

- Superconducting rotor cooling system
[AD-D014020] p 709 N89-28240

SUPERPLASTICITY

- Superplastic forming of aluminum-lithium alloy 2090-OE16
p 118 A89-15065
- Advances in superplastic aluminum forming - aerospace industry
p 97 A89-15067
- Production of aerospace parts using superplastic forming and diffusion bonding of titanium
p 124 A89-15070
- Putting parts onto planes - SPF comes of age
p 124 A89-15071
- Superplasticity of HIPped PM superalloys made from attrited prealloy powder
p 341 A89-25915
- Thermographic inspection of superplastically formed diffusion bonded titanium panels
p 415 A89-29509
- Modern joining methods for future aircraft structures
p 556 A89-39076
- Superplastic forming - A new production technology
p 624 A89-41590
- Superplastic forming of 8091 aluminum lithium
[AD-A200364] p 252 N89-16034
- Superplastic formed aluminum-lithium aircraft structure
[AD-A200245] p 316 N89-17591
- Superplastic forming of aluminum, task C
[AD-A207282] p 797 N89-26962

SUPERPRESSURE BALLOONS

- Expendable air vehicles/high altitude balloon technology
[AD-A206972] p 745 N89-26813

SUPersonic AIRCRAFT

- Aspects of the control and stabilization of supersonic commercial aircraft
[DGLR PAPER 87-122] p 39 A89-10519
- Method to optimize nacelle shape in a supersonic cruise aircraft
p 28 A89-12558
- Effect of aerodynamic detuning on supersonic rotor discrete frequency noise generation
p 138 A89-15083
- Solutions of the Euler equations for transonic and supersonic aircraft

[DE89-009964] p 710 A89-25530
- An initial assessment of the impact of boundary layer control on SST
[AERO-REPT-8802] p 656 A89-25969
- Feasibility and benefits of laminar flow control on supersonic cruise airplanes
[NASA-CR-181817] p 765 A89-26841
- Revolutionary opportunities for materials and structures study, addendum
[NASA-CR-179642-ADD] p 842 A89-29351

SUPERSONIC TURBINES

- Numerical solutions of unsteady inviscid transonic turbine cascade flows
p 516 A89-21767
- Unsteady aerodynamics and heat transfer in a transonic turbine stage
p 537 A89-21800
- Two axial compressor designs for a stage matching investigation
[AD-A206951] p 685 A89-26006

SUPERSONIC WAKES

- The effect of Mach number on the stability of a plane supersonic wave
[AIAA PAPER 89-0285] p 280 A89-25242

SUPERSONIC WIND TUNNELS

- The vapor-screen technique of flow visualization in the intermittent transonic and supersonic wind tunnel
p 9 A89-11083
- Determination of the perturbations of the flow fields of supersonic wind tunnels from measured aerodynamic coefficients
p 144 A89-18675
- Experimental investigations in the transonic and supersonic wind tunnel
p 213 A89-22762
- Structure of the compressible turbulent shear layer
[AIAA PAPER 89-0126] p 275 A89-25111
- Start and unstart in S2 supersonic wind tunnel in ONERA Modane-Avrieux center
[ONERA, TP NO. 1988-79] p 406 A89-29244
- A concentration probe for the study of mixing in supersonic shear flows
[AIAA PAPER 89-2459] p 703 A89-46846

- New hypersonic facility capability at NASA Lewis Research Center
[AIAA PAPER 89-2534] p 692 A89-46905
- Diffuser performance of two-stream supersonic wind tunnels
p 652 A89-47373
- Determination of flow field inhomogeneity in a supersonic wind tunnel and estimation of its effect on model characteristics
p 741 A89-50938
- Acoustic evaluation of the Helmholtz resonator treatment in the NASA Lewis 8- by 6-foot supersonic wind tunnel
[NASA-TM-101407] p 267 A89-15685
- Wind-tunnel results of advanced high-speed propellers at takeoff, climb, and landing Mach numbers
[NASA-TM-87030] p 377 A89-19265
- A study of transonic drag reduction of a blunt cylinder by a cylinder probe
[AD-A202557] p 458 A89-20965
- New hypersonic facility capability at NASA Lewis Research Center
[NASA-TM-102028] p 543 A89-22617

SUPERSONICS

- Nonlinear kink modes for supersonic vortex sheets
[AD-A211151] p 442 A89-33783

SUPPORT INTERFERENCE

- Interference effects associated with a plate-supported half-model in hypersonic flow
p 148 A89-19924
- Use of magnetic suspension for sensor vibration isolation
p 622 A89-40292
- Test techniques: A survey paper on cryogenic tunnels, adaptive wall test sections, and magnetic suspension and balance systems
p 486 A89-20955
- An evaluation of three experimental processes for two-dimensional transonic tests
[NASA-CR-181871] p 794 A89-27674

SUPPORT SYSTEMS

- Supportability design requirements for army aircraft and equipment
[SAE PAPER 881447] p 356 A89-28217
- The phased establishment of support maturity for the European Fighter Aircraft (EFA)
p 637 A89-44644
- Analysis of vibrations of the National Transonic Facility model support system using a 3-D aeroelastic code
[AIAA PAPER 89-2207] p 784 A89-47666
- Facilities and support requirement for advanced flight vehicles
[AIAA PAPER 89-2102] p 791 A89-49460
- Facilities and support requirements for advanced flight vehicles
p 854 A89-54368

SUPPORTS

- Aircraft engine outer duct mounting device
[AD-D013988] p 672 A89-25991
- Turbomachinery rotor support with damping
[NASA-CASE-MFS-28345-1] p 865 A89-28841

SUPPLEMENTS

- The importance of aircraft performance and signature reduction upon combat survivability
[AD-A202106] p 396 A89-19292

SURFACE CRACKS

- Fatigue crack growth in aircraft main landing gear wheels
p 28 A89-11447
- Environmentally induced discontinuities in transparent polymers
[AD-A205483] p 550 A89-22768

SURFACE DEFECTS

- Development of a process for the healing of surface discontinuities with allowance for the choice of the diagnostic parameters of the actual conditions of gas turbine engine parts
p 254 A89-21576

SURFACE ENERGY

- A fundamental approach to the sticking of insect residues to aircraft wings
[NASA-CR-183041] p 156 A89-13414

SURFACE FINISHING

- Robotic deburring of complex machined parts
p 190 A89-18936
- Adaptive control of the grinding of large gas turbine blades
p 492 A89-34144

SURFACE GEOMETRY

- A circular cone surface shaping method for fan blade
p 50 A89-11032
- Shape calculation of bodies ablating under the effect of aerodynamic heating during motion in an arbitrary trajectory
p 121 A89-13339
- Some experiences with grid generation on curved surfaces using variational and optimisation techniques
p 744 A89-51550

SURFACE LAYERS

- Aerodynamically-driven condensate layer thickness distributions on isothermal cylindrical surfaces
p 51 A89-12337

SURFACE NAVIGATION

- Navigation - Ships to space
p 224 A89-21176
- Practical experimental examples of land, sea, and air navigation using the Navstar/GPS system
p 599 A89-40802

- Advanced Fighter Technology Integration/Sandia
Inertial Terrain-Aided Navigation (AFTI/SITAN)
[DE89-004000] p 309 N89-17587
Joint University Program for Air Transportation
Research, 1987
[NASA-CP-3028] p 361 N89-19230
- SURFACE PROPERTIES**
Ensuring the quality of the covering surface in the case
of riveted joints with high radial interference
p 492 A89-34159
Summary of laser speckle photogrammetry for HOST
p 131 N89-12889
Investigation of phenomena of discrete wingtip jets
[AD-A19962] p 220 N89-15079
Low density flow effects for hypervelocity vehicles
[AD-A206218] p 747 N89-27633
A comparison of rutting behavior of asphalt concrete
under the F-4C/G and F-15C/D aircraft
[AD-A208911] p 794 N89-27678
- SURFACE ROUGHNESS**
Investigation of surface water behavior during glaze ice
accretion p 304 A89-27739
On ice shape prediction methodologies and comparison
with experimental data
[AIAA PAPER 89-0732] p 379 A89-30650
An investigation into wedge-induced turbulent boundary
layer separation on a uniformly roughened surface at Mach
6.0
[AIAA PAPER 89-2163] p 720 A89-47630
An experimental investigation of heat transfer
coefficients and friction factors in passages of different
aspect ratios roughened with 45 deg turbulators
p 862 A89-53274
An experimental investigation of the ground vortex
created by a moving jet
[NASA-CR-181841] p 745 N89-26815
- SURFACE ROUGHNESS EFFECTS**
A numerical investigation of the influence of surface
roughness on heat transfer in ice accretion
[AIAA PAPER 89-0737] p 346 A89-25554
Modeling of surface roughness effects on glaze ice
accretion
[AIAA PAPER 89-0734] p 305 A89-28451
Effect of roughness on rollup of tip vortices on a
rectangular hydrofoil p 362 A89-29168
Consideration of the effect of surface roughness on
regime coefficients in local interaction theory
p 512 A89-38432
Prediction of transition due to isolated roughness --- for
flow over flat plate with bumps or hollows
p 622 A89-40907
Effects of nose bluntness, roughness, and surface
perturbations on the asymmetric flow past slender bodies
at large angles of attack
[AIAA PAPER 89-2236] p 725 A89-47890
Environmentally induced surface roughness effects on
laminar flow airfoils - Implications for flight safety
[AIAA PAPER 89-2049] p 748 A89-49423
Effects of environmentally imposed roughness on airfoil
performance
[NASA-CR-179639] p 88 N89-11725
Studies of the structure of attached and separated
regions of viscous/inviscid interaction and the effects of
combined surface roughness and blowing in high Reynolds
number hypersonic flows
[AD-A204364] p 518 N89-21774
Flow over a leading edge with distributed roughness
[DFVLR-FB-88-45] p 520 N89-22581
Effect of milling machine roughness and wing dihedral
on the supersonic aerodynamic characteristics of a highly
swept wing
[NASA-TP-2918] p 652 N89-25117
- SURFACE STABILITY**
Recovery of the fatigue strength of structural elements
of aluminum alloys by surface hardening
p 857 A89-52827
- SURFACE TEMPERATURE**
Dynamic turbine blade temperature measurements
[AIAA PAPER 89-2689] p 680 A89-47019
Estimate of surface temperatures during rolling
contact p 864 A89-54981
Sensors for ceramic components in advanced
propulsion systems: Summary of literature survey and
concept analysis, task 3 report
[NASA-CR-180900] p 54 N89-11192
Advanced high temperature instrument for hot section
research applications p 479 N89-20137
Surface temperature measurements using a thin film
thermal array
[NASA-TM-101549] p 558 N89-22868
Combination boundary layer control system for high
altitude aircraft
[AD-D014075] p 765 N89-26837
- SURFACE VEHICLES**
A microcomputer pollution model for civilian airports and
Air Force bases. Model application and background
[AD-A199794] p 499 N89-20557
- SURGES**
Application of end-bend blade for enhancing surge
margin p 36 A89-11051
Engine surge simulation in wind-tunnel model inlet
ducts p 106 A89-13680
Active suppression of aerodynamic instabilities in
turbomachines p 295 A89-28341
Surge and rotating stall in axial compressors
[AIAA PAPER 89-2683] p 649 A89-47013
Research on surge monitoring system of turbojet engine
on active service p 840 A89-54131
Lightning and surge protection of large ground
facilities p 52 N89-10474
Modelling of common mode coupling between an aircraft
wing traversed by a lightning current and wiring installed
in that wing p 22 N89-10485
- SURVEILLANCE**
Surveillance - High-technology fit-out for the Nomad
aircraft
[SAE PAPER 872428] p 32 A89-10647
Sprite - An affordable RPH surveillance system
p 97 A89-15043
Automatic dependent surveillance data transfer
[AIAA PAPER 88-3997] p 159 A89-18180
The unused strategic tool - The airship
p 161 A89-18752
Orchidee - Role of the helicopter within a complex
system --- radar surveillance of battlefield
p 230 A89-23333
Low-altitude wind shear detection with airport
surveillance radars: Evaluation of 1987 field
measurements
[AD-A199189] p 262 N89-16243
- SURVEILLANCE RADAR**
The operation of modern air-space surveillance radars
p 51 A89-12151
The detection of low level windshear with airport
surveillance radar p 868 A89-54780
Weather sensing with airport surveillance radars
p 869 A89-54789
ASR-9 weather channel test report, executive s
ummary
[DOT/FAA/PS-89/6-EXEC-SUMM] p 626 N89-23758
- SURVEYS**
Israel Air Force (IAF) in-service aircraft lightning strike
and damage survey p 55 N89-10431
Automated Airframe Assembly Program (AAP) survey
of CIM status in the aircraft industry
[AD-A197368] p 63 N89-12535
R and M (Reliability and Maintainability) quality team
concept and C-17 design at Douglas Aircraft Company:
An R and M 2000 initiative case study
[AD-A201574] p 361 N89-19228
Position error calibration of a pressure survey aircraft
using a trailing cone
[PB88-250733] p 450 N89-20092
Views on the impact of HOST p 480 N89-20144
Structural mechanics: Contemporary state and
prospects for development (selected portions)
[AD-A198766] p 497 N89-20498
Evaluation of head-up display formats for the F/A-18
homet
[AD-A208651] p 770 N89-27660
- SURVIVAL EQUIPMENT**
Qualification and operational aspects of light weight
SKAD (light weight survival kit air droppable)
p 18 A89-10471
- SWEEP ANGLE**
Experimental study of pressure and heating rate on a
swept cylindrical leading edge resulting from swept shock
wave interference
[NASA-CR-185326] p 592 N89-23411
- SWEEP FREQUENCY**
The use of sweep-frequency excitation for unsteady
pressure measurement --- in aerodynamics
p 147 A89-18940
- SWEEP FORWARD WINGS**
X-29A forward-swept-wing flight research program
status
[SAE PAPER 872418] p 27 A89-10640
Transonic investigations on high aspect ratio forward-
and aft-swept wings p 68 A89-13527
Second X-29 will execute high-angle-of-attack flights
p 100 A89-16215
Agile aircraft - The search for supermaneuverability
p 207 A89-21843
Aeroelastic divergence of swept-forward composite
wings including warping restraint effect
p 255 A89-22362
Comment on 'General formulation of the aeroelastic
divergence of composite swept-forward wing structures'
p 605 A89-42025
- Current flight test experience related to structural
divergence of forward-swept wings p 663 A89-45141
Comment on 'Divergence study of a high-aspect ratio,
forward swept wing' p 755 A89-48667
On forward-swept wing's aerodynamic characteristics
p 733 A89-49108
Integrated design of aerodynamics and structures
[AIAA PAPER 89-2079] p 734 A89-49443
Advanced V/STOL attack aircraft design/operations
trade-off
[AIAA PAPER 89-2116] p 760 A89-49469
Integrated aerodynamic-structural design of a transport
wing
[AIAA PAPER 89-2129] p 760 A89-49475
Application of stochastic robustness to aircraft control
systems
[AIAA PAPER 89-3505] p 846 A89-52598
Integrating matrix solutions of problems in aeroelastic
tailoring p 101 N89-11732
Predicted pitching moment characteristics of X-29A
aircraft
[NASA-TM-88284] p 372 N89-18418
Lateral stability analysis for X-29A drop model using
system identification methodology
[NASA-TM-4108] p 539 N89-21802
Integrated aerodynamic-structural design of a
forward-swept transport wing p 669 N89-25168
Optimum design of swept-forward high-aspect-ratio
graphite-epoxy wings p 669 N89-25172
- SWEEP WINGS**
Flow properties associated with wing/body junctions in
wind tunnel and flight p 68 A89-13549
Aeroelasticity and structural optimization of rotor blades
with swept tips p 94 A89-13612
Static aeroelastic characteristics of circulation control
wings p 167 A89-20144
Pitch-flap flutter instability of a swept-tip model rotor
blade p 228 A89-22329
Design features which influence flow separations on
aircraft p 217 A89-23873
An interactive three-dimensional boundary-layer method
for transonic flow over swept wings
[AIAA PAPER 89-0112] p 274 A89-25099
Three-dimensional compressible boundary layer
calculations to fourth order accuracy on wings and
fuselages

[AIAA PAPER 88-3882] p 179 A89-18076

T-38 AIRCRAFT

Terminal navigation for the Combat Talon II aircraft
[AIAA PAPER 88-4021] p 159 A89-18173
Implications of a recent lightning strike to a NASA jet trainer p 22 N89-10478

T-39 AIRCRAFT

Position error calibration of a pressure survey aircraft using a trailing cone
[PB88-250733] p 450 N89-20092

TABS (CONTROL SURFACES)

Shear flow control by mechanical tabs
[AIAA PAPER 89-0994] p 416 A89-30505

TACAN

An overview of space-based radionavigation systems p 160 A89-20122

Aircraft tracking with dual TACAN
[AD-A202647] p 466 N89-20980

TACTICS

AI applications to tactical decision aids
[AIAA PAPER 88-4027] p 200 A89-18178
The importance of aircraft performance and signature reduction upon combat survivability
[AD-A202106] p 396 N89-19292

TAIL ASSEMBLIES

Dynamic behavior of a composite tail unit for EH101 p 229 A89-23310

Prediction of tail buffet loads for design application
[AIAA PAPER 89-1378] p 391 A89-30852

Turbulent-flow calculations for flow over wings near maximum lift
[AIAA PAPER 89-2239] p 726 A89-47693

Development in helicopter tail boom strike applications in the US p 40 N89-10059

Flow-field survey of an empennage wake interacting with a pusher propeller p 62 N89-11694

Tailless aircraft performance improvements with relaxed static stability
[NASA-CR-181806] p 483 N89-20999

TAIL ROTORS

NOTAR - An alternative to the helicopter tail rotor p 166 A89-20020

Development in helicopter tail boom strike applications in the US p 40 N89-10059

Helicopter tail rotor blade-vortex interaction noise
[NASA-CR-183178] p 356 N89-18167

Acoustic test of a model rotor and tail rotor: Results for the isolated rotors and combined configuration
[NASA-TM-101550] p 504 N89-20777

Loss of tail rotor effectiveness evaluation of the OH-58C helicopter with directional SAS (Stability Augmentation System)
[AD-A206181] p 608 N89-24309

TAILLESS AIRCRAFT

Flying wings (2nd revised and enlarged edition) --- Russian book p 568 A89-42488

What drives unique configurations
[SAE PAPER 881353] p 764 A89-51352

The conceptual design of a Mach 2 Oblique Flying Wing supersonic transport
[NASA-CR-177529] p 671 N89-25233

TAKEOFF

Seaplane takeoff performance - Using delta ratio as a method of correlation p 28 A89-12565

Takeoff flight-paths in the presence of wind and wind variation p 111 A89-13507

Optimization of helicopter takeoff and landing p 92 A89-13521

Simulation models for optimization of helicopter takeoff and landing p 231 A89-23339

Departure resistance and spin characteristics of the F-15 S/MTD
[AIAA PAPER 89-0012] p 331 A89-25008

Airport accident-potential and safety areas
[SAE PAPER 881388] p 336 A89-28193

Analysis of Arrow Air DC-8-63 accident Gander, Newfoundland on 12 December 1985
[AIAA PAPER 89-0706] p 305 A89-28448

Overview of optimal trajectories for flight in a windshear
[AIAA PAPER 89-0812] p 306 A89-28464

High-speed propeller performance and noise predictions at takeoff/landing conditions p 565 A89-39195

Research and application of a new kind of measurement technology of take-off and landing performance p 698 A89-45144

Noise of a model counterrotation propeller with simulated fuselage and support pylon at takeoff/approach conditions
[AIAA PAPER 89-1143] p 812 A89-48953

Evaluation of a takeoff performance monitoring system display p 837 A89-51704

Noise of the Harrier in vertical landing and takeoff p 60 N89-10856

Helipoint visual approach and departure airspace tests. Volume 1: Summary
[AD-A200028] p 226 N89-15093

Simulator evaluation of a display for a Takeoff Performance Monitoring System
[NASA-TP-2908] p 615 N89-23469

Noise of a model counterrotation propeller with simulated fuselage and support pylon at takeoff/approach conditions
[NASA-TM-101996] p 633 N89-24138

Reduction of aircraft noise in civil air transport by optimization of flight tracks and takeoff and approach procedures
[ILR-MITT-200] p 713 N89-25676

TAKEOFF RUNS

Takeoff drag prediction for Airbus A300-600 and A310 compared with flight test results p 228 A89-22810

Powered lift aircraft take off climb performance with one engine inoperative p 663 A89-45127

TANDEM ROTOR HELICOPTERS

Computer assisted track and balance saves flights
[AD-A200028] p 393 A89-30997

Design, fabrication, and testing of a composite main landing gear retracting beam
[SME PAPER EM88-551] p 834 A89-54901

TANDEM WING AIRCRAFT

Parametric weight evaluation of joined wings by structural optimization p 228 A89-22817

Dragonfly unsteady aerodynamics - The role of the wing phase relations in controlling the produced flows
[AIAA PAPER 89-0832] p 289 A89-25802

AT3 demonstrates feasibility of cargo STOL with long range p 832 A89-52201

The Flying Diamond: A joined aircraft configuration design project, volume 1
[NASA-CR-184699] p 360 N89-18407

TAPERING

An experimental and analytical evaluation of the tapered tension-torsion strap concept
[NASA-TM-101049] p 191 N89-13746

TAPES

Development of an alternating flat to tubular Kevlar parachute tape
[AIAA PAPER 89-0910] p 462 A89-35223

TARGET ACQUISITION

Synthetic IR scene generation p 125 A89-15897

Standardized advanced infrared sensor - A program status p 175 A89-18932

An exploratory study of the use of movement-correlated cues in an auditory head-up display p 674 A89-45329

TARGET RECOGNITION

Aircraft recognition using a parts analysis technique
[AD-A206181] p 629 A89-40447

TARGET SIMULATORS

A comparative analysis of tilt rotor aircraft versus helicopters using simulator results
[AD-A202180] p 396 N89-19294

TAXING

Instrument landing system mathematical modeling study for Orlando International Airport Runway 35L localizer, Orlando, Florida. Final airside docking plan (Scheme 3A)
[AD-A205351] p 600 N89-23438

Improved marking of taxiway intersections for Instrument Flight Rules (IFR) operations
[DOT/FAA/CT-TN89/23] p 619 N89-24330

Acta Aeronautica et Astronautica Sinica, Volume 8, Number 12, December 1987 (selected articles)
[AD-A206782] p 719 N89-26807

TAYLOR INSTABILITY

Primitive numerical simulation of circular Couette flow p 516 N89-21764

TAYLOR SERIES

Using the T-transform method for solving problems in flight mechanics p 111 A89-13267

A simple method for solving direct problems of 3-D flow in axial turbomachinery p 210 A89-22006

Recent developments of the Taylor-Galerkin method for the numerical solution of hyperbolic problems p 811 A89-51538

An approximation function for frequency constrained structural optimization p 705 N89-25196

TECHNOLOGICAL FORECASTING

Fueling our transportation engines after the petroleum is gone p 61 A89-15420

Transitioning to new technologies for next generation aircraft p 62 A89-16203

Aircraft engines. III p 240 A89-22927

Light helicopter technology for the year 2000 p 232 A89-23372

Setting the scene - The operator's viewpoint p 237 A89-24852

A320 - The next generation airline aircraft p 237 A89-24853

The equipment scene p 237 A89-24855

Activities and findings of the ICAO Special Committee on Future Air Navigation Systems (FANS) p 226 A89-24856

Integrated avionics - Future developments p 237 A89-24857

Future engine controls p 241 A89-24859

Structural design considerations for future composite transport aircraft p 387 A89-29974

Aspects of military-aircraft development up to the year 2000 p 359 A89-30646

AIAA Aerodynamic Decelerator Systems Technology Conference, 10th, Cocoa Beach, FL, Apr. 18-20, 1989, Technical Papers p 461 A89-35201

Implementation of a transputer-based flight controller p 482 A89-35302

Aircraft engines. IV p 534 A89-36898

Helicopters and VTOL. I p 527 A89-36899

Soaring on intelligent wings - Aerodynamicists at MBB are already at work on tomorrow's projects p 568 A89-43077

Future air navigation systems (FANS) p 600 A89-43573

Jet or prop required for future regional transports? p 637 A89-44641

The systems of the future Airbus A330 and A340 aircraft p 662 A89-45044

Titanium requirements for current and future military gas turbine engines p 696 A89-45944

Structures technology for a new generation of rotorcraft p 801 A89-49437

[AIAA PAPER 89-2070] p 801 A89-49437

The NASP challenge - Management innovation
[AIAA PAPER 89-5006] p 814 A89-51331

Visual and sensory aids for helicopters in the year 2000 p 837 A89-53309

Forces for change and the future of hypersonic flight in the 21st century p 856 A89-54327

HOTOL - A European aerospaceplane for the 21st century p 856 A89-54330

'Spaceplanes' and the rise of 'Ultra Tech' p 856 A89-54355

The Trisonic aerospace motor - Propulsion vehicle for the 21st century p 856 A89-54359

Aviation technology applicable to developing regions
[NASA-TM-89425] p 23 N89-10872

Materials and structures for 2000 and beyond: An attempted forecast
[DFVLR-MITT-89-02] p 706 N89-25358

TECHNOLOGY ASSESSMENT

The history of aircraft onboard equipment
[DGLR PAPER 87-054] p 31 A89-10536

The nonrigid airship of the Siemens-Schuckert Werke
[DGLR PAPER 87-055] p 80 A89-10537

Aircraft dynamic stability - Developmental history aspects
[DGLR PAPER 87-057] p 1 A89-10538

Avionic color liquid crystal displays - Recent trends
[SAE PAPER 871790] p 31 A89-10585

Aircraft gas turbine engine monitoring systems: An update
[SAE SP-728] p 33 A89-10613

Panel methods in aerodynamics - Some highlights p 10 A89-11481

Air-traffic flow management today p 24 A89-12152

The winning edge --- NASA role in US aeronautics industry's competition with foreign suppliers
[SAE PAPER 880945] p 2 A89-12322

Air navigation systems. I - Astronomical navigation in the air 1919-1969 p 24 A89-12449

Putting parts onto planes - SPF comes of age p 124 A89-15071

Recent advances in computer image generation simulation p 116 A89-16738

Advances in titanium alloy casting technology p 119 A89-16778

The X-20 space plane - Past innovation, future vision
[IAF PAPER 88-598] p 204 A89-17867

Down with drag p 141 A89-18347

An overview of the Federal Radionavigation Plan p 160 A89-20123

Flight guidance technology
[DGLR PAPER 87-119] p 160 A89-20239

The Oetzel wind tunnel as basic idea and incentive for planning the USAF research center AEDC Tullahoma p 183 A89-20245

Aerospace systems and technology - The role of the RAE p 207 A89-21846

Electromechanical blade fold systems - Current status and future developments p 230 A89-23316

Aircraft engines. IV p 534 A89-36898

Flying wings (2nd revised and enlarged edition) --- Russian book p 568 A89-42488

Research and development: Technical and scientific publications 1988 --- Book p 635 A89-42926

Technology of structures maintains high standards p 637 A89-44642

Stealth technology for reducing aircraft recognition p 673 A89-44645

Technology readiness for advanced ducted engines [AIAA PAPER 89-2479] p 678 A89-46863

Automation in transport aircraft - Current and future trends [SAE PAPER 881468] p 657 A89-47334

Flight simulation: Recent developments in technology and use; Proceedings of the Conference, London, England, Apr. 12, 13, 1988 p 790 A89-48826

Configurational repercussions of new technologies in designing a regional airliner [AIAA PAPER 89-2022] p 715 A89-49409

NASA rotorcraft technology for the 21st century [AIAA PAPER 89-2066] p 758 A89-49435

Investigations in the history and theory of the development of aviation and rocket and space science and technology, No. 6 --- Russian book p 879 A89-52923

MLS 1989 - Status report from the perspective of the airline companies p 830 A89-53663

Aircraft technology opportunities for the 21st Century [NASA-TM-101060] p 63 A89-12539

Research and technology 1988 [NASA-TM-4078] p 268 A89-15886

Assessment, development, and application of combustor aerothermal models p 479 A89-20138

Review and assessment of the database and numerical modeling for turbine heat transfer p 479 A89-20139

A survey of poly-ether-ether-ketone and its advanced composites [FFA-TN-1988-37] p 550 A89-22707

Technical Status Review on Drag Prediction and Analysis from Computational Fluid Dynamics: State of the Art [AGARD-AR-256] p 745 A89-26817

State-of-the-art of aircraft drag prediction in Italy by means of theoretical methods p 745 A89-26821

Status and development potential of the fly by light technology in civil aircraft [ILR-MIT-212] p 854 A89-28522

TECHNOLOGY FEASIBILITY SPACECRAFT

The National Aero-Space Plane program [AIAA PAPER 89-5053] p 715 A89-48164

Enabling technologies research and development for the National Aero-Space Plane [AIAA PAPER 89-5009] p 804 A89-51334

TECHNOLOGY TRANSFER

Development of harmonic panel methods for aeroelastic applications to elastic bodies and body-fin combinations in supersonic flow [AD-A205739] p 593 A89-23423

TECHNOLOGY UTILIZATION

New application possibilities for balloon-borne case studies - MIKROBA (Microgravity by balloons) [DGLR PAPER 87-089] p 184 A89-20233

Utilization of wind tunnel instrumentation with software verifications p 335 A89-27654

Designing with advanced fibrous composites p 470 A89-35197

High altitude parachute and its military applications [AIAA PAPER 89-0893] p 461 A89-35211

ExpertVision - A video-based non-contact system for motion measurement p 698 A89-45136

Research and technology 1988 [NASA-TM-4078] p 268 A89-15886

Avionic system design methodology p 770 A89-27656

TEFLON (TRADEMARK)

Nonequilibrium viscous hypersonic flows over ablating Teflon surfaces [AIAA PAPER 89-0314] p 293 A89-26368

TELECOMMUNICATION

The future of aeromobile digital communications [AIAA PAPER 88-4001] p 158 A89-18156

Teleport as a concentration point for domestic and international traffic p 190 A89-20114

Laser communication test system [AD-A199612] p 349 A89-17215

TELEMETRY

Control Data Corporation MMTS Multi-Vehicle Metric and Telemetry System p 384 A89-31082

The IPTN's airborne data relay system (ADReS) - A system concept and the Phase One system configuration p 398 A89-31059

The System 500, a real-time flight test telemetry system p 680 A89-45134

A simple low-cost telemetry system for those of modest means p 660 A89-45138

Aircraft position report demonstration plan [AD-A196564] p 90 A89-11727

TEMPERATURE COMPENSATION

The dual element method of strain gauge temperature compensation p 51 A89-12276

The design and use of a temperature-compensated hot-film anemometer system for boundary-layer flow transition detection on supersonic aircraft p 318 A89-27668

TEMPERATURE CONTROL

AIR 1900 - Guide to temperature monitoring in aircraft gas turbine engines [SAE 871730] p 34 A89-10616

Temperature compensation using GaAs MMIC devices [SAE PAPER 881381] p 314 A89-28255

Anodized aluminum and aluminum alloy coatings for thermal control p 547 A89-38153

TEMPERATURE DEPENDENCE

A finite element elastic-plastic-creep analysis of materials with temperature dependent properties p 253 A89-21156

Generalized criteria for microwave breakdown in air-filled waveguides p 552 A89-36655

TEMPERATURE DISTRIBUTION

Numerical investigation of hot streaks in turbines [AIAA PAPER 88-3015] p 79 A89-16478

Redistribution of an inlet temperature distortion in an axial flow turbine stage p 255 A89-22286

The solution of 3-D temperature distribution in a cycling oil cooled aircraft ac generator by network topology method p 701 A89-46282

Turbofan forced mixer/nozzle temperature and flow field modelling p 773 A89-48521

High-resolution liquid-crystal heat-transfer measurements on the endwall of a turbine passage with variations in Reynolds number p 862 A89-53289

High-resolution liquid-crystal heat-transfer measurements on the end wall of a turbine passage with variations in Reynolds number [NASA-TM-100827] p 424 A89-18664

TEMPERATURE EFFECTS

Sound transmission of stiffened composite panels - Hydrothermal effect [AIAA PAPER 89-1358] p 434 A89-30833

Variations of undamped rotor blade frequencies subjected to transient heat flux p 553 A89-36919

Observation of airplane flowfields by natural condensation effects p 578 A89-42009

Low-temperature performance of a power-pack for a 2-watt ELT p 709 A89-44018

Aeroelastic thermal effects p 37 A89-10015

Coolant passage heat transfer with rotation p 132 A89-12899

Component specific modeling p 110 A89-12907

Flight measured and calculated exhaust jet conditions for an F100 engine in an F-15 airplane [NASA-TM-100419] p 177 A89-13435

Temperature effect on stress concentration around circular hole in a composite material specimen representative of X-29A forward-swept wing aircraft [NASA-CR-179439] p 194 A89-14456

A first scramjet study [NASA-CR-184985] p 480 A89-20146

Acceleration test for aircraft low-pass filter [PB89-116263] p 557 A89-22807

Response of pavement to freeze-thaw cycles: Lebanon, New Hampshire, regional airport [AD-A205559] p 626 A89-23740

Aircraft jet engine exhaust blast effects on Par-56 runway threshold lamp fixtures [DOT/FAA/CT-89/4] p 694 A89-26018

TEMPERATURE GRADIENTS

Effect of design variables, temperature gradients, and speed on life and reliability of a rotating disk p 799 A89-47719

A high heat flux experiment for verification of thermostructural analysis [NASA-TM-100931] p 127 A89-12026

Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 40- by 80-foot wind tunnel [NASA-TM-101085] p 438 A89-20086

TEMPERATURE MEASUREMENT

AIR 1900 - Guide to temperature monitoring in aircraft gas turbine engines [SAE 871730] p 34 A89-10616

Measurements of fluctuations of thermodynamic variables and mass flux in supersonic turbulence p 78 A89-16258

Infrared technique to measure the skin temperature on an electrothermal de-icer - Comparison with numerical simulations [AIAA PAPER 89-0760] p 303 A89-25566

Optical research needed to support the testing of hypersonic vehicle structures p 697 A89-43840

Embedded temperature measurements in a carbon-carbon wing leading edge hot structure p 697 A89-43843

A high speed data acquisition system for the analysis of velocity, density, and total temperature fluctuations at transonic speeds [SAE PAPER 881451] p 691 A89-45248

Dynamic turbine blade temperature measurements [AIAA PAPER 89-2689] p 680 A89-47019

Environmental tests of thermographic phosphors for turbine-engine temperature measurements [AIAA PAPER 89-2913] p 802 A89-50124

Diagnostic techniques for propulsion systems p 839 A89-52960

High-resolution liquid-crystal heat-transfer measurements on the endwall of a turbine passage with variations in Reynolds number p 862 A89-53289

Sensors for ceramic components in advanced propulsion systems: Summary of literature survey and concept analysis, task 3 report [NASA-CR-180900] p 54 A89-11192

Further development of the dynamic gas temperature measurement system p 130 A89-12884

The measurement of temperature from an aircraft in cloud p 353 A89-17978

High-resolution liquid-crystal heat-transfer measurements on the end wall of a turbine passage with variations in Reynolds number [NASA-TM-100827] p 424 A89-18664

Advanced high temperature instrument for hot section research applications p 479 A89-20137

Surface temperature measurements using a thin film thermal array [NASA-TM-101549] p 558 A89-22868

Experience with advanced instrumentation in a hot section cascade [NASA-TM-102294] p 806 A89-27980

Aerothermodynamic instrumentation p 866 A89-29310

TEMPERATURE MEASURING INSTRUMENTS

Estimation of the effect of the principal design parameters of stagnation temperature transducers on measurement delay p 254 A89-21575

Numerical analysis of flow about a total temperature sensor [AIAA PAPER 89-2233] p 725 A89-47688

HOST instrumentation R and D program overview p 110 A89-12878

TEMPERATURE PROBES

Further development of the dynamic gas temperature measurement system p 130 A89-12884

Experience with advanced instrumentation in a hot section cascade [NASA-TM-102294] p 806 A89-27980

TEMPERATURE PROFILES

Experimental and analytical study on exit radial temperature profile of experimental 2D combustor [AIAA PAPER 89-0493] p 340 A89-25403

A study on exit radial temperature profile of 2D experimental combustor p 535 A89-37759

Research on temperature profile factor at exit in an annular combustor p 535 A89-37769

Three dimensional flow and temperature profile attenuation in an axial flow turbine [AD-A206736] p 685 A89-26005

TENSILE CREEP

Creep behaviour of carbon fibre reinforced polyetheretherketone and epoxy resin [MBB-Z-178-88-PUB] p 251 A89-22890

TENSILE PROPERTIES

Tensile behaviour of a nickel-based single crystal superalloy - Effects of temperature and orientation [ONERA, TP NO. 1989-7] p 409 A89-29203

TENSILE STRENGTH

Short-term high-temperature properties of reinforced metal matrix composites p 119 A89-15747

Investigation of the service and age lives of U.S. Army personnel parachutes [AIAA PAPER 89-0915] p 462 A89-35227

Effect of crack size on the tensile strength of ceramics in a high-temperature corrosive environment p 547 A89-38021

A proposal for funding to purchase a high-temperature furnace to enable determination of the high temperature mechanical properties of structural carbon materials [AD-A204103] p 542 A89-21809

TENSILE TESTS

Short-term high-temperature properties of reinforced metal matrix composites p 119 A89-15747

An exploratory study of corner bleed on a fin generated three-dimensional shock wave turbulent boundary layer interaction p 282 A89-25301
[AIAA PAPER 89-0358]
An integral method for calculating turbulent boundary layer flow on practical wings p 292 A89-25942
Experimental and numerical investigation of an oblique shock wave/turbulent boundary layer interaction with continuous suction p 296 A89-28407
[AIAA PAPER 89-0357]
Recent basic studies on transonic shock-wave/turbulent boundary-layer interactions [ONERA, TP NO. 1989-54] p 363 A89-29232
The delay of turbulent boundary layer separation by oscillatory active control p 364 A89-29679
The delay of turbulent boundary layer separation by oscillatory active control p 366 A89-30489
[AIAA PAPER 89-0975]
Effects of a fillet on the flow past a wing body junction [AIAA PAPER 89-0988] p 366 A89-30498
LEBU drag reduction in high Reynolds number boundary layers --- Large Eddy Break-Up [AIAA PAPER 89-1011] p 416 A89-30522

Correlation of outer and passive wall region manipulation with boundary layer coherent structure dynamics and suggestions for improved devices
[AIAA PAPER 89-1026] p 417 A89-30532

The influence of jet-grid turbulence on turbulent boundary layer flow and heat transfer
p 419 A89-30929

Fluctuations and massive separation in three-dimensional shock-wave/boundary-layer interactions
p 368 A89-30952

Fluctuation of heat transfer in shock wave/turbulent boundary-layer interaction
p 371 A89-31910

A comparison of the turbulence structure of subsonic and supersonic boundary layers
p 440 A89-33425

Direct numerical simulation of a three-dimensional turbulent boundary layer
p 493 A89-34909

Effect of jet grid turbulence on turbulent boundary layer heat transfer
p 494 A89-34930

Prediction of heat transfer characteristics of discrete hole film cooling - One row of injection into a turbulent boundary layer
p 494 A89-34931

Turbulization of a high-velocity boundary layer by a projection
p 448 A89-35434

Unsteady interaction effects on a transitional turbine blade boundary layer
p 508 A89-36186

Separation shock motion in fin, cylinder, and compression ramp - Induced turbulent interactions
p 509 A89-36911

Modeling of density fluctuations in supersonic turbulent boundary layer
p 509 A89-36923

Experimental investigation of shock wave/boundary-layer interactions in an annular duct
p 514 A89-39039

A solution method for the three-dimensional compressible turbulent boundary-layer equations
p 623 A89-41044

The effect of an adverse pressure gradient on the drag reduction performance of manipulators
p 571 A89-41771

An experimental study of a reattaching supersonic shear layer
[AIAA PAPER 89-1801] p 579 A89-42036

Measurements of swept shock wave/turbulent boundary-layer interactions by holographic interferometry
[AIAA PAPER 89-1849] p 584 A89-42077

Inception length to a fully-developed fin-generated shock wave boundary-layer interaction
p 584 A89-42078

Navier-Stokes simulation of a shock wave-turbulent boundary layer interaction in a three-dimensional channel
[AIAA PAPER 89-1851] p 585 A89-42079

Computation of sharp fin and swept compression corner shock/turbulent boundary layer interactions
[AIAA PAPER 89-1852] p 585 A89-42080

Separation shock motion and ensemble-averaged wall pressures in a Mach 5 compression ramp interaction
[AIAA PAPER 89-1853] p 585 A89-42081

The structure of aerodynamic heating in three-dimensional shock wave/turbulent boundary layer interactions induced by sharp and blunt fins
[AIAA PAPER 89-1854] p 585 A89-42082

An experimental study of hypersonic turbulence on a sharp cone
[AIAA PAPER 89-1866] p 586 A89-42093

Effect of the adiabatic exponent on the stability and turbulent transition of a supersonic laminar boundary layer
p 588 A89-42567

The mixing of three-dimensional turbulent wakes in boundary layers
p 639 A89-43722

Pressure fluctuations on an oscillating trailing edge
p 645 A89-45458

Interaction of an oscillating vortex with a turbulent boundary layer
p 645 A89-45906

An investigation into wedge-induced turbulent boundary layer separation on a uniformly roughened surface at Mach 6.0
[AIAA PAPER 89-2163] p 720 A89-47630

Observations of supersonic free shear layers
p 736 A89-50004

Flat plate reduction by turbulence manipulation
p 737 A89-50008

Shock-wave-turbulent-boundary-layer interaction and its control - A survey of recent developments
p 737 A89-50010

Structure of flow past the windward side of V-shaped wings in the presence of turbulent boundary layer separation
p 740 A89-50931

Structural and acoustic noise generated by a large-eddy break-up device
p 812 A89-51453

Prediction of secondary separation in shock wave boundary-layer interactions
p 816 A89-51760

Differing development of the velocity profiles of three-dimensional turbulent boundary layers
p 819 A89-53947

Experimental research on swept shock wave/boundary layer interactions
[AD-A196938] p 53 N89-11189

Method for laminar boundary layer transition visualization in flight
[NASA-CASE-LAR-13554-1] p 87 N89-12551

Management and control of unsteady and turbulent flows
[AD-A198091] p 192 N89-13751

Turbulent boundary layer modification by streamlined devices
p 259 N89-15367

An interactive three-dimensional laminar and turbulent boundary-layer method for compressible flow over swept wings
p 222 N89-15892

The effects of freestream turbulence on airfoil boundary layer behavior at low Reynolds numbers
[AD-A201665] p 372 N89-18419

Investigation of the surface flow of conical bodies at high subsonic and supersonic speeds
p 373 N89-18650

Documentation of two- and three-dimensional hypersonic shock wave/turbulent boundary layer interaction flows
[NASA-TM-101075] p 451 N89-20100

A calculation method for compressible three dimensional turbulent boundary layer flows
[VKI-TN-167] p 496 N89-20422

Organized structures in a supersonic turbulent boundary layer
p 517 N89-21771

The effects of incidence angle and free stream turbulence on the performance of a variable geometry two-dimensional compressor cascade at high Reynolds numbers
[AD-A202650] p 557 N89-22052

Control of embedded vortices using wall jets
[AD-A202606] p 558 N89-22835

The structure and control of three-dimensional shock wave turbulent boundary layer interactions
[AD-A205923] p 558 N89-22866

An experimental study of the effect of streamwise vortices on unsteady turbulent boundary-layer separation
[AD-A205462] p 593 N89-23420

Flow control for unsteady and separated flows and turbulent mixing
[AD-A205989] p 594 N89-23426

A review of high-speed, convective, heat-transfer computation methods
[NASA-TP-2914] p 805 N89-27116

Transition and turbulence structure in the boundary layers of an oscillating airfoil
[AD-A208968] p 824 N89-29317

TURBULENCE DIFFUSION
Continuum theories for fluid-particle flows: Some aspects of lift forces and turbulence p 53 N89-11155

TURBULENCE FLOW
Analysis of complex hypersonic flows with strong viscous/inviscid interaction p 9 A89-11109

Numerical simulation of turbulent flow through tandem cascade
p 67 A89-13519

Measurements of fluctuations of thermodynamic variables and mass flux in supersonic turbulence
p 78 A89-16258

Using an unfactored implicit predictor-corrector method - Results with a research code --- for high-Reynolds number transonic airfoil flow
p 81 A89-17021

Mathematical modeling of laminar and turbulent supersonic flow past convex-concave bodies
p 144 A89-18671

Experimental assessment of a turbulence ingestion noise theory
p 203 A89-18912

The influence of surface rounding on trailing edge noise
p 265 A89-20966

Prediction of separated flow past airfoil using viscous-inviscid interaction technique
p 208 A89-21092

Experimental analysis of turbulent separation on an oblate ellipsoid-cylinder
p 208 A89-21095

Simultaneous viscous-inviscid interaction calculation procedure for transonic turbulent flows
p 212 A89-22359

Experimental study of isothermal swirling flows in a dump combustor
p 240 A89-23182

Holographic measurements of transition and turbulent bursting in supersonic axisymmetric boundary layers
p 215 A89-23185

Computation of three-dimensional viscous linear cascade flows
p 215 A89-23186

A semiempirical method for calculating separated turbulent flow in a conical Laval nozzle in the reexpansion mode
p 216 A89-23688

Zonal modelling of flows through multiple inlets and nozzles
[AIAA PAPER 89-0005] p 271 A89-25003

Efficient finite-volume parabolized Navier-Stokes solutions for three-dimensional, hypersonic, chemically reacting flowfields
[AIAA PAPER 89-0103] p 274 A89-25090

Structure of the compressible turbulent shear layer
[AIAA PAPER 89-0126] p 275 A89-25111

Computation of turbulent incompressible wing-body junction flow
[AIAA PAPER 89-0279] p 310 A89-25236

A one equation turbulence model for transonic airfoil flows
[AIAA PAPER 89-0557] p 287 A89-25446

Evaluation of three turbulence models for the prediction of steady and unsteady airloads
[AIAA PAPER 89-0609] p 288 A89-25485

A self-adaptive computational method applied to transonic turbulent projectile aerodynamics
[AIAA PAPER 89-0837] p 290 A89-25606

Computation for supersonic and turbulent separated flow over a compression corner
p 292 A89-25931

Experimental research of flow separation, heat transfer and ablation on flat plate-wedges in supersonic, turbulent flow
p 292 A89-25938

Finite element simulation of 3D turbulent free shear flows
p 294 A89-26946

Effects of a downstream disturbance on the structure of a turbulent plane mixing layer
p 348 A89-27692

Turbulence measurements in a radial upwash
p 294 A89-27706

Computation of high Reynolds number flows around airfoils by numerical solution of the Navier-Stokes equations
[ONERA, TP NO. 1988-124] p 363 A89-29276

Effects of free-stream turbulence on performance of subsonic diffuser
p 369 A89-31522

Measurements of a supersonic turbulent vortex
p 440 A89-33423

Mean and turbulent velocity measurements of supersonic mixing layers
p 440 A89-33426

Heat transfer in gas turbine combustors
p 491 A89-33580

Simultaneous computation of jet turbulence and noise
[AIAA PAPER 89-1091] p 491 A89-33731

A self-adaptive computational method for transonic turbulent flow past a real projectile
p 443 A89-34730

Direct numerical simulation of a three-dimensional turbulent boundary layer
p 493 A89-34909

The application of dynamic schlieren-photon correlation technique to a supersonic shear layer
p 515 A89-39474

Measurements of laminar separation bubble on B3 airfoil
p 569 A89-40893

Characteristics of dump combustor flows
p 612 A89-41224

Supersonic flow computations by two-equation turbulence modeling
[AIAA PAPER 89-1951] p 574 A89-41798

Turbulence models for 3D transonic viscous flows
[AIAA PAPER 89-1952] p 574 A89-41799

Development of an efficient multigrid code for 3-D Navier-Stokes equations
[AIAA PAPER 89-1791] p 625 A89-42027

Global marching technique for predicting flows over airfoils with leading and trailing edge flaps
[AIAA PAPER 89-1793] p 579 A89-42028

New mixing-length model for turbulent high-speed flows
[AIAA PAPER 89-1821] p 581 A89-42051

Computation of turbulent flows on a CAST 10 wing using an upwind scheme
[AIAA PAPER 89-1836] p 582 A89-42064

Turbulent flow predictions for afterbody/nozzle geometries including base effects
[AIAA PAPER 89-1865] p 585 A89-42092

Efficient computational tool for ramjet combustor research
[AIAA PAPER 88-0060] p 674 A89-44108

A new variational method for the generation of two- and three-dimensional adapted grids in computational fluid dynamics
[ONERA, TP NO. 1989-31] p 641 A89-45187

Unsteady and turbulent flow using adaptation methods
p 643 A89-45392

Interaction of an oblique shock wave with supersonic turbulent blunt body flows
p 644 A89-45405

Modeling of turbulence for compression corner flows and internal flows
[AIAA PAPER 89-2344] p 647 A89-46763

Two-dimensional computations of multi-stage compressor flows using a zonal approach
[AIAA PAPER 89-2452] p 647 A89-46840

Experimental study of spreading rate enhancement of high Mach number turbulent shear layers
[AIAA PAPER 89-2458] p 648 A89-46845

Low angle injection into a supersonic flow
[AIAA PAPER 89-2461] p 648 A89-46848

Further experiments on supersonic turbulent flow development in a square duct p 652 A89-47357
 Supersonic Navier-Stokes simulations of turbulent afterbody flows
 [AIAA PAPER 89-2194] p 722 A89-47654
 Wing boundary layer response to an unsteady turbulent flowfield
 [AIAA PAPER 89-2226] p 724 A89-47682
 Numerical computation of hypersonic turbulent flows using zero- and one-equation models
 [AIAA PAPER 89-2234] p 725 A89-47689
 Turbulent-flow calculations for flow over wings near maximum lift
 [AIAA PAPER 89-2239] p 726 A89-47693
 A study of the structure of separated flow on a delta wing
 p 734 A89-49272
 Aspects of the numerical simulation of turbulent flow in combustor type configurations p 775 A89-50373
 Fifty years of laminar flow flight testing
 [SAE PAPER 881393] p 764 A89-51355
 Turbulent reactive flows p 857 A89-51860
 Turbulent shear flows 6; International Symposium, 6th, Université de Toulouse III, France, Sept. 7-9, 1987, Selected Papers p 861 A89-52943
 Turbulence modeling in a hypersonic inlet
 p 819 A89-53931
 Representation and display of vector field topology in fluid flow data sets p 875 A89-54904
 A transonic interactive boundary-layer theory for laminar and turbulent flow over swept wings
 [NASA-CR-4185] p 14 N89-10029
 Flow around a delta wing with or without a canard (Phi SA = 60 deg). Part 2: Hydrodynamic visualizations in unsteady flow (pitching oscillations)
 [ONERA-RT-11/2891-AN-PT-2] p 17 N89-10860
 Velocity-scalar pdf methods for turbulent shear flows with two-point time scales p 84 N89-11706
 Statistical simulation of turbulent flow around a cube subjected to frontal flows
 [ETN-88-93215] p 127 N89-12019
 A zonal equation method for three-dimensional locally elliptic laminar and turbulent flows p 87 N89-12547
 Evaluation of three turbulence models for the prediction of steady and unsteady airloads
 [NASA-TM-101413] p 88 N89-12555
 Improved numerical methods for turbulent viscous recirculating flows p 131 N89-12895
 Heat transfer with very high free-stream turbulence and streamwise vortices p 132 N89-12900
 Management and control of unsteady and turbulent flows
 [AD-A198091] p 192 N89-13751
 The effects of inlet turbulence and rotor/stator interactions on the aerodynamics and heat transfer of a large-scale rotating turbine model, volume 1
 [NASA-CR-4079] p 192 N89-13756
 Aerodynamic drag of cylindrical vehicles moving concentrically within long tubes
 [AD-A197947] p 219 N89-15076
 Aerochemical modeling program. Phase 2, element B: Flow interaction experiment p 351 N89-17304
 Measurement of airfoil heat transfer coefficients on a turbine stage p 351 N89-17311
 Parametric study of grid size, time step and turbulence modeling on Navier-Stokes computations over airfoils
 p 373 N89-18615
 Computational techniques and validation of 3D viscous/turbulent codes for internal flows
 p 423 N89-18638
 Experiments and code validation for juncture flows
 p 374 N89-18658
 Unsteady Navier-Stokes computations over airfoils using both fixed and dynamic meshes p 376 N89-19252
 Performance and test section flow characteristics of the National Full-Scale Aerodynamics Complex 40- by 80-foot wind tunnel
 [NASA-TM-101065] p 438 N89-20086
 Turbulent eddy viscosity modeling in transonic shock/boundary-layer interactions p 456 N89-20952
 Effect of riblets upon flow separation in a subsonic diffuser
 [AD-A203178] p 458 N89-20967
 An explicit Runge-Kutta method for turbulent reacting flow calculations
 [NASA-TM-101945] p 536 N89-21799
 A study of unsteady turbulent flow past airfoils
 p 521 N89-22587
 Finite difference analysis of rotordynamic seal coefficients for an eccentric shaft position
 p 560 N89-22906
 Boundary layer response to an unsteady turbulent environment
 [AD-A206578] p 596 N89-24273
 Analysis of the wake behind a propeller using the finite element method with a two-equation turbulence model
 p 597 N89-24286

Noise produced by turbulent flow into a rotor: Theory manual for noise calculation
 [NASA-CR-181788] p 714 N89-26683
 Noise produced by turbulent flow into a rotor: Theory manual for atmospheric turbulence prediction and mean flow and turbulence contraction prediction
 [NASA-CR-181789] p 813 N89-27466
 Experimental assessment of helicopter rotor turbulence ingestion noise in hover
 [NASA-CR-181792] p 813 N89-27468
 Noise produced by turbulent flow into a rotor: Users manual for noise calculation
 [NASA-CR-181790] p 876 N89-29152
 Noise produced by turbulent flow into a rotor: Users manual for atmospheric turbulence prediction and mean flow and turbulence contraction prediction
 [NASA-CR-181791] p 876 N89-29154
TURBULENT HEAT TRANSFER
 Possibilities for modeling turbulent heat transfer in hypersonic finite-jet flow past bodies
 p 371 A89-32145
 Effect of jet grid turbulence on turbulent boundary layer heat transfer p 494 A89-34930
 Prediction of heat transfer characteristics of discrete hole film cooling - One row of injection into a turbulent boundary layer p 494 A89-34931
 An experimental investigation of heat transfer coefficients and friction factors in passages of different aspect ratios roughened with 45 deg turbulators
 p 862 A89-53274
TURBULENT JETS
 A study of supersonic isobaric submerged turbulent jets p 65 A89-13160
 The turbulent free jet issuing from a sharp-edged elliptical slot
 [AIAA PAPER 89-0664] p 345 A89-25526
 The influence of jet-grid turbulence on turbulent boundary layer flow and heat transfer
 p 419 A89-30929
 Effects of swirl and high turbulence on a jet in a crossflow p 515 A89-39192
 Transient flow thrust prediction for an ejector propulsion concept
 [AIAA PAPER 89-2906] p 774 A89-49688
 A control-volume method for analysis of unsteady thrust augmenting ejector flows
 [NASA-CR-182203] p 109 N89-12566
 Experimental examination of the aerothermal performance of the T-10 test cell at NAS (Naval Air Station), Cubi Point
 [AD-A203887] p 487 N89-21005
 Microburst simulation via vortex-ring and turbulent jet models p 562 N89-22287
TURBULENT MIXING
 On the pairing process in an excited, plane, turbulent mixing layer p 47 A89-10173
 Effect of small-scale turbulence on the development of coherent structures in a mixing layer --- subsonic free aerodynamics p 208 A89-21515
 Turbulent mixing in supersonic combustion systems
 [AIAA PAPER 89-0260] p 323 A89-25218
 Effects of a downstream disturbance on the structure of a turbulent plane mixing layer p 348 A89-27692
 Linear instability waves in supersonic turbulent mixing layers p 508 A89-36903
 Numerical analysis of supersonic turbulent mixing layer
 [AIAA PAPER 89-1811] p 580 A89-42041
 Prediction of turbulent mixing and film-cooling effectiveness for hypersonic flows
 [AIAA PAPER 89-1867] p 586 A89-42094
 The mixing of three-dimensional turbulent wakes in boundary layers p 639 A89-43722
 An experimental study of the effect of streamwise vorticity on supersonic mixing enhancement
 [AIAA PAPER 89-2456] p 648 A89-46843
 A concentration probe for the study of mixing in supersonic shear flows
 [AIAA PAPER 89-2459] p 703 A89-46846
 Mixing augmentation technique for hypervelocity scramjets p 840 A89-53351
 Characteristic time model validation
 [AD-A201374] p 426 N89-19510
 Flow control for unsteady and separated flows and turbulent mixing
 [AD-A205989] p 594 N89-23426
TURBULENT WAKES
 Flow past circular cylinder of finite length placed on ground plane p 48 A89-10543
 Development of airfoil wake in a longitudinally curved stream p 78 A89-16110
 Flow fields visualization around an isolated rotor in the vertical autorotation and their application to performance prediction p 80 A89-16548
 Vortical wakes over a prolate spheroid
 p 150 A89-20181

Interactions between turbulent wakes and boundary layers p 150 A89-20182
 Smoke wire visualization of unsteady separation over an oscillating airfoil p 212 A89-22368
 Vortex street in the wake of a flat plate in longitudinal flow p 214 A89-22763
 The turbulent near wake at a sharp trailing edge
 p 214 A89-22825
 Self-preservation of turbulent wakes
 p 218 A89-24313
 Wakes of four complex bodies of revolution at zero angle of attack p 508 A89-36907
 The mixing of three-dimensional turbulent wakes in boundary layers p 639 A89-43722
 Effects of riblets on the wake characteristics of an airfoil
 [AIAA PAPER 89-2199] p 723 A89-47658
 Evolution of axisymmetric wakes from attached and separated flows p 818 A89-52945
 Phenomena and modelling of flow-induced vibrations of bluff bodies p 861 A89-52961
 Investigation of wake vortices of landing aircraft at Frankfurt airport (Federal Republic of Germany)
 [DFVLR-MITT-88-15] p 17 N89-10862
 Acoustic test of a model rotor and tail rotor: Results for the isolated rotors and combined configuration
 [NASA-TM-101550] p 504 N89-20777
 Vortex structures in the wake of transonic flow about profiles p 654 A89-25134
 Flow characteristics about a trailing edge
 [UTIAS-TN-270] p 655 N89-25952
 Photogrammetric technique for in-flight ranging of trailing vortices using entrained balloons
 [NASA-TM-4129] p 807 N89-27995
 Experimental investigation of a three dimensional wake in the vicinity of a wing-body junction
 [CERT-0A-29/5025-AYD] p 825 N89-29325
TURNING FLIGHT
 A note on the aircraft minimum-time turns
 p 182 A89-20638
 Agile Fighter Aircraft Simulation
 [AIAA PAPER 89-0015] p 331 A89-25011
 A method for determining the inertia tensor of a craft in flight p 565 A89-39819
 Determination of the deviation coefficients of a magnetic compass during a turn p 610 A89-40719
TVD SCHEMES
 A multiblock approach to solving the three-dimensional unsteady Euler equations about a wing-pylon-store configuration
 [AIAA PAPER 89-3401] p 732 A89-49100
 A total variation diminishing scheme for computational aerodynamics p 744 A89-51562
TWISTED WINGS
 Boundaries of linear characteristics of cambered and twisted wings at subcritical Mach numbers
 [ESDU-88030] p 298 N89-16735
TWISTING
 Effects of twist on helicopter performance and vibratory loads p 232 A89-23376
 An integrated design computational method for the wing optimization camber and twist at subsonic and supersonic flow p 646 A89-46256
TWO DIMENSIONAL BODIES
 Two-dimensional Euler computations on a triangular mesh using an upwind, finite-volume scheme
 [AIAA PAPER 89-0470] p 354 A89-25385
 Flow of rarefied gases over two-dimensional bodies
 [AIAA PAPER 89-1970] p 575 A89-41814
 Studies of friction drag and pressure drag of airfoils using the Eppler program
 [SAE PAPER 881396] p 742 A89-51356
 A computational study of coherent structures in the wakes of two-dimensional bluff bodies
 [AD-A196820] p 53 N89-11188
 A comparison of numerical methods for the prediction of two-dimensional heat transfer in an electrothermal deicer pad
 [NASA-CR-4202] p 175 N89-13429
 Two-dimensional aerodynamic characteristics of the OLS/TAAT airfoil
 [NASA-TM-89435] p 154 N89-14216
 A critical assessment of wind tunnel results for the NACA 0012 airfoil p 300 N89-16847
 Aerodynamics of two-dimensional slotted bluff bodies
 [DE89-007288] p 452 N89-20105
 Aerodynamic interaction between vortical wakes and lifting two-dimensional bodies
 [NASA-TM-101074] p 627 N89-24563
TWO DIMENSIONAL BOUNDARY LAYER
 A new boundary layer wind tunnel
 p 116 A89-16323
 Freestream turbulence effect on turbine airfoil heat transfer p 255 A89-22288

- Stability and transition of two-dimensional laminar boundary layers in compressible flow over an adiabatic wall p 270 A89-24922
- An experimental study of the formation and evolution of two-dimensional wave packets in a boundary layer p 416 A89-30206
- Linear instabilities in two-dimensional compressible mixing layers p 578 A89-41903
- ### TWO DIMENSIONAL FLOW
- An inverse, subsonic two-dimensional panel method following the method of smallest quadrature for the design and modification of multiple element profiles [DGLR PAPER 87-061] p 5 A89-10509
- A numerical simulation of separated flow around two-dimensional wing by a discrete vortex method p 6 A89-10568
- A second-order numerical method for the analysis of two-dimensional flow of ideal fluid through a cascade with supersonic input p 6 A89-10607
- Two-dimensional subsonic diffuser flow with uniform shear velocity profile at inlet p 7 A89-11056
- Integral equation solution for transonic and subsonic aerodynamics p 11 A89-11488
- Solution of 2-D Euler equations with a parallel code p 135 A89-13073

VARIABILITY

Vapor deposition and condensate flow on combustion turbine blades - Theoretical model to predict/understand some corrosion rate consequences of molten alkali sulfate deposition in the field or laboratory p 238 A89-20950
Thermal barrier coating life prediction model development p 351 N89-17333
CVD and diffusion coatings for high temperature applications in turbomachinery and rocket motors p 549 N89-22658

VARIABILITY

Aerodynamic optimization by simultaneously updating flow variables and design parameters with application to advanced propeller designs [NASA-CR-182181] p 109 N89-11750
A method for monitoring the variability in nuclear absorption characteristics of aviation fuels [NASA-TM-4077] p 136 N89-12234
Measured and predicted pressure distributions on the AFTI/F-111 mission adaptive wing [NASA-TM-100443] p 235 N89-15908

VARIABLE CYCLE ENGINES

Variable-cycle engines for boosting-cruising vehicles [IAF PAPER 88-249] p 175 A89-17742
Aircraft engines. II p 239 A89-22926
Variable-cycle turbojet engines for multiple-regime aircraft --- Russian book p 535 A89-38510
Civil supersonics - Propulsion is the key p 675 A89-45031

A comparison of scramjet engine performances of various cycles [AIAA PAPER 89-2676] p 680 A89-47006
A study of an advanced variable cycle diesel as applied to an RPV: Evaluation of an RPV variable cycle diesel engine [AD-A207754] p 842 N89-29347

VARIABLE GEOMETRY STRUCTURES

fs 32 - A split-Fowler glider problem presentation and solutions [DGLR PAPER 87-082] p 26 A89-10518
Quadrilateral Coons surface shell finite element with discrete principal curvature lines p 122 A89-13563
The finite dynamic annular element for the vibration analysis of variable thickness discs p 420 A89-31529
Variable structure model-following control of flight dynamics p 482 A89-35300
Variable geometry in supersonic compressors p 330 N89-16838

VARIABLE PITCH PROPELLERS

Aeroelastic response characteristics of a hovering rotor due to harmonic blade pitch variation p 101 A89-16547
Wind-tunnel results of advanced high-speed propellers at takeoff, climb, and landing Mach numbers [NASA-TM-87030] p 377 N89-19265

VARIABLE SWEEP WINGS

Scissor wing - An alternative to variable sweep [AIAA PAPER 89-0013] p 310 A89-25009
Wind-tunnel investigation of aerodynamic characteristics and wing pressure distributions of an airplane with variable-sweep wings modified for laminar flow [NASA-TM-4124] p 744 N89-26810

VARIATIONAL PRINCIPLES

An alternative method to solve a variational inequality applied to an air traffic control example p 354 A89-26196
Variational finite element calculation for hybrid cascade flow problem of type-A on an arbitrary stream sheet p 369 A89-31520
A new variational method for the generation of two- and three-dimensional adapted grids in computational fluid dynamics [ONERA, TP NO. 1989-31] p 641 A89-45187
Variational problems in radiative gas dynamics in the case of surface gas injection p 733 A89-49203
Some experiences with grid generation on curved surfaces using variational and optimisation techniques p 744 A89-51550

VATOL AIRCRAFT

The 1987 Ground Vortex Workshop [NASA-CP-10008] p 15 N89-10849

VECTOR PROCESSING (COMPUTERS)

Representation and display of vector field topology in fluid flow data sets p 875 A89-54904

VECTORS (MATHEMATICS)

Programming techniques for high-speed processing on the supercomputer FUJITSU VP-system [NAL-TR-915] p 58 N89-10565
Vector potential methods p 455 N89-20939
Three-dimensional singular points in aerodynamics [NASA-TM-100045] p 457 N89-20964

VEHICULAR TRACKS

High-speed data acquisition for the Princeton University Dynamic Model Track [NASA-CR-185491] p 792 N89-26865

VELOCITY

Analytical modeling of helicopter static and dynamic induced velocity in GRASP p 513 A89-38555

VELOCITY DISTRIBUTION

Combined translation/pitch motion - A new airfoil dynamic stall simulation p 77 A89-16091
Construction of a wing profile from velocity distributions on its surface for two angles of attack p 209 A89-21565

Rearrangement of vortex street in the wake behind a two-dimensional body p 213 A89-22626
Effects of difference in induced velocity distribution on the helicopter motion p 243 A89-23304
Velocity measurements of airframe effects on a rotor in a low-speed forward flight p 394 A89-31859

Lateral induced velocity distribution of a helicopter rotor p 509 A89-38987
Three-dimensional dual-potential procedure for inlets and indraft wind tunnels p 570 A89-40908
Measurement and computation of the velocity field of a cylinder in the wake of a rotor in forward flight [AIAA PAPER 89-1844] p 583 A89-42072

The influence of altitude and speed variations on the aeroplane's load components in longitudinal nonlinear manoeuvres p 688 A89-45179
Subsonic and supersonic laser velocimetry p 800 A89-49025

Differing development of the velocity profiles of three-dimensional turbulent boundary layers p 819 A89-53947
Turbulent boundary layer modification by streamlined devices p 259 N89-15367

Computing induced velocity perturbations due to a helicopter fuselage in a free stream [NASA-TM-4113] p 592 N89-23410

Time domain numerical calculations of unsteady vortical flows about a flat plate airfoil [NASA-TM-102318] p 866 N89-28726

VELOCITY ERRORS

Precision characteristics of a coordinate device for estimating the velocity of an object p 830 A89-52779

VELOCITY MEASUREMENT

Turbulence measurements with symmetrically bent V-shaped hot-wires. I - Principles of operation. II - Measuring velocity components and turbulent shear stresses p 121 A89-13378
Quantitative flow field visualization in wind tunnels by means of particle image velocimetry p 73 A89-13676
Model rotor wake measurements in a wind tunnel p 216 A89-23344

Fluctuations and massive separation in three-dimensional shock-wave/boundary-layer interactions p 388 A89-30952

Particle image displacement velocimetry applied in high speed flows p 490 A89-33388

Mean and turbulent velocity measurements of supersonic mixing layers p 440 A89-33426

NASA lidar velocimetry measurements p 491 A89-33435

Measurements in separating boundary layers p 552 A89-36908

A two-spark schlieren system for very-high velocity measurement p 555 A89-38874

Measurement and computation of the velocity field of a cylinder in the wake of a rotor in forward flight [AIAA PAPER 89-1844] p 583 A89-42072

A high speed data acquisition system for the analysis of velocity, density, and total temperature fluctuations at transonic speeds [SAE PAPER 881451] p 691 A89-45248

Investigation on unsteady flow field and endwall boundary layer in axial flow compressor with hot-wire anemometer p 645 A89-45560

Measurement of three-dimensional flow in turbomachinery with a single slanted hot-wire p 700 A89-45561

Diagnostic techniques for propulsion systems p 839 A89-52960

Three component laser anemometer measurements in an annular cascade of core turbine vanes with contoured end wall [NASA-TP-2846] p 15 N89-10844

LDV measurements in an annular combustor model [NASA-CR-182207] p 192 N89-13755

Implementation of a two-component laser anemometer at the T2 wind tunnel [A-501-H] p 558 N89-22879

Evaluation of LDA 3-component velocity data on a 65 deg delta wing at M = 0.85 and first results of an analysis [DFVLR-FB-89-19] p 823 N89-28505

Species composition measurements in nonequilibrium high-speed flows p 824 N89-29312

VENTING

Investigation for venting test technology with large-sized model in a large wind tunnel p 541 A89-37783

Passive venting technique for shallow cavities [NASA-CASE-LAR-14031-1] p 168 N89-14232
Passive venting technique for shallow cavities [NASA-CASE-LAR-13875-1] p 169 N89-14233
Airplane tests of enhanced emergency smoke venting [D218N301] p 658 N89-25976
EC-18B/Boeing 707 Smoke Venting flight test [AD-A206601] p 659 N89-25979

VENTS

EC-18B/Boeing 707 Smoke Venting flight test [AD-A206601] p 659 N89-25979

VERBAL COMMUNICATION

Concepts, parameters, and symbols of flight mechanics p 207 A89-21409
Integration of vocal dialogue on-board a combat aircraft p 399 N89-18471

VERTICAL AIR CURRENTS

The effect of a ground-based inversion layer on an impacting microburst [AIAA PAPER 89-0810] p 352 A89-25593
Numerical simulation of microburst downdrafts - Application to on-board and look ahead sensor technology [AIAA PAPER 89-0821] p 353 A89-25599

An index for clear air turbulence based on horizontal deformation and vertical wind shear p 871 A89-54841

VERTICAL FLIGHT

Optimization of a complex baroinertial computer of aircraft's vertical velocity and flight height p 242 A89-21554

Identification of an adequate model for collective response dynamics of a Sea King helicopter in hover [AD-A208060] p 836 N89-29341

VERTICAL LANDING

STOVL engine/airframe integration p 228 A89-22294

An automatic flight control system for VTOL aircraft supported by ducted fans p 245 A89-24492

Simulation evaluation of transition and hover flying qualities of the E-7A STOVL aircraft [SAE PAPER 881430] p 333 A89-28205

Conceptual design of a STOVL fighter/attack aircraft [SAE PAPER 881431] p 313 A89-28206

Considerations of control authority requirements in STOVL propulsion system sizing [SAE PAPER 881432] p 313 A89-28207

Launch, recovery and handling systems for vertical take-off and landing UAVs operating from small ships p 484 A89-33569

A static investigation of several STOVL exhaust system concepts [AIAA PAPER 89-2928] p 684 A89-47180

US/UK Advanced Short Takeoff and Vertical Landing program (ASTOVL) [AIAA PAPER 89-2039] p 758 A89-49419

VTOL flight performance/weight and balance computer development [SAWE PAPER 1824] p 762 A89-50818

Noise generated by a flight weight, air flow control valve in a vertical takeoff and landing aircraft thrust vectoring system [NASA-CR-182232] p 504 N89-20776

Heliport night parking area criteria test plan [DOT/FAA/CT-TN88/45] p 619 N89-23480

VERTICAL MOTION

Evaluation of simulator motion characteristics based on AGARD-AR-144 procedures p 183 A89-19565

Correction for deflections of the vertical at the runup site p 307 A89-26725

A physical-statistical method for the prediction of vertical wind shear in the lower part of the atmospheric boundary layer p 499 A89-34028

VERTICAL MOTION SIMULATORS

The vertical motion simulator p 339 N89-18384

VERTICAL ORIENTATION

Determination of deflections of the vertical using the global positioning system [AD-A196680] p 90 N89-11729

VERTICAL TAKEOFF

An automatic flight control system for VTOL aircraft supported by ducted fans p 245 A89-24492

Launch, recovery and handling systems for vertical take-off and landing UAVs operating from small ships p 484 A89-33569

Noise generated by a flight weight, air flow control valve in a vertical takeoff and landing aircraft thrust vectoring system [NASA-CR-182232] p 504 N89-20776

VERTICAL TAKEOFF AIRCRAFT

A moving-average method for input saturation problem in adaptive control p 264 A89-24582

Aspects of military-aircraft development up to the year 2000 p 359 A89-30646

Large-eddy simulations of excitation effects on a VTOL upwash fountain p 442 A89-34461

Helicopters and VTOL. I p 527 A89-38699

- Navier-Stokes simulation of transonic wing flow fields using a zonal grid approach p 290 A89-25862

A numerical method for calculating the low-speed aerodynamic characteristics of the strake-wing configurations p 292 A89-25941

An integral method for calculating turbulent boundary layer flow on practical wings p 292 A89-25942

The development of a capability for aerodynamic testing of large-scale wing sections in a simulated natural rain environment [AIAA PAPER 89-0762] p 337 A89-28457

On the reduction of Dirichlet-Newton problems to wing equations p 429 A89-29130

Analysis of wings with flow separation p 361 A89-29163

Effects of a fillet on the flow past a wing body junction [AIAA PAPER 89-0988] p 366 A89-30498

Laminar flow - The past, present, and prospects [AIAA PAPER 89-0989] p 366 A89-30501

Toward lower drag with laminar flow technology p 371 A89-32301

Induced drag and the ideal wake of a lifting wing p 446 A89-34898

Prediction of fatigue life under aircraft loading with and without use of material memory rules p 527 A89-38028

The joined wing - The benefits and drawbacks. I p 507 A89-38800

A computational method of aerodynamics for subsonic, fully unsteady wings at high angles of attack in time-domain p 515 A89-39462

Aerodynamic design via control theory p 589 A89-43094

Embedded temperature measurements in a carbon-carbon wing leading edge hot structure p 697 A89-43843

Navier-Stokes simulation of transonic flow about wings using a block structured approach p 644 A89-45422

An integrated design computational method for the wing optimization camber and twist at subsonic and supersonic flow p 646 A89-46256

Experimental study of vortex and aerodynamic characteristics of stack wings with side slip p 646 A89-46259

The analysis and measurements of radar cross section (RCS) of some wing structure models p 674 A89-46298

A direct-inverse transonic wing-design method in curvilinear coordinates including viscous-interaction [AIAA PAPER 89-2204] p 753 A89-47663

A numerical study of a wing and propeller in mutual interference [AIAA PAPER 89-2215] p 723 A89-47672

Wing boundary layer response to an unsteady turbulent flowfield [AIAA PAPER 89-2226] p 724 A89-47682

Turbulent-flow calculations for flow over wings near maximum lift [AIAA PAPER 89-2239] p 726 A89-47693

Lift-curve slope for finite-aspect-ratio wings p 728 A89-48666

Numerical optimization of wings in transonic flow [ONERA, TP NO. 1989-87] p 728 A89-48751

Effect of turbulence on lifting surface boundary layer transition [ONERA, TP NO. 1989-87] p 729 A89-48767

Aerodynamic interaction between propellers and wings p 737 A89-50062

Navier-Stokes simulation of transonic wing flow fields using a zonal grid approach [NASA-TM-100039] p 13 N89-10022

Finite difference analysis of external and internal lightning response of the JAS39 CFC wing p 22 N89-10483

Modelling of common mode coupling between an aircraft wing traversed by a lightning current and wiring installed in that wing p 22 N89-10485

Structural efficiency study of composite wing rib structures [NASA-CR-183004] p 119 N89-11827

Damage tolerant composite wing panels for transport aircraft [NASA-CR-3951] p 251 N89-15187

Integration effects of pylon geometry on a high-wing transport airplane [NASA-TP-2677] p 221 N89-15888

Analytical wing weight prediction/estimation using computer based design techniques p 234 N89-15903

Aerodynamic performance of wings of arbitrary planform in inviscid, incompressible, irrotational flow [AD-A200436] p 297 N89-16728

Development of direct-inverse 3-D methods for applied transonic aerodynamic wing design and analysis [NASA-CR-184788] p 300 N89-16761

Vibration and aeroelastic tailoring of advanced composite plate-like lifting surfaces p 351 N89-17263

Analytical wing weight prediction/estimation using computer based design techniques p 316 N89-17589

Typical joints in a wing structure p 317 N89-17693

Test specimens for bearing and by-pass stress interaction in carbon fibre reinforced plastic laminates p 342 N89-17696

The design of the GARTEUR low aspect-ratio wing for use in the validation of shear layer and overall flow prediction methods p 394 N89-18652

Flight survey of the 757 wing noise field and its effects on laminar boundary layer transition. Volume 1: Program description and data analysis [NASA-CR-178216] p 424 N89-18665

Investigation of a free-tip rotor configuration for research on spanwise life distributions and wake velocity surveys of a semi-span wing with a discontinuous twist [NASA-CR-184948] p 457 N89-20963

Control augmented structural optimization of aeroelastically tailored fiber composite wings [AD-A204534] p 530 N89-21791

Investigations of the parameter reduction in the optimization of aircraft wing structures [ILR-MITT-203] p 531 N89-21795

Stall flutter of graphite/epoxy wings with bending-torsion coupling [AD-A203077] p 540 N89-21804

Optimum aeroelastic characteristics for composite supermaneuverable aircraft [AD-A205503] p 607 N89-23452

Thermal analysis of a hypersonic wing test structure [NASA-CR-185319] p 595 N89-24265

Aeroelastic tailoring and integrated wing design p 668 N89-25167

An integrated approach to the optimum design of actively controlled composite wings p 670 N89-25194

Steady-state and transitional aerodynamic characteristics of a wing in simulated heavy rain [NASA-TP-2932] p 655 N89-25951

Electromagnetic emissions from a modular Low Voltage Electro-Impulse De-icing system [DOT/FAA/CT-88/31] p 707 N89-26120

Numerical study of three-dimensional separation and flow control at a wing/body junction [NASA-CR-185819] p 746 N89-26826

Composite transport wing technology development [NASA-CR-178409] p 766 N89-26842

Flutter calculations for a model wing using the MSC NASTRAN structural analysis program [AD-A209244] p 824 N89-29318

WINTER

A cooperative study on winter icing conditions in the Denver area p 869 A89-54806

WIRE

Automated wire preparation system p 189 A89-18895

WIRING

Integrated interconnection systems for aerospace applications [SAWE PAPER 1821] p 803 A89-50817

WORK HARDENING

Recovery of the fatigue strength of structural elements of aluminum alloys by surface hardening p 857 A89-52827

WORKING FLUIDS

Selection of the optimal lighter-than-air gas for airship and a scheme of double-layer structural design p 186 A89-19809

WORKLOADS (PSYCHOPHYSIOLOGY)

TEAS - An AI based threat response recommendation system [SAE PAPER 871804] p 57 A89-10589

Introduction of Pilot's Operational Workload Evaluation Research Simulator, POWERS, in Aeromedical Laboratory, JASDF p 183 A89-19876

Notar reduces pilot workload, improves response in OH-6A p 385 A89-29348

Safety philosophies in air transport p 597 A89-39859

Aerospace Behavioral Technology Conference and Exposition, 7th, Anaheim, CA, Oct. 3-6, 1988, Proceedings [SAE P-216] p 638 A89-47326

Autonomous RPRV navigation, guidance and control [NASA-CR-179425] p 161 N89-14228

Controller evaluation of initial data link air traffic control services: Mini-study 1, volume 2 [DOT/FAA/CT-88/25-VOL-2] p 227 N89-15101

WORKSTATIONS

Evaluation of the performance of a vocal recognition system in air traffic control tasks - Vocal workstation of an air traffic control simulator p 89 A89-14491

WORLD DATA CENTERS

The World Area Forecast System p 870 A89-54827

WROUGHT ALLOYS

Structure and properties of forged ODS nickel-base superalloys p 491 A89-33461

X

X RAY ANALYSIS

In-line wear monitor [AD-A201292] p 402 N89-19301

X RAY DIFFRACTION

XRD techniques in aero engine development --- X-ray diffraction p 555 A89-38632

X RAY FLUORESCENCE

X-ray based extensometry [NASA-CR-185058] p 706 N89-25432

X RAY INSPECTION

Micro radiography and tomography for high resolution NDT of advanced materials and microstructural components p 495 A89-35081

Nondestructive volumetric CT-scan evaluation of monolithic ceramic turbine components p 555 A89-38954

Short term developments in non-destructive evaluation applicable to turbine engine parts p 350 N89-17258

X RAY STRESS MEASUREMENT

The measurement of residual stresses in case hardened bearing components by X-ray diffraction [PNR90482] p 425 N89-18689

Residual stress changes in fatigue. Volume 2: A simulation model for stress measurements in notched test specimens by X-ray diffraction [AD-A208346] p 806 N89-27226

X WING ROTORS

X-wing fly-by-wire vehicle management system [AIAA PAPER 88-3923] p 179 A89-18100

An examination of some rotor aerodynamic models using the RSRA/X-wing model test data p 146 A89-18858

A parallel architecture for a real-time blade element rotorcraft simulation p 201 A89-19560

Results of a parametric aeroelastic stability analysis of a generic X-wing aircraft [AIAA PAPER 89-1385] p 391 A89-30858

Aeroelastic deformation effects on the stopped-rotor dynamics of an X-wing aircraft p 482 A89-34897

Results of a parametric aeroelastic stability analysis of a generic X-wing aircraft [NASA-TM-101572] p 617 N89-24324

X-15 AIRCRAFT

X-15 pilot-in-the-loop and redundant/emergency systems evaluation p 664 A89-45168

X-20 AIRCRAFT

The X-20 space plane - Past innovation, future vision [IAF PAPER 88-598] p 204 A89-17867

X-22 AIRCRAFT

Identification of state-space parameters in the presence of uncertain nuisance parameters p 875 A89-54022

X-29 AIRCRAFT

X-29A forward-swept-wing flight research program status [SAE PAPER 872418] p 27 A89-10640

Second X-29 will execute high-angle-of-attack flights p 100 A89-16215

X-29 validation methodology for simulation and flight control system p 181 A89-19557

Integrated aeroservoelastic analysis capability with X-29A comparisons p 244 A89-24311

Real-time comparison of X-29A flight data and simulation data p 332 A89-27736

X-29A subsystems integration - An example for future aircraft [SAE PAPER 881504] p 314 A89-28269

Sensitivity analysis of digital flight control systems using singular-value concepts p 538 A89-36927

X-29A performance flight tests - Results and lessons learned p 686 A89-45154

Unsteady flows produced by small amplitude oscillations of the canard of an X-29 model [AIAA PAPER 89-2229] p 724 A89-47685

Flight tests confirm X-29 technologies p 756 A89-48849

High-alpha flight dynamics research on the X-29 configuration using dynamic model test techniques [SAE PAPER 881420] p 783 A89-51359

A design procedure for the handling qualities optimization of the X-29A aircraft [AIAA PAPER 89-3428] p 843 A89-52529

Initial flight qualification and operational maintenance of X-29A flight software p 850 A89-52675

[AIAA PAPER 89-3596] p 41 N89-10896

Investigation of the tumbling phenomenon using computer simulation p 41 N89-10896

Real-time flight test analysis and display techniques for the X-29A aircraft [NASA-TM-101892] p 168 N89-13424

Predicted pitching moment characteristics of X-29A aircraft [NASA-TM-88284] p 372 N89-18418

Lateral stability analysis for X-29A drop model using system identification methodology [NASA-TM-4108] p 539 N89-21802

SUBJECT INDEX

ZIRCONIUM ALLOYS

Y

YAW

- Aeroelastic response of metallic and composite propfan models in yawed flow [AIAA PAPER 88-3154] p 175 A89-17942
- The impact of yaw axis control modes, flight directors and automatic control coupling on decelerating IFR approaches for rotorcraft p 180 A89-18903
- Notar reduces pilot workload, improves response in OH-6A p 385 A89-29348
- A study of unsteady turbulent flow past airfoils p 521 N89-22587

YAWING MOMENTS

- Transonic magnus force on a finned configuration p 112 A89-13658
- Development of non-conventional control methods for high angle of attack flight using vortex manipulation [AIAA PAPER 89-2192] p 778 A89-47653
- Method for simultaneous wing aerodynamic and structural load prediction [AIAA PAPER 89-2200] p 753 A89-47659
- Yawing moment coefficient for plain ailerons at subsonic speeds [ESDU-88029] p 298 N89-16734

YIELD POINT

- Damage tolerant composite wing panels for transport aircraft [NASA-CR-3951] p 251 N89-15187

Z

ZERO ANGLE OF ATTACK

- Wakes of four complex bodies of revolution at zero angle of attack p 508 A89-36907

ZIRCONIUM ALLOYS

- Thermal conductivity and microstructure stability of heat treated AMZIRC copper-based alloys p 341 A89-26361

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any one author's name the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

IA63 Pampa - The completion of an aircraft development program p 568 A89-43112
- MOIN, P.**
Direct numerical simulation of a three-dimensional turbulent boundary layer p 493 A89-34909
- MOIN, PARVIZ**
On the structure of two- and three-dimensional separation [AIAA PAPER 89-0287] p 280 A89-25244
- MOIR, I.**
Application of digital technology to aircraft utility systems [AIAA PAPER 88-3872] p 180 A89-18114
- MOISEVA, L. T.**
Adaptive control of the grinding of large gas turbine blades p 492 A89-34144
- MOITRA, ANUTOSH**
HOMAR: A computer code for generating homotopic grids using algebraic relations: User's manual [NASA-CR-4243] p 708 N89-26176
- MOKHTARIAN, F.**
Rotating air scoop as airfoil boundary-layer control p 150 A89-20149
- MOKHTARIAN, F.**
Moving surface boundary-layer control as applied to two-dimensional airfoils [AIAA PAPER 89-0296] p 281 A89-25253
- MOKHTARIAN, F.**
Bound vortex boundary layer control with application to V/STOL airplanes p 449 A89-35994
- MOKHTARIAN, F.**
The high speed bus technology development program [AIAA PAPER 88-4005] p 187 A89-18158
- MOELLER, K. W.**
Accuracy requirements for high-speed test with engine simulation on transport aircraft models in the NLR-HST p 338 N89-16870
- MOENKE, H.**
The nonrigid airship of the Siemens-Schuckert Works [DGLR PAPER 87-055] p 60 A89-10537
- MOENSTER, BARTON W.**
McDonnell aircraft composites manufacturing - Experiencing growth p 414 A89-29469
- MOERDER, DANIEL D.**
Application of precomputed control laws in a reconfigurable aircraft flight control system p 538 A89-36931
- MOFFAT, ROBERT J.**
Heat transfer with very high free-stream turbulence and streamwise vortices p 132 N89-12900
- MOGHADAM, A.**
The mixing of three-dimensional turbulent wakes in boundary layers p 639 A89-43722
- MOHAMMADIAN, ALIREZA H.**
A CFD-based finite-volume procedure for computational electromagnetics - Interdisciplinary applications of CFD methods [AIAA PAPER 89-1987] p 633 A89-41830
- MOHAN, SRIJAYA**
Aeroelastic flutter of low aspect ratio cantilever composite plate p 347 A89-26281
- MOHLEJI, SATISH C.**
Air traffic control automation concepts to optimize flight management system utilization p 307 A89-26733
- MOHR, KARL-HEINZ**
IA63 Pampa - The completion of an aircraft development program p 568 A89-43112
